The colonial situation, and the ideological response of nationalism to the critique of Indian tradition, introduced an entirely new substance to [these dichotomies] and effected their transformation. The material/spiritual dichotomy, to which the terms world and home corresponded, had acquired … a very special significance in the nationalist mind. The world was where the European power had challenged the non-European peoples and, by virtue of its superior material culture, had subjugated them. But, the nationalists asserted, it had failed to colonize the inner, essential, identity of the East which lay in its distinctive, and superior, spiritual culture … [I]n the entire phase of the national struggle, the crucial need was to protect, preserve and strengthen the inner core of the national culture, its spiritual essence …

Once we match this new meaning of the home/world dichotomy with the identification of social roles by gender, we get the ideological framework within which nationalism answered the women's question. It would be a grave error to see in this, as liberals are apt to in their despair at the many marks of social conservatism in nationalist practice, a total rejection of the West. Quite the contrary: the nationalist paradigm in fact supplied an ideological principle of selection.

Which one of the following best describes the liberal perception of Indian nationalism?

A. Indian nationalism's sophistication resided in its distinction of the material from the spiritual spheres.
B. Indian nationalism embraced the changes brought about by colonialism in Indian women's traditional gender roles.
C. Indian nationalist discourses provided an ideological principle of selection.
D. Indian nationalist discourses reaffirmed traditional gender roles for Indian women.

cat2021-set2 verbal-ability passage-reading

## 5.16.614 Passage Reading: CAT 2021 Set-2 | Verbal Ability and Reading Comprehension | Question: 8 top

The passage below is accompanied by a set of questions. Choose the best answer to each question.

I have elaborated … a framework for analyzing the contradictory pulls on [Indian] nationalist ideology in its struggle against the dominance of colonialism and the resolution it offered to those contradictions. Briefly, this resolution was built around a separation of the domain of culture into two spheres – the material and the spiritual. It was in the material sphere that the claims of Western civilization were the most powerful. Science, technology, rational forms of economic organization, modern methods of statecraft – these had given to European countries the strength to subjugate the non-European people … To overcome this domination, the colonized people had to learn those superior techniques of organizing material life and incorporate them within their own cultures … But this could not mean the imitation of the West in every aspect of life, for then the very distinction between the West and the East would vanish – the self-identity of national culture would itself be threatened …

The discourse of nationalism shows that the material/spiritual distinction was condensed into an analogous, but ideologically far more powerful, dichotomy: that between the outer and the inner … Applying the inner/outer distinction to the matter of concrete day-to-day living separates the social space into ghar and bahir, the home and the world. The world is the external, the domain of the material; the home represents one's inner spiritual self, one's true identity. The world is a treacherous terrain of the pursuit of material interests, where practical considerations reign supreme. It is also typically the domain of the male. The home in its essence must remain unaffected by the profane activities of the material world – and women is its representation. And so one gets an identification of social roles by gender to correspond with the separation of the social space into ghar and bahir …

The colonial situation, and the ideological response of nationalism to the critique of Indian tradition, introduced an entirely new substance to [these dichotomies] and effected their transformation. The material/spiritual dichotomy, to which the terms world and home corresponded, had acquired … a very special significance in the nationalist mind. The world was where the European power had challenged the non-European peoples and, by virtue of its superior material culture, had subjugated them. But, the nationalists asserted, it had failed to colonize the inner, essential, identity of the East which lay in its distinctive, and superior, spiritual culture … [I]n the entire phase of the national struggle, the crucial need was to protect, preserve and strengthen the inner core of the national culture, its spiritual essence …

Once we match this new meaning of the home/world dichotomy with the identification of social roles by gender, we get the ideological framework within which nationalism answered the women's question. It would be a grave error to see in this, as liberals are apt to in their despair at the many marks of social conservatism in nationalist practice, a total rejection of the West. Quite the contrary: the nationalist paradigm in fact supplied an ideological principle of selection.

Which one of the following, if true, would weaken the author's claims in the passage?

A. Forces of colonial modernity played an important role in shaping anti-colonial Indian nationalism.
B. The colonial period saw the hybridisation of Indian culture in all realms as it came in contact with British/European culture.
C. The Industrial Revolution played a crucial role in shaping the economic prowess of Britain in the eighteenth century.
D. Indian nationalists rejected the cause of English education for women during the colonial period.

cat2021-set2 verbal-ability passage-reading

## 5.16.615 Passage Reading: CAT 2021 Set-2 | Verbal Ability and Reading Comprehension | Question: 9 top

The passage below is accompanied by a set of questions. Choose the best answer to each question.

Many people believe that truth conveys power … Hence sticking with the truth is the best strategy for gaining power. Unfortunately, this is just a comforting myth. In fact, truth and power have a far more complicated relationship, because in human society, power means two very different things.

On the one hand, power means having the ability to manipulate objective realities: to hunt animals, to construct bridges, to cure diseases, to build atom bombs. This kind of power is closely tied to truth. If you believe a false physical theory, you won't be able to build an atom bomb. On the order hand, power also means having the ability to manipulate human beliefs, thereby getting lots of people to cooperate effectively. Building atom bombs requires not just a good understanding of physics, but also the coordinated labor of millions of humans. Planet Earth was conquered by Homo sapiens rather than by chimpanzees or elephants, because we are the only mammals that can cooperate in very large numbers. And large-scale cooperation depends on believing common stories. But these stories need not be true. You can unite millions of people by making them believe in completely fictional stories about God, about race or about economics. The dual nature of power and truth results in the curious fact that we humans know many more truths than any other animal, but we also believe in much more nonsense …

When it comes to uniting people around a common story, fiction actually enjoys three inherent advantages over the truth. First, whereas the truth is universal, fictions tend to be local. Consequently if we want to distinguish our tribe from foreigners, a fictional story will serve as a far better identity marker than a true story … The second huge advantage of fiction over truth has to do with the handicap principle, which says that reliable signals must be costly to the signaler. Otherwise, they can easily be

faked by cheaters … If political loyalty is signaled by believing a true story, anyone can fake it. But believing ridiculous and outlandish stories exacts greater cost, and is therefore a better signal of loyalty … Third, and most important, the truth is often painful and disturbing. Hence if you stick to unalloyed reality, few people will follow you. An American presidential candidate who tells the American public the truth, the whole truth and nothing but the truth about American history has a 100 percent guarantee of losing the elections … An uncompromising adherence to the truth is an admirable spiritual practice, but it is not a winning political strategy …

Even if we need to pay some price for deactivating our rational faculties, the advantages of increased social cohesion are often so big that fictional stories routinely triumph over the truth in human history. Scholars have known this for thousands of years, which is why scholars often had to decide whether they served the truth or social harmony. Should they aim to unite people by making sure everyone believes in the same fiction, or should they let people know the truth even at the price of disunity?

The author implies that, like scholars, successful leaders:

A. use myths to attain the first type of power.
B. today know how to create social cohesion better than in the past.
C. need to leverage both types of power to remain in office.
D. know how to balance truth and social unity.

cat2021-set2 verbal-ability passage-reading

## 5.16.616 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 1 top

Today we can hardly conceive of ourselves without an unconscious. Yet between 1700 and 1900, this notion developed as a genuinely original thought. The "unconscious" burst the shell of conventional language, coined as it had been to embody the fleeting ideas and the shifting conceptions of several generations until, finally, it became fixed and defined in specialized terms within the realm of medical psychology and Freudian psychoanalysis.

The vocabulary concerning the soul and the mind increased enormously in the course of the nineteenth century. The enrichments of literary and intellectual language led to an altered understanding of the meanings that underlie time-honored expressions and traditional catchwords. At the same time, once coined, powerful new ideas attracted to themselves a whole host of seemingly unrelated issues, practices, and experiences, creating a peculiar network of preoccupations that as a group had not existed before. The drawn-out attempt to approach and define the unconscious brought together the spiritualist and the psychical researcher of borderline phenomena (such as apparitions, spectral illusions, haunted houses, mediums, trance, automatic writing); the psychiatrist or alienist probing the nature of mental disease, of abnormal ideation, hallucination, delirium, melancholia, mania; the surgeon performing operations with the aid of hypnotism; the magnetizer claiming to correct the disequilibrium in the universal flow of magnetic fluids but who soon came to be regarded as a clever manipulator of the imagination; the physiologist and the physician who puzzled over sleep, dreams, sleepwalking, anesthesia, the influence of the mind on the body in health and disease; the neurologist concerned with the functions of the brain and the physiological basis of mental life; the philosopher interested in the will, the emotions, consciousness, knowledge, imagination and the creative genius; and, last but not least, the psychologist.

Significantly, most if not all of these practices (for example, hypnotism in surgery or psychological magnetism) originated in the waning years of the eighteenth century and during the early decades of the nineteenth century, as did some of the disciplines (such as psychology and psychical research). The majority of topics too were either new or assumed hitherto unknown colors. Thus, before 1790, few if any spoke, in medical terms, of the affinity between creative genius and the hallucinations of the insane …

Striving vaguely and independently to give expression to a latent conception, various lines of thought can be brought together by some novel term. The new concept then serves as a kind of resting place or stocktaking in the development of ideas, giving satisfaction and a stimulus for further discussion or speculation. Thus, the massive introduction of the term unconscious by Hartmann in 1869 appeared to focalize many stray thoughts, affording a temporary feeling that a crucial step had been taken forward, a comprehensive knowledge gained, a knowledge that required only further elaboration, explication, and unfolding in order to bring in a bounty of higher understanding. Ultimately, Hartmann's attempt at defining the unconscious proved fruitless because he extended its reach into every realm of organic and inorganic, spiritual, intellectual, and instinctive existence, severely diluting the precision and compromising the impact of the concept.

Which one of the following sets of words is closest to mapping the main arguments of the passage?

A. Language; Unconscious; Psychoanalysis.
B. Imagination; Magnetism; Psychiatry.
C. Literary language; Unconscious; Insanity.
D. Unconscious; Latent conception; Dreams.

cat2021-set3 verbal-ability passage-reading

## 5.16.617 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 10 top

Starting in 1957, [Noam Chomsky] proclaimed a new doctrine: Language, that most human of all attributes, was innate. The grammatical faculty was built into the infant brain, and your average 3-year-old was not a mere apprentice in the great enterprise of absorbing English from his or her parents, but a “linguistic genius.” Since this message was couched in terms of Chomskyan theoretical linguistics, in discourse so opaque that it was nearly incomprehensible even to some scholars, many people did not hear it. Now, in a brilliant, witty and altogether satisfying book, Mr. Chomsky’s colleague Steven Pinker … has brought Mr. Chomsky’s findings to everyman. In “The Language Instinct” he has gathered persuasive data from such diverse fields as cognitive neuroscience, developmental psychology and speech therapy to make his points, and when he disagrees with Mr. Chomsky he tells you so …

For Mr. Chomsky and Mr. Pinker, somewhere in the human brain there is a complex set of neural circuits that have been programmed with “super-rules” (making up what Mr. Chomsky calls "universal grammar”), and that these rules are unconscious and instinctive. A half-century ago, this would have been pooh-poohed as a “black box” theory, since one could not actually pinpoint this grammatical faculty in a specific part of the brain, or describe its functioning. But now things are different. Neurosurgeons [have now found that this] “black box” is situated in and around Broca’s area, on the left side of the forebrain …

Unlike Mr. Chomsky, Mr.Pinker firmly places the wiring of the brain for language within the framework of Darwinian natural selection and evolution. He effectively disposes of all claims that intelligent nonhuman primates like chimps have any abilities to learn and use language. It is not that chimps lack the vocal apparatus to speak; it is just that their brains are unable to produce or use grammar. On the other hand, the “language instinct,” when it first appeared among our most distant hominid ancestors, must have given them a selective reproductive advantage over their competitors (including the ancestral chimps) …

So according to Mr. pinker, the roots of language must be in the genes, but there cannot be a “grammar gene” any more than there can be a gene for the heart or any other complex body structure. This proposition will undoubtedly raise the hackles of some behavioral psychologists and anthropologists, for it apparently contradicts the liberal idea that human behavior may be changed for the better by improvements in culture and environment, and it might seem to invite the twin bugaboos of biological determinism and racism. Yet Mr.Pinker stresses one point that should allay such fears. Even though there are $4,000$ to $6,000$ languages today, they are all sufficiently alike to be considered one language by an extraterrestrial observer. In other words, most of the diversity of the world’s cultures, so beloved to anthropologists, is superficial and minor compared to the similarities. Racial differences are literally only "skin deep.” The fundamental unity of humanity is the theme of Mr. Chomsky's universal grammar, and of this exciting book

From the passage, it can be inferred that all of the following are true about Pinker’s book, “The Language Instinct”, EXCEPT that Pinker:

A. writes in a different style from Chomsky.
B. draws extensively from Chomsky’s propositions.
C. draws from behavioural psychology theories.
D. disagrees with Chomsky on certain grounds.

cat2021-set3 verbal-ability passage-reading

## 5.16.618 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 11 top

Starting in 1957, [Noam Chomsky] proclaimed a new doctrine: Language, that most human of all attributes, was innate. The grammatical faculty was built into the infant brain, and your average 3-year-old was not a mere apprentice in the great enterprise of absorbing English from his or her parents, but a “linguistic genius.” Since this message was couched in terms of Chomskyan theoretical linguistics, in discourse so opaque that it was nearly incomprehensible even to some scholars, many people did not hear it. The fundamental unity of humanity is the theme of Mr. Chomsky's universal grammar, and of this exciting book

According to the passage, all of the following are true about the language instinct EXCEPT that:

A. developments in neuroscience have increased its acceptance.
B. not all intelligent primates are gifted with it.
C. all intelligent primates are gifted with it.
D. it confers an evolutionary reproductive advantage.

cat2021-set3 verbal-ability passage-reading

## 5.16.620 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 13 top

Back in the early 2000s, an awesome thing happened in the New X-Men comics. Our mutant heroes had been battling giant robots called Sentinels for years, but suddenly these mechanical overlords spawned a new threat: Nano-Sentinels! Not content to rule Earth with their metal fists, these tiny robots invaded our bodies at the microscopic level. Infected humans were slowly converted into machines, cell by cell.

Now, a new wave of extremely odd robots is making at least part of the Nano-Sentinels story come true. Using exotic fabrication materials like squishy hydrogels and elastic polymers, researchers are making autonomous devices that are often tiny and that could turn out to be more powerful than an army of Terminators. Some are 1-centrimetre blobs that can skate over water. Others are flat sheets that can roll themselves into tubes, or matchstick-sized plastic coils that act as powerful muscles. No, they won't be invading our bodies and turning us into Sentinels – which I personally find a little disappointing – but some of them could one day swim through our bloodstream to heal us. They could also clean up pollutants in water or fold themselves into different kinds of vehicles for us to drive …

Unlike a traditional robot, which is made of mechanical parts, these new kinds of robots are made from molecular parts. The principle is the same: both are devices that can move around and do things independently. But a robot made from smart materials might be nothing more than a pink drop of hydrogel. Instead of gears and wires, it's assembled from two kinds of molecules – some that love water and some that avoid it – which interact to allow the bot to skate on top of a pond.

Sometimes these materials are used to enhance more conventional robots. One team of researchers, for example, has developed a different kind of hydrogel that becomes sticky when exposed to a low-voltage zap of electricity and then stops being sticky when the electricity is switched off. This putty-like gel can be pasted right onto the feet or wheels of a robot. When the robot wants to climb a sheer wall or scoot across the ceiling, it can activate its sticky feet with a few volts. Once it is back on a flat surface again, the robot turns off the adhesive like a light switch.

Robots that are wholly or partly made of gloop aren't the future that I was promised in science fiction. But it's definitely the future I want. I'm especially keen on the nanometre-scale "soft robots" that could one day swim through our bodies. Metin Sitti, a direction at the Max Planck Institute for Intelligent Systems in Germany, worked with colleagues to prototype these tiny, synthetic beasts using various stretchy materials, such as simple rubber, and seeding them with magnetic microparticles. They are assembled into a finished shape by applying magnetic fields. The results look like flowers or geometric shapes made from Tinkertoy ball and stick modelling kits. They're guided through tubes of fluid using magnets, and can even stop and cling to the sides of a tube.

which one of the following statements, if true, would be the most direct extension of the arguments in the passage?

A. 1-centimetre blobs of gel that have nano-robots in them will be used to send messages.
B. in the future, robots will be used to search and destroy diseases even in the deepest recesses of the human body.
C. Sentinel robots will be used in warfare to cause large-scale destructive mutations amongst civilians.
D. X-Men may be created by injecting people with mutant nano-gels that will respond to the brain's magnetic field.

Unlike a traditional robot, which is made of mechanical parts, these new kinds of robots are made from molecular parts. The

principle is the same: both are devices that can move around and do things independently. But a robot made from smart materials might be nothing more than a pink drop of hydrogel. Instead of gears and wires, it's assembled from two kinds of molecules – some that love water and some that avoid it – which interact to allow the bot to skate on top of a pond.

Sometimes these materials are used to enhance more conventional robots. One team of researchers, for example, has developed a different kind of hydrogel that becomes sticky when exposed to a low-voltage zap of electricity and then stops being sticky when the electricity is switched off. This putty-like gel can be pasted right onto the feet or wheels of a robot. When the robot wants to climb a sheer wall or scoot across the ceiling, it can activate its sticky feet with a few volts. Once it is back on a flat surface again, the robot turns off the adhesive like a light switch.

Robots that are wholly or partly made of gloop aren't the future that I was promised in science fiction. But it's definitely the future I want. I'm especially keen on the nanometre-scale "soft robots" that could one day swim through our bodies. Metin Sitti, a direction at the Max Planck Institute for Intelligent Systems in Germany, worked with colleagues to prototype these tiny, synthetic beasts using various stretchy materials, such as simple rubber, and seeding them with magnetic microparticles. They are assembled into a finished shape by applying magnetic fields. The results look like flowers or geometric shapes made from Tinkertoy ball and stick modelling kits. They're guided through tubes of fluid using magnets, and can even stop and cling to the sides of a tube.

Which one of the following scenarios, if false, could be seen as supporting the passage?

A. Some hydrogels turn sticky when an electric current is passed through them; this potentially has very useful applications.
B. Robots made from smart materials are likely to become part of our everyday lives in the future.
C. Nano-Sentinel-like robots are likely to be used to inject people to convert them into robots, cell by cell.
D. There are two kinds of molecules used to make some nano-robots: one that reacts positively to water and the other negatively.

## 5.16.624 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 19 top

The passage given below is followed by four alternate summaries. Choose the option that best captures the essence of the passage.

People view idleness as a sin and industriousness as a virtue, and in the process have developed an unsatisfactory relationship with their jobs. Work has become a way for them to keep busy, even though many find their work meaningless. In their need for activity people undertake what was once considered work (fishing, gardening) as hobbies. The opposing view is that hard work has made us prosperous and improved our levels of health and education. It has also brought innovation and labour and time-saving devices, which have lessened life's drudgery.

A. Some believe that hard work has been glorified to the extent that it has become meaningless, and led to greater idleness, but it has also had enormous positive impacts on everyday life.
B. While the idealisation of hard work has propelled people into meaningless jobs and endless activity, it has also led to tremendous social benefits from prosperity and innovation.
C. Hard work has overtaken all aspects of our lives and has enabled economic prosperity, but it is important that people reserve their leisure time for some idleness.
D. Despite some detractors, hard work is essential in today's world to enable economic progress, for education and health and to propel innovations that make life easier.

cat2021-set3 verbal-ability passage-reading

## 5.16.625 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 2 top

Today we can hardly conceive of ourselves without an unconscious. Yet between 1700 and 1900, this notion developed as a genuinely original thought. The "unconscious" burst the shell of conventional language, coined as it had been to embody the fleeting ideas and the shifting conceptions of several generations until, finally, it became fixed and defined in specialized terms within the realm of medical psychology and Freudian psychoanalysis.

The vocabulary concerning the soul and the mind increased enormously in the course of the nineteenth century. The enrichments of literary and intellectual language led to an altered understanding of the meanings that underlie time-honored expressions and traditional catchwords. At the same time, once coined, powerful new ideas attracted to themselves a whole host of seemingly unrelated issues, practices, and experiences, creating a peculiar network of preoccupations that as a group had not existed before. The drawn-out attempt to approach and define the unconscious brought together the spiritualist and the psychical researcher of borderline phenomena (such as apparitions, spectral illusions, haunted houses, mediums, trance, automatic writing); the psychiatrist or alienist probing the nature of mental disease, of abnormal ideation, hallucination, delirium, melancholia, mania; the surgeon performing operations with the aid of hypnotism; the magnetizer claiming to correct the disequilibrium in the universal flow of magnetic fluids but who soon came to be regarded as a clever manipulator of the imagination; the physiologist and the physician who puzzled over sleep, dreams, sleepwalking, anesthesia, the influence of the

mind on the body in health and disease; the neurologist concerned with the functions of the brain and the physiological basis of mental life; the philosopher interested in the will, the emotions, consciousness, knowledge, imagination and the creative genius; and, last but not least, the psychologist.

Significantly, most if not all of these practices (for example, hypnotism in surgery or psychological magnetism) originated in the waning years of the eighteenth century and during the early decades of the nineteenth century, as did some of the disciplines (such as psychology and psychical research). The majority of topics too were either new or assumed hitherto unknown colors. Thus, before 1790, few if any spoke, in medical terms, of the affinity between creative genius and the hallucinations of the insane …

Striving vaguely and independently to give expression to a latent conception, various lines of thought can be brought together by some novel term. The new concept then serves as a kind of resting place or stocktaking in the development of ideas, giving satisfaction and a stimulus for further discussion or speculation. Thus, the massive introduction of the term unconscious by Hartmann in 1869 appeared to focalize many stray thoughts, affording a temporary feeling that a crucial step had been taken forward, a comprehensive knowledge gained, a knowledge that required only further elaboration, explication, and unfolding in order to bring in a bounty of higher understanding. Ultimately, Hartmann's attempt at defining the unconscious proved fruitless because he extended its reach into every realm of organic and inorganic, spiritual, intellectual, and instinctive existence, severely diluting the precision and compromising the impact of the concept.

All of the following statements may be considered valid inferences from the passage, EXCEPT:

A. Unrelated practices began to be treated as related to each other, as knowledge of the mind grew in the nineteenth century.
B. Without the linguistic developments of the nineteenth century, the growth of understanding of the soul and the mind may not have happened.
C. Eighteenth century thinkers were the first to perceive a connection between creative genius and insanity.
D. New conceptions in the nineteenth century could provide new knowledge because of the establishment of fields such as anaesthesiology.

cat2021-set3 verbal-ability passage-reading

## 5.16.626 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 22 top

The passage given below is followed by four alternate summaries. Choose the option that best captures the essence of the passage.

Brazil's growth rate has been low, yet most Brazilians say their financial situation has improved, and they expect it to get even better. This is because most incomes are rising fast, with higher minimum wages and very low unemployment. The result is falling inequality and a growing middle class – the result of economic stabilization, improved social security and universal primary education. But despite recent improvements the Brazilian economy is still painfully unequal, with poor Brazilians paying the biggest share of their income in taxes and getting the least back in government services.

A. Good economic indicators have masked the unfair taxation of the poor that is likely to destabilise the Brazilian economy in the next few years.
B. Economic reforms have benefitted many Brazilians, but they are unaware of the impending problems from rising inequalities in their society.
C. Most Brazilians feel they have benefitted from recent economic events, but the poor continue to be dealt unfairly by the state.
D. With rising incomes and falling unemployment, most Brazilians are being misled into thinking that their economy is doing well.

cat2021-set3 verbal-ability passage-reading

## 5.16.627 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 24 top

The passage given below is followed by four alternate summaries. Choose the option that best captures the essence of the passage.

The human mind is wired to see patterns. Not only does the brain process information as it comes in, it also stores insights from all our past experiences. Every interaction, happy or sad, is catalogued in our memory. Intuition draws from that deep memory well to inform our decisions going forward. In other words, intuitive decisions are based on data, and not contrary to data as many would like to assume. When we subconsciously spot patterns, the body starts firing neurochemicals in both the brain and gut. These "somatic markers" are what give us that instant sense that something is right … or that it's off. Not only are these automatic processes faster than rational thought, but our intuition draws from decades of diverse qualitative experience (sights, sounds, interactions, etc.) – a wholly human feature that big data alone could never accomplish.

A. Intuitions are automatic processes and are therefore faster than rational thought, and so decisions based on them are better.
B. Intuition is infinitely richer than big data which is based on rational thought and accomplishes more than what big data can.

C. Intuition draws from deep memory, and may not be related to data, but to decades of diverse qualitative experience.
D. Intuitions are neuro-chemical firings based on pattern recognition and draw upon a rich and vast database of experiences.

Ultimately, Hartmann's attempt at defining the unconscious proved fruitless because he extended its reach into every realm of organic and inorganic, spiritual, intellectual, and instinctive existence, severely diluting the precision and compromising the impact of the concept.

"The enrichments of literary and intellectual language led to an altered understanding of the meanings that underlie time-honored expressions and traditional catchwords." Which one of the following interpretations of this sentence would be closest in meaning to the original?

A. The meanings of time-honored expressions were changed by innovations in literary and intellectual language.
B. All of the options listed here.
C. Literary and intellectual language was altered by time-honored expressions and traditional catchwords.
D. Time-honored expressions and traditional catchwords were enriched by literary and intellectual language.

cat2021-set3 verbal-ability passage-reading

## 5.16.629 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 4 top

Today we can hardly conceive of ourselves without an unconscious. Yet between 1700 and 1900, this notion developed as a genuinely original thought. The "unconscious" burst the shell of conventional language, coined as it had been to embody the fleeting ideas and the shifting conceptions of several generations until, finally, it became fixed and defined in specialized terms within the realm of medical psychology and Freudian psychoanalysis.

The vocabulary concerning the soul and the mind increased enormously in the course of the nineteenth century. The enrichments of literary and intellectual language led to an altered understanding of the meanings that underlie time-honored expressions and traditional catchwords. At the same time, once coined, powerful new ideas attracted to themselves a whole host of seemingly unrelated issues, practices, and experiences, creating a peculiar network of preoccupations that as a group had not existed before. The drawn-out attempt to approach and define the unconscious brought together the spiritualist and the psychical researcher of borderline phenomena (such as apparitions, spectral illusions, haunted houses, mediums, trance, automatic writing); the psychiatrist or alienist probing the nature of mental disease, of abnormal ideation, hallucination, delirium, melancholia, mania; the surgeon performing operations with the aid of hypnotism; the magnetizer claiming to correct

the disequilibrium in the universal flow of magnetic fluids but who soon came to be regarded as a clever manipulator of the imagination; the physiologist and the physician who puzzled over sleep, dreams, sleepwalking, anesthesia, the influence of the mind on the body in health and disease; the neurologist concerned with the functions of the brain and the physiological basis of mental life; the philosopher interested in the will, the emotions, consciousness, knowledge, imagination and the creative genius; and, last but not least, the psychologist.

Significantly, most if not all of these practices (for example, hypnotism in surgery or psychological magnetism) originated in the waning years of the eighteenth century and during the early decades of the nineteenth century, as did some of the disciplines (such as psychology and psychical research). The majority of topics too were either new or assumed hitherto unknown colors. Thus, before 1790, few if any spoke, in medical terms, of the affinity between creative genius and the hallucinations of the insane …

Striving vaguely and independently to give expression to a latent conception, various lines of thought can be brought together by some novel term. The new concept then serves as a kind of resting place or stocktaking in the development of ideas, giving satisfaction and a stimulus for further discussion or speculation. Thus, the massive introduction of the term unconscious by Hartmann in 1869 appeared to focalize many stray thoughts, affording a temporary feeling that a crucial step had been taken forward, a comprehensive knowledge gained, a knowledge that required only further elaboration, explication, and unfolding in order to bring in a bounty of higher understanding. Ultimately, Hartmann's attempt at defining the unconscious proved fruitless because he extended its reach into every realm of organic and inorganic, spiritual, intellectual, and instinctive existence, severely diluting the precision and compromising the impact of the concept.

Which one of the following statements best describes what the passage is about?

A. The discovery of the unconscious as a part of the human mind.
B. The identification of the unconscious as an object of psychical research.
C. The growing vocabulary of the soul and the mind, as diverse processes.
D. The collating of diverse ideas under the single term: unconscious.

cat2021-set3 verbal-ability passage-reading

## 5.16.630 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 5 top

Keeping time accurately comes with a price. The maximum accuracy of a clock is directly related to how much disorder, or entropy, it creates every time it ticks. Natalia Area at the University of Oxford and her colleagues made this discovery using a tiny clock with an accuracy that can be controlled. The clock consists of a 50-nanometre-thick membrane of silicon nitride, vibrated by an electric current. Each time the membrane moved up and down once and then returned to its original position, the researchers counted a tick, and the regularity of the spacing between the ticks represented the accuracy of the clock. The researchers found that as they increased the clock's accuracy, the heat produced in the system grew, increasing the entropy of its surroundings by jostling nearby particles … "If a clock is more accurate, you are paying for it somehow," says Ares. In this case, you pay for it by pouring more ordered energy into the clock, which is then converted into entropy. "By measuring time, we are increasing the entropy of the universe," says Ares. The more entropy there is in the universe, the closer it may be to its eventual demise. "Maybe we should stop measuring time," says Ares. The scale of the additional entropy is so small, though, that there is no need to worry about its effects, she says.

The increase in entropy in timekeeping may be related to the "arrow of time", says Marcus Huber at the Austrian Academy of Sciences in Vienna, who was part of the research team. It has been suggested that the reason that time only flows forward, not in reverse, is that the total amount of entropy in the universe is constantly increasing, creating disorder that cannot be put in order again.

The relationship that the researchers found is a limit on the accuracy of a clock, so it doesn't mean that a clock that creates the most possible entropy would be maximally accurate – hence a large, inefficient grandfather clock isn't more precise than an atomic clock. "It's a bit like fuel use in a car. Just because I'm using more fuel doesn't mean that I'm going faster or further," says Huber.

When the researchers compared their results with theoretical models developed for clocks that rely on quantum effects, they were surprised to find that the relationship between accuracy and entropy seemed to be the same for both … We can't be sure yet that these results are actually universal, though, because there are many types of clocks for which the relationship between accuracy and entropy haven't been tested. "It's still unclear how this principle plays out in real devices such as atomic clocks, which push the ultimate quantum limits of accuracy," says Mark Mitchison at Trinity College Dublin in Ireland. Understanding this relationship could be helpful for designing clocks in the future, particularly those used in quantum computers and other devices where both accuracy and temperature are crucial, says Ares. This finding could also help us understand more generally how the quantum world and the classical world are similar and different in terms of thermodynamics and the passage of time.

Which one of the following sets of words and phrases serves best as keywords of the passage?

A. Electric current; Heat; Quantum effects.
B. Silicon Nitride; Energy; Grandfather Clock.
C. Measuring Time; Accuracy; Entropy.
D. Membrane; Arrow of time; Entropy.

cat2021-set3 verbal-ability passage-reading

## 5.16.631 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 6 top

Keeping time accurately comes with a price. The maximum accuracy of a clock is directly related to how much disorder, or entropy, it creates every time it ticks. Natalia Area at the University of Oxford and her colleagues made this discovery using a tiny clock with an accuracy that can be controlled. The clock consists of a 50-nanometre-thick membrane of silicon nitride, vibrated by an electric current. Each time the membrane moved up and down once and then returned to its original position, the researchers counted a tick, and the regularity of the spacing between the ticks represented the accuracy of the clock. The researchers found that as they increased the clock's accuracy, the heat produced in the system grew, increasing the entropy of its surroundings by jostling nearby particles … "If a clock is more accurate, you are paying for it somehow," says Ares. In this case, you pay for it by pouring more ordered energy into the clock, which is then converted into entropy. "By measuring time, we are increasing the entropy of the universe," says Ares. The more entropy there is in the universe, the closer it may be to its eventual demise. "Maybe we should stop measuring time," says Ares. The scale of the additional entropy is so small, though, that there is no need to worry about its effects, she says.

The increase in entropy in timekeeping may be related to the "arrow of time", says Marcus Huber at the Austrian Academy of Sciences in Vienna, who was part of the research team. It has been suggested that the reason that time only flows forward, not in reverse, is that the total amount of entropy in the universe is constantly increasing, creating disorder that cannot be put in order again.

The relationship that the researchers found is a limit on the accuracy of a clock, so it doesn't mean that a clock that creates the most possible entropy would be maximally accurate – hence a large, inefficient grandfather clock isn't more precise than an atomic clock. "It's a bit like fuel use in a car. Just because I'm using more fuel doesn't mean that I'm going faster or further," says Huber.

When the researchers compared their results with theoretical models developed for clocks that rely on quantum effects, they were surprised to find that the relationship between accuracy and entropy seemed to be the same for both … We can't be sure yet that these results are actually universal, though, because there are many types of clocks for which the relationship between accuracy and entropy haven't been tested. "It's still unclear how this principle plays out in real devices such as atomic clocks, which push the ultimate quantum limits of accuracy," says Mark Mitchison at Trinity College Dublin in Ireland. Understanding this relationship could be helpful for designing clocks in the future, particularly those used in quantum computers and other devices where both accuracy and temperature are crucial, says Ares. This finding could also help us understand more generally how the quantum world and the classical world are similar and different in terms of thermodynamics and the passage of time.

The author makes all of the following arguments in the passage, EXCEPT that:

A. The relationship between accuracy and entropy may not apply to all clocks.
B. Researchers found that the heat produced in a system is the price paid for increased accuracy of measurement.
C. There is no difference in accuracy between an inefficient grandfather clock and an atomic clock.
D. In designing clocks for quantum computers, both precision and heat have to be taken into account.

cat2021-set3 verbal-ability passage-reading

## 5.16.632 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 7 top

Keeping time accurately comes with a price. The maximum accuracy of a clock is directly related to how much disorder, or entropy, it creates every time it ticks. Natalia Area at the University of Oxford and her colleagues made this discovery using a tiny clock with an accuracy that can be controlled. The clock consists of a 50-nanometre-thick membrane of silicon nitride, vibrated by an electric current. Each time the membrane moved up and down once and then returned to its original position, the researchers counted a tick, and the regularity of the spacing between the ticks represented the accuracy of the clock. The researchers found that as they increased the clock's accuracy, the heat produced in the system grew, increasing the entropy of its surroundings by jostling nearby particles … "If a clock is more accurate, you are paying for it somehow," says Ares. In this case, you pay for it by pouring more ordered energy into the clock, which is then converted into entropy. "By measuring time, we are increasing the entropy of the universe," says Ares. The more entropy there is in the universe, the closer it may be to its eventual demise. "Maybe we should stop measuring time," says Ares. The scale of the additional entropy is so small, though, that there is no need to worry about its effects, she says.

The increase in entropy in timekeeping may be related to the "arrow of time", says Marcus Huber at the Austrian Academy of Sciences in Vienna, who was part of the research team. It has been suggested that the reason that time only flows forward, not in reverse, is that the total amount of entropy in the universe is constantly increasing, creating disorder that cannot be put in order again.

The relationship that the researchers found is a limit on the accuracy of a clock, so it doesn't mean that a clock that creates the most possible entropy would be maximally accurate – hence a large, inefficient grandfather clock isn't more precise than an atomic clock. "It's a bit like fuel use in a car. Just because I'm using more fuel doesn't mean that I'm going faster or further," says Huber.

When the researchers compared their results with theoretical models developed for clocks that rely on quantum effects, they were surprised to find that the relationship between accuracy and entropy seemed to be the same for both … We can't be sure yet that these results are actually universal, though, because there are many types of clocks for which the relationship between accuracy and entropy haven't been tested. "It's still unclear how this principle plays out in real devices such as atomic clocks, which push the ultimate quantum limits of accuracy," says Mark Mitchison at Trinity College Dublin in Ireland. Understanding this relationship could be helpful for designing clocks in the future, particularly those used in quantum computers and other devices where both accuracy and temperature are crucial, says Ares. This finding could also help us understand more generally how the quantum world and the classical world are similar and different in terms of thermodynamics and the passage of time.

"It's a bit like fuel use in a car. Just because I'm using more fuel doesn't mean that I'm going faster or further …" What is the purpose of this example?

A. If you go faster in a car, you will tend to consume more fuel, but the converse is not necessarily true. In the same way, increased entropy does not necessarily mean greater accuracy of a clock.
B. The further you go in a car, the more fuel you use. In the same way, the faster you go in a car, the less time you use.
C. If you measure the speed of a car with a grandfather clock, the result will be different than if you measured it with an atomic clock.
D. The further and faster you go in a car, the greater the amount of fuel you will use, the greater the amount of heat produced and, hence, the greater the entropy.

cat2021-set3 verbal-ability passage-reading

## 5.16.633 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 8 top

Keeping time accurately comes with a price. The maximum accuracy of a clock is directly related to how much disorder, or entropy, it creates every time it ticks. Natalia Area at the University of Oxford and her colleagues made this discovery using a tiny clock with an accuracy that can be controlled. The clock consists of a 50-nanometre-thick membrane of silicon nitride, vibrated by an electric current. Each time the membrane moved up and down once and then returned to its original position, the researchers counted a tick, and the regularity of the spacing between the ticks represented the accuracy of the clock. The researchers found that as they increased the clock's accuracy, the heat produced in the system grew, increasing the entropy of its surroundings by jostling nearby particles … "If a clock is more accurate, you are paying for it somehow," says Ares. In this case, you pay for it by pouring more ordered energy into the clock, which is then converted into entropy. "By measuring time, we are increasing the entropy of the universe," says Ares. The more entropy there is in the universe, the closer it may be to its eventual demise. "Maybe we should stop measuring time," says Ares. The scale of the additional entropy is so small, though, that there is no need to worry about its effects, she says.

The increase in entropy in timekeeping may be related to the "arrow of time", says Marcus Huber at the Austrian Academy of Sciences in Vienna, who was part of the research team. It has been suggested that the reason that time only flows forward, not in reverse, is that the total amount of entropy in the universe is constantly increasing, creating disorder that cannot be put in order again.

The relationship that the researchers found is a limit on the accuracy of a clock, so it doesn't mean that a clock that creates the most possible entropy would be maximally accurate – hence a large, inefficient grandfather clock isn't more precise than an atomic clock. "It's a bit like fuel use in a car. Just because I'm using more fuel doesn't mean that I'm going faster or further," says Huber.

When the researchers compared their results with theoretical models developed for clocks that rely on quantum effects, they were surprised to find that the relationship between accuracy and entropy seemed to be the same for both … We can't be sure yet that these results are actually universal, though, because there are many types of clocks for which the relationship between accuracy and entropy haven't been tested. "It's still unclear how this principle plays out in real devices such as atomic clocks, which push the ultimate quantum limits of accuracy," says Mark Mitchison at Trinity College Dublin in Ireland. Understanding this relationship could be helpful for designing clocks in the future, particularly those used in quantum computers and other devices where both accuracy and temperature are crucial, says Ares. This finding could also help us understand more generally how the quantum world and the classical world are similar and different in terms of thermodynamics and the passage of time.

None of the following statements can be inferred from the passage EXCEPT that:

A. the arrow of time has not yet been tested for atomic clocks.
B. quantum computers are likely to produce more heat and, hence, more entropy, because of the emphasis on their clocks' accuracy.
C. grandfather clocks are likely to produce less heat and, hence, less entropy, because they are not as accurate.
D. a clock with a 50-nanometre-thick membrane of silicon nitride has been made to vibrate, producing electric currents.

cat2021-set3 verbal-ability passage-reading

## 5.16.634 Passage Reading: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 9 top

Starting in 1957, [Noam Chomsky] proclaimed a new doctrine: Language, that most human of all attributes, was innate. The grammatical faculty was built into the infant brain, and your average 3-year-old was not a mere apprentice in the great enterprise of absorbing English from his or her parents, but a “linguistic genius.” Since this message was couched in terms of Chomskyan theoretical linguistics, in discourse so opaque that it was nearly incomprehensible even to some scholars, many people did not hear it. Now, in a brilliant, witty and altogether satisfying book, Mr. Chomsky’s colleague Steven Pinker … has brought Mr. Chomsky’s findings to everyman. In “The Language Instinct” he has gathered persuasive data from such diverse fields as cognitive neuroscience, developmental psychology and speech therapy to make his points, and when he disagrees with Mr. Chomsky he tells you so …

For Mr. Chomsky and Mr. Pinker, somewhere in the human brain there is a complex set of neural circuits that have been programmed with “super-rules” (making up what Mr. Chomsky calls "universal grammar”), and that these rules are unconscious and instinctive. A half-century ago, this would have been pooh-poohed as a “black box” theory, since one could not actually pinpoint this grammatical faculty in a specific part of the brain, or describe its functioning. But now things are different. Neurosurgeons [have now found that this] “black box” is situated in and around Broca’s area, on the left side of the forebrain …

Unlike Mr. Chomsky, Mr.Pinker firmly places the wiring of the brain for language within the framework of Darwinian natural selection and evolution. He effectively disposes of all claims that intelligent nonhuman primates like chimps have any abilities to learn and use language. It is not that chimps lack the vocal apparatus to speak; it is just that their brains are unable to produce or use grammar. On the other hand, the “language instinct,” when it first appeared among our most distant hominid ancestors, must have given them a selective reproductive advantage over their competitors (including the ancestral chimps) …

So according to Mr. pinker, the roots of language must be in the genes, but there cannot be a “grammar gene” any more than there can be a gene for the heart or any other complex body structure. This proposition will undoubtedly raise the hackles of some behavioral psychologists and anthropologists, for it apparently contradicts the liberal idea that human behavior may be changed for the better by improvements in culture and environment, and it might seem to invite the twin bugaboos of biological determinism and racism. Yet Mr.Pinker stresses one point that should allay such fears. Even though there are $4,000$ to $6,000$ languages today, they are all sufficiently alike to be considered one language by an extraterrestrial observer. In other words, most of the diversity of the world’s cultures, so beloved to anthropologists, is superficial and minor compared to the similarities. Racial differences are literally only "skin deep.” The fundamental unity of humanity is the theme of Mr. Chomsky's universal grammar, and of this exciting book.

On the basis of the information in the passage, Pinker and Chomsky may disagree with each other on which one of the following points?

A. The possibility of a universal grammar.
B. The language instinct.
C. The inborn language acquisition skills of humans.
D. The Darwinian explanatory paradigm for language.

cat2021-set3 verbal-ability passage-reading

## 5.16.635 Passage Reading: NIELIT 2017 DEC Scientific Assistant A - Section A: 51 top

There is a short passage given below. Read the passage and answer the question that follows it.

It was 1950s when the new genre of rock and roll music started as a young man’s medium. Rock music is still best performed by young men of 20s and 30s. As rock performers step into their 40s, or even 50s, they are less physically capable of producing the kind of exhilarating music they did when they were younger.

All the following assumptions underline the argument above EXCEPT

A. as rock performers mature, their performances tend to become less exciting.
B. rock music is dominated by male performers.
C. women performers have always played significant role in rock music,
D. the physical demands of performing rock are better met by the young.

## 5.16.636 Passage Reading: NIELIT 2017 DEC Scientific Assistant A - Section A: 52 top

There is a short passage given below. Read the passage and answer the question that follows it.

Las Vegas is certainly one of the honeymooner’s heaven among the moderately rich Americans. Why should it not be? Las Vegas has much more to offer than shops and slot machines. However, unfortunately, tourists seldom stray off the beaten track. 2001 Guide is a book that encourages the visitors to do so and discover the living museum that is the Las Vegas city.

Which of the following information about 2001 Guide will weaken the intended impact of the book?

A. The greatest attraction of Las Vegas that sets it apart from other places is its casino.
B. 2001 Guide does not give a detailed account of the geography of the lesser known facts of Las Vegas.
C. An increasing number of young couples are taking to adventures and undiscovered land.
D. Las Vegas has many more visitors than first honeymooners.

### 5.16.637 Passage Reading: NIELIT 2017 DEC Scientific Assistant A - Section A: 53 top

There is a short passages given below. Read the passage and answer the question that follows it.

The famous theory of relativity was given by Albert Einstein. It stated that time travel is theoretically possible. Let us assume that time travel were to be made possible through some technological breakthrough. Would it not be advantageous to send someone back in time to prevent the assassination of Archduke Franz Ferdinand in 1914 and thus keep World War I from ever occurring?

Which of the following assumptions can be deduced from above argument?

A. It is not possible to alter a significant current in world history merely by changing a single event.
B. The technology necessary for time travel is likely to be developed in the near future.
C. If Franz Ferdinand had not been assassinated, some other catalytic event would have led to the start of World War I.
D. The assassination of Franz Ferdinand was the crucial event that triggered the start of World War I.

### 5.16.638 Passage Reading: NIELIT 2017 DEC Scientific Assistant A - Section A: 54 top

There is a short passage given below. Read the passage and answer the question that follows it.

The movie Jurassic Park was a super-hit in the 90s. The movie shows scientists creating live dinosaurs by replicating dinosaur DNA found inside an insect that had bitten a dinosaur centuries back and was then trapped in amber. Though such a feat has not been accomplished in the real world, yet one day modern science will possibly succeed in recreating prehistoric creatures in a similar manner.

All of the following assumptions underline the conclusion of the passage above EXCEPT

A. the genetic information in DNA is sufficient to permit the recreation of an entire animal.
B. it will someday be possible to accurately replicate DNA in a laboratory.
C. enough DNA can be extracted from an insect to recreate an entire animal.
D. scientists will never fully understand how DNA functions.

### 5.16.639 Passage Reading: NIELIT 2017 DEC Scientist B - Section A: 22 top

A significant compassionate outcome of technology is the greater dignity and value that it imparts to human labour. In a highly developed society, there is no essential difference between Brahmin and Shudra, Muslim, Christian or Hindu; they are equally useful and hence equally valuable for in the industrial society individual productivity fixes the size of the pay cheque and this fixes social status.

The passage best supports the statement that :

A. technology decides individual's social status.
B. castes and religions are man-made.
C. human labour has dignity and value.
D. all individuals, irrespective of caste and creed, are born equal.

### 5.16.641 Passage Reading: NIELIT 2017 OCT Scientific Assistant A - Section A: 7 top

Reading is a psycholinguistic guessing game. To read critically is a skill as it is a demanding process. One must slow down one's reading and, with a pencil in hand, perform specific operations on the text. Mark up the text with reactions, conclusions and questions. When one reads, one becomes an active participant.

This paragraph best supports the statement that

A. critical reading is a slow, dull, but essential process
B. the best critical reading happens at critical times in a person's life
C. readers should get in the habit of questioning the truth of what they read
D. critical reading requires thoughtful and careful attention

_____ of different categories of problems often leads to design of improper solutions that fail to address the complexities of the problem.

A. CONFABULATION B. CONFLATION C. CONFLICT D. CONFESSION

cat2010 verbal-ability sentence-formation fill-the-blank

### 5.20.31 Sentence Formation: CAT 2010 | Question: 37 top

I. But she gained courage as she went on
II. She was a little nervous about it just at first
III. and opened their eyes and mouths so very wide
IV. the two creatures got so close to her, one on each side

A. IV, III, II, I
B. II, IV,III, I
C. II, I, IV, III
D. None of the above

cat2010 verbal-ability sentence-formation

### 5.20.32 Sentence Formation: CAT 2010 | Question: 38 top

I. It would perhaps be possible for him to be of some use to this brave girl
II. he said to himself, vaguely at first, that
III. without neglecting anything of what was due to his important mission.
IV. and this idea pleased him

A. II, III, I, IV
B. III, II, I, IV
C. I, III, II, IV
D. None of the above

cat2010 verbal-ability sentence-formation

### 5.20.33 Sentence Formation: CAT 2013 | Question: 60 top

The following question presents four statements, of which three, when places in appropriate order, would form a contextually complete paragraph. Pick the statement that is not part of the context.

A. The trade in iron ore make it the second-largest commodity market by value after crude oil.
B. The metal provides the backbone of skyscrapers, bridges and motorways, and the carapace and internal organs of cars, fridges and washing machines.
C. Given steel's ubiquity – it makes up 95% of global metal production – iron ore, the raw material from which it is made, attracts strangely little attention.
D. The development of a process to turn raw earth into steel merits a high spot on a list of mankind's most ingenious achievements.

cat2013 verbal-ability sentence-formation

### 5.20.34 Sentence Formation: CAT 2014 | Question: 32 top

All of the following sentences A, B, C and D are taken from a same passage and jumbled up. but one of them is incoherent. Find the incoherent statement. Sachin did not ask for this honour.

A. There are consolation prizes which console, and some which char the soul.

B. I am not suggesting we write a condolence letter, but sympathy is certainly due to Sachin.

C. Membership of Parliament is a handsome freebie for Sachin Tendulkar

D. Nomination to the Rajya Sabha is a pretty desultory substitute for someone who has been promised the Bharat Ratna. Delhi‘s politicians, ever eager to climb a bandwagon, led the clamour for Sachin‘s elevation to jewel of India after he got his 99th international hundred. Incoherent statement is:

a. A. b. B. c. C. d. D.

cat2014 verbal-ability sentence-formation

### 5.20.35 Sentence Formation: CAT 2014 | Question: 35 top

It is the powerful compound capsaicin that makes a chili pepper hot; a single drop that has no taste and odor is capable of detection by humans at one part per million.

a. A single drop that has no taste and odor is capable of detection
b. A single drop is detectable, though without taste and odor
c. A single tasteless and odorless drop can be detected
d. Single tasteless and odorless drops are capable of detection

cat2014 verbal-ability sentence-formation

### 5.20.36 Sentence Formation: CAT 2014 | Question: 37 top

Arrange the sentences A, B, C and D in a proper sequence so as to make a coherent paragraph.

A. After several routine elections there comes a 'critical' election which redefines the basic pattern of political loyalties, redraws political geography and opens up political space.

B. In psephological jargon, they call it realignment.

C. Rather, since 1989, there have been a series of semi-critical elections.

D. On a strict definition, none of the recent Indian elections qualifies as a critical election.

a. ABCD b. ABDC c. DBAC d. DCBA

cat2014 verbal-ability sentence-formation

### 5.20.37 Sentence Formation: CAT 2014 | Question: 38 top

Arrange the sentences A, B, C and D in a proper sequence so as to make a coherent paragraph.

A. Trivial pursuits marketed by the Congress, is a game imported from Italy.

B. The idea is to create an imaginary saviour in times of crisis so that the party doesn't fall flat on its collective face.

C. Closest contenders are Mani Shankar Aiyar, who still hears His Master's Voice and *V*. George, who is frustrated by the fact that his political future remains Sonia and yet so far.

D. The current champion is Arjun for whom all roads lead to Rome, or in this case, 10 Janpath.

a. ABDC b. ABCD c. DCBA d. CDBA

cat2014 verbal-ability sentence-formation

## 5.21 Sentence Rearrangement (117) top

### 5.21.1 Sentence Rearrangement: CAT 2000 | Question: 41 top

**Sentences given in each question, when properly sequenced, form a coherent paragraph. The first and last sentences are 1 and 6, and the four in between are labelled A,B,C and D. Choose the most logical order of these four sentences from among the four given choices to construct a coherent paragraph from sentences 1 to 6.**

1. Security inks exploit the same principle that causes the vivid and constantly changing colours of a film of oil on water.

A. When two rays of light meet each other after being reflected from these different surfaces, they have each travelled slightly different distances.

B. The key is that the light is bouncing off two surfaces, that of the oil and that of the water layer below it.

C. The distance the two rays travel determines which wavelengths, and hence colours, interfere constructively and look bright.

D. Because light is an electromagnetic wave, the peaks and troughs of each ray then interfere either constructively, to appear bright, or destructively, to appear dim.

6. Since the distance the rays travel changes with the angle as you look at the surface, different colours look bright from different viewing angles.

A. ABCD B. BADC C. BDAC D. DCAB

cat2000 verbal-ability sentence-rearrangement

### 5.21.2 Sentence Rearrangement: CAT 2000 | Question: 42 top

**Sentences given in each question, when properly sequenced, form a coherent paragraph. The first and last sentences are 1 and 6, and the four in between are labelled A,B,C and D. Choose the most logical order of these four sentences from among the four given choices to construct a coherent paragraph from sentences 1 to 6.**

1. Commercially reared chicken can be unusually aggressive, and are often kept in darkened sheds to prevent them pecking at each other.

A. The birds spent far more of their time-up to a third-pecking at the inanimate objects in the pens, in contrast to birds in other pens which spent a lot of time attacking others.

B. In low light conditions, they behave less belligerently, but are more prone to ophthalmic disorders and respiratory problems.

C. In an experiment, aggressive head-pecking was all but eliminated among birds in the enriched environment.

D. Altering the birds' environment, by adding bales of wood-shavings to their pens, can work wonders.

6. Bales could diminish aggressiveness and reduce injuries; they might even improve productivity, since a happy chicken is a productive chicken.

A. DCAB B. CDBA C. DBAC D. BDCA

cat2000 verbal-ability sentence-rearrangement

### 5.21.3 Sentence Rearrangement: CAT 2000 | Question: 43 top

**Sentences given in each question, when properly sequenced, form a coherent paragraph. The first and last sentences are 1 and 6, and the four in between are labelled A,B,C and D. Choose the most logical order of these four sentences from among the four given choices to construct a coherent paragraph from sentences 1 to 6.**

1. The concept of a 'nation-state' assumes a complete correspondence between the boundaries of the nation and the boundaries of those who live in a specific state.

A. Then there are members of national collectivities who live in other countries, making a mockery of the concept.

B. There are always people living in particular states who are not considered to be (and often do not consider themselves to be) members of the hegemonic nation.

C. Even worse, there are nations which never had a state or which are divided across several states.

D. This, of course, has been subject to severe criticism and is virtually everywhere a fiction.

6. However, the fiction has been, and continues to be, at the basis of nationalist ideologies.

A. DBAC B. ABCD C. BACD D. DACB

cat2000 verbal-ability sentence-rearrangement

### 5.21.4 Sentence Rearrangement: CAT 2000 | Question: 44 top

**Sentences given in each question, when properly sequenced, form a coherent paragraph. The first and last sentences are 1 and 6, and the four in between are labelled A,B,C and D. Choose the most logical order of these four sentences from among the four given choices to construct a coherent paragraph from sentences 1 to 6.**

1. In the sciences, even questionable examples of research fraud are harshly punished.

A. But no such mechanism exists in the humanities-much of what humanities researchers call, research does not lead to results that are replicable by other scholars.

B. Given the importance of interpretation in historical and literary scholarship, humanities researchers are in a position where they can explain away deliberate and even systematic distortion.

C. Mere suspicion is enough for funding to be cut off; publicity guarantees that careers can be effectively ended.

D. Forgeries which take the form of pastiches in which the forger intersperses fake and real parts can be defended as mere mistakes or aberrant misreading.

6. Scientists fudging data have no such defences.

A. BDCA B. ABDC C. CADB D. CDBA

cat2000 verbal-ability sentence-rearrangement

### 5.21.5 Sentence Rearrangement: CAT 2000 | Question: 45 top

### 5.21.54 Sentence Rearrangement: CAT 2014 | Question: 7, 8, 9 top

Hidden Island is an obscure island which is inhabited by two types of people: the 'Yes' type and the 'No' type. Native of type 'Yes' ask only questions the right answer to which is 'Yes' while those of type 'No' ask only questions the right answer to which is 'No'. For example. The 'Yes' type will ask questions like "Is 2 plus 2 equal to 4?" while the 'No' type will ask questions like "Is 2 plus 2 equal to five?" The following questions are based on your visit to the Hidden Island.

If an islander asks, "Do I belong to the 'No' type", which of the following is correct?

a. He is a 'No'. b. He is a 'Yes'. c. It is impossible for him to

Aman and Mohan are brothers from the Island.

Mohan asks you, "Is at least one of us brothers of type 'No"? You can conclude that

a. Aman is 'NO', Mohan is 'Yes'. b. Both are 'Yes'. c. Aman is 'Yes', Mohan is 'No'. d. Both are 'No'.

Arrange sentences A, B, C and D between sentences 1 and 6 to form a logical sequence of six sentences.

1. Good literary magazines have always been good because of their editors.

A. Furthermore, to edit by committee, as it were, would prevent any magazine from finding its own identity.

B. The more quirky and idiosyncratic they have been, the better the magazine is, at least as a general rule.

C. But the number of editors one can have for a magazine should also be determined by the number of contributions to it.

D. To have four editors for an issue that contains only seven contributions, it is a bit silly to start with.

6. However, in spite of this anomaly, the magazine does acquire merit in its attempt to give a comprehensive view of the Indian literary scene as it is today.

a. ABCD b. BCDA c. ABDC d. CBAD

cat2014 verbal-ability sentence-rearrangement

## 5.21.55 Sentence Rearrangement: CAT 2014 | Question: 1, 2, 3, 4, 5, 6 top

Answer the questions below on the basis of the following passage. More selective than most chemical pesticides in that they ordinarily destroy only unwanted species, biocontrol. agents (such as insects, fungi, and viruses) eat, infect, or parasitize targeted plant or animal pests. However, biocontrol agents can negatively affect nontarget species by, for example, competing with them for resources: a biocontrol agent might reduce the benefits conferred by a desirable animal species by consuming a plant on which the animal prefers to lay its eggs. Another example of indirect negative consequcnces occurred in England when a virus introduced to control rabbits reduced the amount of open ground (because large rabbit populations reduce the ground cover), in turn reducing underground ant nests and triggering the extinction of a blue butterfly that had depended on the nests to shelter its offspring. The paucity of known extinctions or disruptions resulting from indirect interactions may reflect not the infrequency of such mishaps but rather the failure to look for or to detect them: most organisms likely to be adversely affected by indirect interactions are of little or no known commercial value and the events linking a biocontrol agent with an adverse effect are often unclear. Moreover, determining the potential risks of biocontrol agents before they are used is difficult, especially when a nonnative agent is introduced, because, unlike a chemical pesticide, a biocontrol agent may adapt in unpredictable ways. so that it can feed on or otherwise harm new hosts.

The passage is primarily concerned with

a. Explaining why until rec[illegible]

The passage suggests that the author would be most likely to agree with which of the following statements about the use of biocontrol agents?

a. Biocontrol agent should be[illegible]

Which of the following is mentioned in the passage as an indirect effect of using a biocontrol agent?

a. Reduction of the commer[illegible]

The example presented by the author in highlight text most clearly serves to illustrate

a. A situation in which a spe[illegible]

Arrange sentences A, B, C and D between sentences 1 and 6 to form a logical sequence of six sentences.

1. Buddhism is a way to salvation.

A. But Buddhism is more severely analytical.

B. In the Christian tradition there is also a concern for the fate of human society conceived as a whole, rather than merely as a sum or network of individuals.

C. Salvation is a property, or achievement of individuals.

D. Not only does it dissolve society into individuals, the individual in turn is dissolved into component parts and instants, a stream of events.

6. In modern terminology, Buddhist doctrine is reductionist.

a. ABDC b. CBAD c. BDAC d. ABCD

Arrange sentences A, B, C and D between sentences 1 and 6 to form a logical sequence of six sentences.

1. The problem of improving Indian agriculture is both a sociological and an administrative one.

A. It also appears that there is a direct relationship between the size of a state and development.

B. The issues of Indian development, and the problem of India's agricultural sector, will remain with us long into the next century.

C. Without improving Indian agriculture, no liberalisation and delicensing will be able to help India.

### 5.21.71 Sentence Rearrangement: CAT 2017 Set-2 | Question: 28 top

Rearrange the following sentences to form a coherent paragraph.

1. The implications of retelling of Indian stories, hence, takes on new meaning in a modern India.
2. The stories we tell reflect the world around us.
3. We cannot help but retell the stories that we value – after all, they are never quite right for us – in our time.
4. And even if we manage to get them quite right, they are only right for us – other people living around us will have different reasons for telling similar stories.
5. As soon as we capture a story, the world we were trying to capture has changed.

A. 25341 B. 12435 C. 23145 D. 31425

cat2017-2 verbal-ability sentence-rearrangement

### 5.21.72 Sentence Rearrangement: CAT 2017 Set-2 | Question: 29 top

Rearrange the following sentences to form a coherent paragraph.

1. Before plants can take life from atmosphere, nitrogen must undergo transformations similar to ones that food undergoes in our digestive machinery.
2. In its aerial form nitrogen is insoluble, unusable and is in need of transformation.
3. Lightning starts the series of chemical reactions that need to happen to nitrogen, ultimately helping it nourish our earth.
4. Nitrogen- an essential food for plants – is an abundant resource, with about 22 million tons of it floating over each square mile of earth.
5. One of the most dramatic examples in nature of ill wind that blows goodness is lightning.

A. 34215 B. 53421 C. 32415 D. 23154

cat2017-2 verbal-ability sentence-rearrangement

### 5.21.73 Sentence Rearrangement: CAT 2017 Set-2 | Question: 30 top

Rearrange the following sentences to form a coherent paragraph.

1. This has huge implications for the health care system as it operates today, where depleted resources and time lead to patients rotating in and out of doctor's offices, oftentimes receiving minimal care or concern (what is commonly referred to as "bed side manner") from doctors.
2. The placebo effect is when an individual's medical condition or pain shows signs of improvement based on a fake intervention that has been presented to them as a real one and used to be regularly dismissed by researchers as a psychological effect.
3. The placebo effect is not solely based on believing in treatment, however, as the clinical setting in which treatments are administered is also paramount.
4. That the mind has the power to trigger biochemical changes because the individual believes that a given drug or intervention will be effective could empower chronic patients through the notion of our bodies capacity for self-healing.
5. Placebo effects are now studied not just as foils for"real interventions but as a potential portal into the self-healing powers of the body.

A. 25431 B. 32415 C. 42351 D. 54231

### 5.21.74 Sentence Rearrangement: CAT 2017 Set-2 | Question: 31 top

Rearrange the following sentences to form a coherent paragraph.

1. Johnson treated English very practically, as a living language, with many different shades of meaning and adopted his definitions on the principle of English common law- according to precedent.
2. Masking a profound inner torment, Johnson found solace in compiling the words of a language that was, in its coarse complexity and comprehensive genius, the precise analogue of his character.
3. Samuel Johnson was a pioneer who raised common sense to heights of genius, and a man of robust popular instincts whose watchwords were clarity, precision and simplicity.
4. The 18th century English reader, in the new world of global trade and global warfare, needed a dictionary with authoritative acts of definition of words of a language that was becoming seeded throughout the first British empire by vigorous and practical champion.
5. The Johnson who challenged Bishop Berkeley's solipsist theory of the nonexistence of matter by kicking a large stone ("I refute it thus") is the same Johnson for whom language must have a daily practical use.

A. 43512 B. 32145 C. 23145 D. 54231

### 5.21.80 Sentence Rearrangement: CAT 2018 Set-2 | Question: 26 top

The four sentences (labelled 1, 2, 3, and 4) given in this question, when properly sequenced, form a coherent paragraph. Decide on the proper order for the sentences and key in this sequence of four numbers as your answer.

1. It was his taxpayers who had to shell out as much as $1.6bn over 10 years to employees of failed companies.
2. Companies in many countries routinely engage in such activities which means that the employees are left with unpaid entitlements
3. Deliberate and systematic liquidation of a company to avoid liabilities and then restarting the business is called phoenixing.
4. The Australian Minister for Revenue and Services discovered in an audit that phoenixing had cost the Australian economy between $2.9bn and $5.1bn last year.

A. 3421 B. 4321 C. 2341 D. 4321

cat2018-2 verbal-ability sentence-rearrangement

### 5.21.81 Sentence Rearrangement: CAT 2018 Set-2 | Question: 28 top

The four sentences (labelled 1, 2, 3, 4) given in this question, when properly sequenced, form a coherent paragraph. Each sentence is labelled with a number. Decide on the proper sequence of order of the sentences and key in this sequence of four numbers as your answer:

1. They would rather do virtuous side projects assiduously as long as these would not compel them into doing their day jobs more honourably or reduce the profit margins.
2. They would fund a million of the buzzwordy programs rather than fundamentally question the rules of their game or alter their own behavior to reduce the harm of the existing distorted, inefficient and unfair rules.
3. Like the dieter who would rather do anything to lose weight than actually eat less, the business elite would save the world through social-impact-investing and philanthro-capitalism.
4. Doing the right thing-and moving away from their win-win mentality would involve real sacrifice; instead, it's easier to focus on their pet projects and initiatives.

A. 3214 B. 1324 C. 4321 D. 3124

cat2018-2 verbal-ability sentence-rearrangement

### 5.21.82 Sentence Rearrangement: CAT 2018 Set-2 | Question: 30 top

The four sentences (labelled 1, 2, 3, and 4) given in this question, when properly sequenced, form a coherent paragraph. Decide on the proper order for the sentences and key in this sequence of four numbers as your answer.

1. Self-management is thus defined as the 'individual's ability to manage the symptoms, treatment, physical and psychosocial

consequences and lifestyle changes inherent in living with a chronic condition
2. Most people with progressive diseases like dementia prefer to have control over their own lives and health-care for as long as possible
3. Having control means, among other things, that patients themselves perform self-management activities
4. Supporting people in decisions and actions that promote self-management is called self-management support requiring a cooperative relationship between the patient, the family, and the professionals

A. 2314 B. 3214 C. 1234 D. 3124

cat2018-2 verbal-ability sentence-rearrangement

### 5.21.83 Sentence Rearrangement: CAT 2018 Set-2 | Question: 32 top

The four sentences (labelled 1, 2, 3, and 4) given in this question, when properly sequenced, form a coherent paragraph. Each sentence is labelled with a number. Decide on the proper sequence of order of the sentences and key in this sequence of four numbers as your answer.

1. In the era of smart world, however, 'Universal Basic Income' is an ineffective instrument which cannot address the potential breakdown of the social contract when large swathes of the population would effectively be unemployed
2. In the era of industrial revolution, the abolition of child labour, poor laws and the growth of trade unions helped families cope with the pressures of mechanised work
3. Growing inequality could be matched by a creeping authoritarianism that is bolstered by technology that is increasingly able to peer into the deepest vestiges of our lives
4. New institutions emerge which recognise ways in which workers could contribute to and benefit by economic growth when, rather than if, their jobs are automated

cat2018-2 verbal-ability sentence-rearrangement numerical-answer

### 5.21.84 Sentence Rearrangement: CAT 2019 Set-2 | Question: 25 top

The four sentences (labelled 1, 2, 3, 4) given below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequence of the order of the sentences and key in the sequence of the four numbers as your answer.

1. To the uninitiated listener, atonal music can sound like chaotic, random noise
2. Atonality is a condition of music in which the constructs of the music do not 'live' within the confines of a particular key signature, scale, or mode
3. After you realize the amount of knowledge, skill, and technical expertise required to compose or perform it, your tune may change, so to speak
4. However, atonality is one of the most important movements in 20th century music

## 5.21.94 Sentence Rearrangement: CAT 2020 Set-2 | Question: 26 top

The four sentences (labelled 1, 2, 3, 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer:

1. But the attention of the layman, not surprisingly, has been captured by the atom bomb, although there is at least a chance that it may never be used again.
2. Of all the changes introduced by man into the household of nature, [controlled] large-scale nuclear fission is undoubtedly the most dangerous and most profound.
3. The danger to humanity created by the so-called peaceful uses of atomic energy may, however, be much greater.

4. The resultant ionizing radiation has become the most serious agent of pollution of the environment and the greatest threat to man's survival on earth.

cat2020-set2 verbal-ability sentence-rearrangement numerical-answer

## 5.21.95 Sentence Rearrangement: CAT 2020 Set-3 | Question: 19 top

Although one of the most contested concepts in political philosophy, human nature is something on which most people seem to agree. By and large, according to Rutger Bregman in his new book Humankind, we have a rather pessimistic view – not of ourselves exactly, but of everyone else. We see other people as selfish, untrustworthy and dangerous and therefore we behave towards them with defensiveness and suspicion. This was how the 17th– century philosopher Thomas Hobbes conceived our natural state to be, believing that all that stood between us and violent anarchy was a strong state and firm leadership.

But in following Hobbes, argues Bregman, we ensure that the negative view we have of human nature is reflected back at us. He instead puts his faith in Jean – Jacques Rousseau, the 18th– century French thinker, who famously declared that man was born free and it was civilisation – with its coercive powers, social classes and restrictive laws – that put him in chains.

Hobbes and Rousseau are seen as the two poles of the human nature argument and it's no surprise that Bregman strongly sides with the Frenchman. He takes Rousseau's intuition and paints a picture of a prelapsarian idyll in which, for the better part of 300, 000 years, Homo sapiens lived a fulfilling life in harmony with nature … Then we discovered agriculture and for the next 10, 000 years it was all property, war, greed and injustice …

It was abandoning our nomadic lifestyle and then domesticating animals, says Bregman, that brought about infectious diseases such as measles, smallpox, tuberculosis, syphilis, malaria, cholera and plague. This may be true, but what Bregman never really seems to get to grips with is that pathogens were not the only things that grew with agriculture – so did the number of humans. It's one thing to maintain friendly relations and a property-less mode of living when you're 30 or 40 hunter-gatherers following the food. But life becomes a great deal more complex and knowledge far more extensive when there are settlements of many thousands.

"Civilisation has become synonymous with peace and progress and wilderness with war and decline," writes Bregman. "In reality, for most of human existence, it was the other way around." Whereas traditional history depicts the collapse of civilisations as "dark ages" in which everything gets worse, modern scholars, he claims, see them more as a reprieve, in which the enslaved gain their freedom and culture flourishes. Like much else in this book, the truth is probably somewhere between the two stated positions.

In any case, the fear of civilisational collapse, Bregman believes, is unfounded. It's the result of what the Dutch biologist Frans de Waal calls "veneer theory" – the idea that just below the surface, our bestial nature is waiting to break out… There's a great deal of reassuring human decency to be taken from this bold and though-provoking book and a wealth of evidence in support of the contention that the sense of who we are as a species has been deleteriously distorted. But it seems equally misleading to offer the false choice of Rousseau and Hobbes when, clearly, humanity encompasses both.

The four sentences (labelled 1, 2, 3, 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer:

1. Each one personified a different aspect of good fortune.
2. The others were versions of popular Buddhist gods, Hindu gods and Daoist gods.
3. Seven popular Japanese deities, the Shichi Fukujin, were considered to bring good luck and happiness.
4. Although they were included in the Shinto pantheon, only two of them, Daikoku and Ebisu, were indigenous Japanese gods.

cat2020-set3 verbal-ability passage-reading sentence-rearrangement numerical-answer

## 5.21.96 Sentence Rearrangement: CAT 2020 Set-3 | Question: 22 top

The four sentences (labelled 1, 2, 3, 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer:

1. It advocated a conservative approach to antitrust enforcement that espouses faith in efficient markets and voiced suspicion regarding the merits of judicial intervention to correct anticompetitive practices.
2. Many industries have consistently gained market share, the lion's share – without any official concern; the most successful technology companies have grown into veritable titans, on the premise that they advance 'public interest'.
3. That the new anticompetitive risks posed by tech giants like Google, Facebook, and Amazon, necessitate new legal solutions could be attributed to the dearth of enforcement actions against monopolies and the few cases challenging mergers in the USA.
4. The criterion of 'consumer welfare standard' and the principle that antitrust law should serve consumer interests and that it should protect competition rather than individual competitors was an antitrust law introduced by, and named after, the 'Chicago school'.

cat2020-set3 verbal-ability sentence-rearrangement numerical-answer

### 5.21.97 Sentence Rearrangement: CAT 2020 Set-3 | Question: 24 top

The four sentences (labelled 1, 2, 3, 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer:

1. Complex computational of the CNS are organized according to a "nested" hierarchic criterion; the organization is not permanent and can change dynamically from moment to moment as they carry out a computational task.
2. Echolocation in bats exemplifies adaptation produced by natural selection; a function not produced by natural selection for its current use is exaptation --feathers might have originally arisen in the context of selection for insulation.
3. From a structural standpoint, consistent with exaptation, the living organism is organized as a complex of "Russian Matryoshka Dolls" – smaller structures are contained within larger ones in multiple layers.
4. The exaptation concept, and the Russian-doll organization concept of living beings deduced from studies on evolution of the various apparatuses in mammals, can be applied for the most complex human organ: the central nervous system (CNS).

cat2020-set3 verbal-ability sentence-rearrangement numerical-answer

### 5.21.98 Sentence Rearrangement: CAT 2021 Set-1 | Verbal Ability and Reading Comprehension | Question: 18 top

The four sentences (labelled 1, 2, 3, 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer:

1. In the central nervous systems of other animal species, such a comprehensive regeneration of neurons has not yet been proven beyond doubt.
2. Biologists from the University of Bayreuth have discovered a uniquely rapid form of regeneration in injured neurons and their function in the central nervous system of zebrafish.
3. They studied the Mauthner cells, which are solely responsible for the escape behaviour of the fish, and previously regarded as incapable of regeneration.
4. However, their ability to regenerate crucially depends on the location of the injury.

### 5.21.99 Sentence Rearrangement: CAT 2021 Set-1 | Verbal Ability and Reading Comprehension | Question: 19 top

The four sentences (labelled 1, 2, 3, 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer:

1. A popular response is the exhortation to plant more trees.
2. It seems all but certain that global warming will go well above two degrees – quite how high no one knows yet.
3. Burning them releases it, which is why the scale of forest fires in the Amazon basin last year garnered headlines.
4. This is because trees sequester carbon by absorbing carbon dioxide.

cat2021-set1 verbal-ability sentence-rearrangement numerical-answer

### 5.21.100 Sentence Rearrangement: CAT 2021 Set-1 | Verbal Ability and Reading Comprehension | Question: 22 top

The four sentences (labelled 1, 2, 3, 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer:

1. The work is more than the text, for the text only takes on life, when it is realized and furthermore the realization is by no means independent of the individual disposition of the reader.
2. The convergence of text and reader brings the literary work into existence and this convergence is not to be identified either with the reality of the text or with the individual disposition of the reader.
3. From this polarity it follows that the literary work cannot be completely identical with the text, or with the realization of the text, but in fact must lie halfway between the two.
4. The literary work has two poles, which we might call the artistic and the aesthetic; the artistic refers to the text created by the author, and the aesthetic to the realization accomplished by the reader.

cat2021-set1 verbal-ability sentence-rearrangement numerical-answer

### 5.21.101 Sentence Rearrangement: CAT 2021 Set-2 | Verbal Ability and Reading Comprehension | Question: 17 top

The four sentences (labelled 1, 2, 3 and 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer:

1. Look forward a few decades to an invention which can end the energy crisis, change the global economy and curb climate change at a stroke: commercial fusion power.
2. To gain meaningful insights, logic has to be accompanied by asking probing questions of nature through controlled tests, precise observations and clever analysis.
3. The greatest of all inventions is the uber-invention that has provided the insights on which others depend: the modern scientific method.
4. This invention is inconceivable without the scientific method; it will rest on the application of a diverse range of scientific insights, such as the process transforming hydrogen into helium to release huge amounts of energy.

cat2021-set2 verbal-ability sentence-rearrangement numerical-answer

The four sentences (labelled 1, 2, 3, 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer:

1. But today there is an epochal challenge to rethink and reconstitute the vision and practice of development as a shared responsibility – a sharing which binds both the agent and the audience, the developed world and the developing, in a bond of shared destiny.
2. We are at a crossroads now in our vision and practice of development.
3. This calls for the cultivation of an appropriate ethical mode of being in our lives which enables us to realize this global and planetary situation of shared living and responsibility.
4. Half a century ago, development began as a hope for a better human possibility, but in the last fifty years, this hope has lost itself in the dreary desert of various kinds of hegemonic applications.

cat2021-set2 verbal-ability sentence-rearrangement numerical-answer

## 5.21.103 Sentence Rearrangement: CAT 2021 Set-2 | Verbal Ability and Reading Comprehension | Question: 21 top

The four sentences (labelled 1, 2, 3 and 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer:

1. The US has long maintained that the Northwest Passage is an international strait through which its commercial and military vessels have the right to pass without seeking Canada's permission.
2. Canada, which officially acquired the group of islands forming the Northwest Passage in 1880, claims sovereignty over all the shipping routes through the Passage.
3. The dispute could be transitory, however, as scientists speculate that the entire Arctic Ocean will soon be ice-free in summer, so ship owners will not have to ask for permission to sail through any of the Northwest Passage routes.
4. The US and Canada have never legally settled the question of access through the Passage, but have an agreement whereby the US needs to seek Canada's consent for any transit.

## 5.21.104 Sentence Rearrangement: CAT 2021 Set-3 | Verbal Ability and Reading Comprehension | Question: 17 top

The four sentences (labelled 1, 2, 3, 4) below, when properly sequenced would yield a coherent paragraph. Decide on the proper sequencing of the order of the sentences and key in the sequence of the four numbers as your answer:

1. It is regimes of truth that make certain relationships speakable – relationships, like subjectivities, are constituted through discursive formations, which sustain regimes of truth.
2. Relationships are nothing without the communication that brings them into being; interpersonal communication is connected to knowledge shared by interlocutors, and scholars should attend to relational histories in their analyses.
3. A Foucauldian approach to relationships goes beyond these conceptions of discourse and history to macrolevel regimes of truth as constituting relationships.
4. Reconsidering micropractices within relationships that are constituted within and simultaneously contributors to regimes of truth acknowledges the central position of power/knowledge in the constitution of what has come to be considered true and real.

### 6.0.29 NIELIT 2017 DEC Scientist B - Section A: 42 top

India shares land borders with _____ countries.

A. Six B. Seven C. Eight D. Nine

nielit2017dec-scientistb

Answer key

### 6.0.30 NIELIT 2017 DEC Scientist B - Section A: 43 top

The movie Jurassic Park was a super-hit in the 90s. The movie shows scientists creating live dinosaurs by replicating dinosaur *DNA* found inside an insect that had bitten dinosaur centuries back and was then trapped in amber. Though such a feat has not been accomplished in the real world, yet one day modern science will possibly succeed in recreating prehistoric creatures in a similar manner.

All of the following assumptions underlie the conclusion of the passage above *EXCEPT* :

A. the genetic information in *DNA* is sufficient to permit the recreation of an entire animal.
B. it will someday be possible to accurately replicate *DNA* in a laboratory.
C. enough *DNA* can be extracted from an insect to recreate an entire animal.
D. scientists will never fully understand how *DNA* functions.

## 7.0.1 Jay loves to eat apple but not the banana while John loves to eat mango and the banana. Kim loves to eat mango but not the apple and Jim loves to eat banana but not the mango. If each child loves to eat two of the three fruits, which one has the same preference as John? top

Answer key

## 7.0.2 clock top

How much does a watch lose per day, if its hands coincide every 64 minutes?

A)$32\frac{8}{11}$ min

B)$36\frac{5}{11}$ min

C)90 min

D)96 min

Answer key

## 7.0.3 (number system) self doubts top

when a number is divided by 13 ,the remainder is 11.when the same number is divided by 17,the remainder is 9.what is the number?

Answer key

## 7.0.4 If 3x-2y=8, then 4y-6x is top

Answer key

## 7.0.5 work and time top

3 men and 4 women can complete a work in 10 days by working 12 hours a day. 13 men and 24 women can do the same work by working same hours a day in 2 days. How much time would 12 men and 1 women working same hours a day will take to complete the whole work?

Answer key

## 7.0.6 CAT 2001 | Question: 4 top

If $x > 5$ and $y < -1$, then which of the following statements is true?

1. $(x + 4y) > 1$
2. $x > -4y$
3. $-4x < 5y$
4. None of these

Answer key

## 7.0.7 the "friends club" purchased some shuttlecocks and cricket balls. Each Shuttle cock cost Rs.8 and each cricket ball cost Rs.15. In how many different ways could the club have bought the items if it spent a total amount of 769 top

## 7.0.8 escalator top

An escalator is moving downwards.P takes 30 steps to reach bottom from.top and Q takes 70 steps to reach top from bottom.Speed of P and Q are equal.How many steps are there in escalator?

1)42

2)45

3)50

4)60

Answer key

### 7.0.9 clock top

number of minutes from 4 o clock to now is 5 times the number of minutes from now to 8 o clock.find present time.

1)6:20

2)6:40

3)7:20

4)7:30

Answer key

### 7.0.10 NIELIT 2016 MAR Scientist C - Section A: 13 top

$0.04 \times 0.0162$ is equal to:

A. $6.48 \times 10^{-8}$
B. $6.48 \times 10^{-4}$
C. $6.48 \times 10^{-9}$
D. $6.48 \times 10^{-7}$

Answer key

### 7.0.11 work and wages(self doubts) top

A can do a certain work in the same time in which B and C together can do it.If A and B together could do it in 10 days and C can alone in 50 days,then B  alone in 50 days, then B alone could do it in:

Answer key

### 7.0.12 Five swimmers — A, B, C, D, E — participated in a competition. A lost to B but beat C. D beat E but failed to beat C. Which swimmer won the competition? * top

Answer key

### 7.0.13 escalator top

Ajay walked down a descending escalator. He took 60 steps and reached the bottom in 60 sec. On another occasion he took 80 steps and reached the bottom in only 50 sec. Find the number of steps in escalator.

(a) 160  (b) 180

(c) 200  (d) 240

Answer key

### 7.0.14 percentage top

In an election between two candidates 10% of the votes polled were invalid. If the winning candidate got 52% of the total valid votes and wins by a majority of 160 votes, then how many valid votes other candidate got?

(a) 1800  (b) 1600

(c) 1920 (d) 2220

Answer key

### 7.0.15 profit and loss top

A bakery owner use to mark the cost of cake Rs.25 more than the cost of making. If the cost of making the cake is reduced by Rs.25, accordingly he offered a discount of 25% on the marked price of cake. If he still makes a profit of 25%, what is his initial cost price?

(a) Rs.50 (b) Rs.75

(c) Rs.100 (d) Rs.125

Answer key

### 7.0.16 number plate top

A number plate should have 4 digits if first digit is 7 second digit is even natural number and last two digits are in ascending order then fond total no of different number plate possible?

1)225

2)144

3)180

4)135

Answer key

### 7.0.17 p and c top

1) in how many ways one can enter hexagonal room having door on each wall that he exits from some different door?

2)how many tricolor flag can be designed from the rainbow color?

Answer key

### 7.0.18 pipes and cistern top

Two taps t1 and t2 fill water at 12litres/min and 6 litres/min respectively.A leak pipe l can empty full tank in 10 min.If both taps and leak are opened tank can be filled in 15 min.

How much is capacity of tank?

1)96 litre

2)108litres

3)120 litres

4)cant be determined

### 7.0.24 Train Crossing problems top

Two trains starting at the same time from two stations 200 km apart, and going in opposite directions cross each other at a distance of 110 km from one of the stations. What is the ratio of their speeds . **Explain with proper steps**.

Answer : **11:9**

Answer key

### 7.0.25 how to solve this top

An Institute having 450 employees has sent all its employees for training in one or more areas out of HRM,Computer Skills and Financial Skills. The employees are classified into two categories — Officers and Clerks, who are in the ratio of 4 : 5. 10% of the Officers take training only in Computer skills, 16% of the Clerks take training only in HRM which is equal to the number of Officers taking training only in Financial Skills and 50 % of the number of Officers taking training in HRM and Financial Skills both. 6% of the total employees take training in all the three, of which two-thirds are officers. 10%of the total employees take training in HRM and Computer Skills both, which is five times the number of Clerks taking training in Computer Skills and Financial Skills. 10% of the Clerks take training in HRM and Computer Skills both. The number of officers taking training only in HRM is 25 % of the number of Clerks taking training only in HRM.20 % of the total number of employees take training only in Computer Skills. Number of clerks taking training in HRM and Financial skills both is 20 % of the total number of Clerks.

106. Total how many officers take training in HRM ?
1)110 2)128 3)118 4)98 5) None of these

107. Total how many Clerks take training in Computer Skills but not in HRM ?
1)113 2)104 3)88 4)79 5) None of these

108. Total how many employee s take training in Financial Skills but not in HRM?
1)106 2)135 3)127 4)134 5) None of these

109. Total how many Clerks take training in Financial Skills?
1)115 2)106 3)47 4)97 5) None of these

110. What per cent of the total number of Officers take training in Computer Skills but not in Financial Skills?
1)25 2)40 3)20 4)15 5) None of these

Answer key

## 7.4.15 Algebra: CAT 2003 | Question: 1-121 top

Choose 1 if the question can be answered by one of the statements alone but not by the other.

Choose 2 if the question can be answered by using either statement alone.

Choose 3 if the question can be answered by using both the statements together, but cannot be answered by using either statement alone.

Choose 4 if the question cannot be answered even by using both the statements together.

Is $a^{44} < b^{11}$, given that $a = 2$ and $b$ is an integer?

A. $b$ is even
B. $b$ is greater than 16

cat2003-1 quantitative-aptitude algebra

## 7.4.16 Algebra: CAT 2003 | Question: 1-131 top

Let $a, b, c, d$ be the four integers such that $a + b + c + d = 4m + 1$ where m is a positive integer. Given $m$, which one of the following is necessarily true?

A. The minimum possible value of $a^2 + b^2 + c^2 + d^2$ is $4m^2 - 2m + 1$
B. The minimum possible value of $a^2 + b^2 + c^2 + d^2$ is $4m^2 + 2m + 1$
C. The maximum possible value of $a^2 + b^2 + c^2 + d^2$ is $4m^2 - 2m + 1$
D. The maximum possible value of $a^2 + b^2 + c^2 + d^2$ is $4m^2 + 2m + 1$

cat2003-1 quantitative-aptitude algebra

## 7.4.17 Algebra: CAT 2003 | Question: 1-147 top

if $x, y, z$ are distinct positive real numbers then $\frac{x^2(y+z)+y^2(x+z)+z^2(x+y)}{xyz}$ would be

A. greater than 4 B. greater than 5
C. greater than 6 D. None of these

cat2003-1 quantitative-aptitude algebra

## 7.4.18 Algebra: CAT 2003 | Question: 2-53 top

Let $a, b, c, d$ and $e$ be integers such that $a = 6b = 12c$, and $2b = 9d = 12e$. Then which of the following pairs contains a number that is not an integer?

A. $\left[\frac{a}{27}, \frac{b}{e}\right]$ B. $\left[\frac{a}{36}, \frac{c}{e}\right]$

C. $\left[\frac{a}{12}, \frac{bd}{18}\right]$

D. $\left[\frac{a}{6}, \frac{c}{d}\right]$

cat2003-2 quantitative-aptitude algebra

Answer key

### 7.4.19 Algebra: CAT 2003 | Question: 2-54 top

If $a$, $a + 2$ and $a + 4$ are prime numbers, then the number of possible solutions for $a$ is:

A. one
B. two
C. three
D. more than three

cat2003-2 quantitative-aptitude algebra

Answer key

### 7.4.20 Algebra: CAT 2003 | Question: 2-57 top

Let $x$ and $y$ be positive integers such that $x$ is prime and $y$ is composite. Then,

A. $y - x$ cannot be an even integer
B. $xy$ cannot be an even integer.
C. $\frac{x+y}{x}$ cannot be an even integer
D. None of these.

cat2003-2 quantitative-aptitude algebra

Answer key

### 7.4.21 Algebra: CAT 2003 | Question: 2-79 top

Two binary operations $\oplus$ and $*$ are defined over the set $\{a, e, f, g, h\}$ as per the following tables

| $\oplus$ | a | e | f | g | h |
|---|---|---|---|---|---|
| a | a | e | f | g | h |
| e | e | f | g | h | a |
| f | f | g | h | a | e |
| g | g | h | a | e | f |
| h | h | a | e | f | g |

| $*$ | a | e | f | g | h |
|---|---|---|---|---|---|
| a | a | a | a | a | a |
| e | a | e | f | g | h |
| f | a | f | h | e | g |
| g | a | g | e | h | f |
| h | a | h | g | f | e |

Thus, according to the first table $f \oplus g = a$, while according to the second table $g * h = f$, and so on. Also, let $f^2 = f * f$, $g^3 = g * g * g$, and so on.

What is the smallest positive integer n such that $g^n = e$?

A. 4 B. 5 C. 2 D. 3

cat2003-2 quantitative-aptitude algebra

Answer key

### 7.4.22 Algebra: CAT 2003 | Question: 2-80 top

Two binary operations $\oplus$ and $*$ are defined over the set $\{a, e, f, g, h\}$ as per the following tables

| $\oplus$ | a | e | f | g | h |
|---|---|---|---|---|---|
| a | a | e | f | g | h |
| e | e | f | g | h | a |
| f | f | g | h | a | e |
| g | g | h | a | e | f |

| h | h | a | e | f | g |
|---|---|---|---|---|---|

| $*$ | a | e | f | g | h |
|---|---|---|---|---|---|
| a | a | a | a | a | a |
| e | a | e | f | g | h |
| f | a | f | h | e | g |
| g | a | g | e | h | f |
| h | a | h | g | f | e |

Thus, according to the first table $f \oplus g = a$, while according to the second table $g * h = f$, and so on. Also, let $f^2 = f * f$, $g^3 = g * g * g$, and so on.

Upon simplification, $f \oplus [f * \{f \oplus (f * f)\}]$ equal

A. $e$ B. $f$ C. $g$ D. $h$

cat2003-2 quantitative-aptitude algebra

Answer key

## 7.4.23 Algebra: CAT 2003 | Question: 2-81 top

Two binary operations $\oplus$ and $*$ are defined over the set $\{a, e, f, g, h\}$ as per the following tables

| $\oplus$ | a | e | f | g | h |
|---|---|---|---|---|---|
| a | a | e | f | g | h |
| e | e | f | g | h | a |
| f | f | g | h | a | e |
| g | g | h | a | e | f |
| h | h | a | e | f | g |

| $*$ | a | e | f | g | h |
|---|---|---|---|---|---|
| a | a | a | a | a | a |
| e | a | e | f | g | h |
| f | a | f | h | e | g |
| g | a | g | e | h | f |
| h | a | h | g | f | e |

Thus, according to the first table $f \oplus g = a$, while according to the second table $g * h = f$, and so on. Also, let $f^2 = f * f$, $g^3 = g * g * g$, and so on.

Upon simplification, $\{a10 * (f10 \oplus g9)\} \oplus e^8$ equals

A. $e$ B. $f$ C. $g$ D. $h$

## 7.8 Arithmetic Mean (4) top

### 7.8.1 Arithmetic Mean: CAT 2012 | Question: 27 top

$S$ is a set given by $S = \{1, 2, 3, \ldots, 4n\}$, where $n$ is a natural number. $S$ is partitioned into $n$ disjoint subsets $A_1, A_2, A_3 \ldots, A_n$ each containing four elements. It is given that in everyone of these subsets there is one element, which is the arithmetic mean of the other three elements of the subsets. Which of the following statements is then true?

A. $n \neq 1$ and $n \neq 2$
B. $n \neq 1$ but can be equal to 2
C. $n \neq 2$ but can be equal to 1
D. It is possible to satisfy the requirement for $n = 1$ as well as for $n = 2$

cat2012 quantitative-aptitude arithmetic-mean

### 7.8.2 Arithmetic Mean: CAT 2017 Set-2 | Question: 92 top

If $\log(2^a \times 3^b \times 5^c)$ is the arithmetic mean of $\log(2^2 \times 3^3 \times 5)$, $\log(2^6 \times 3 \times 5^7)$, and $\log(2 \times 3^2 \times 5^4)$, then $a$ equals

A. 2 B. None of these C. 6 D. 7

cat2017-2 quantitative-aptitude arithmetic-progression arithmetic-mean

Answer key

### 7.8.3 Arithmetic Mean: CAT 2018 Set-2 | Question: 87 top

Let $a_1, a_2, \ldots, a_{52}$ be a positive integers such that $a_1 < a_2 < \cdots < a_{52}$. Suppose, their arithmetic mean is one less than the arithmetic mean of $a_2, a_3, \ldots, a_{52}$. If $a_{52} = 100$, then the largest possible value of $a_1$ is _____

A. 20 B. 23 C. 48 D. 45

cat2018-2 quantitative-aptitude arithmetic-progression arithmetic-mean

## 7.10 Average (27) top

### 7.10.1 Average: CAT 2000 | Question: 103 top

A shipping clerk has five boxes of different but unknown weights each weighing less than 100 kg. The clerk weighs the boxes in pairs. The weights obtained are 110, 112, 113, 114, 115, 116, 117, 118, 120 and 121 kg. What is the weight, in kg, of the heaviest box?

A. 60
B. 62
C. 64
D. Cannot be determined

cat2000 quantitative-aptitude average

### 7.10.2 Average: CAT 2000 | Question: 61 top

Consider a sequence of seven consecutive integers. The average of the first five integers is $n$. The average of all the seven integers is

A. $n$
B. $n + 1$
C. K × $n$, where K is a function of $n$
D. $n + \frac{2}{7}$

cat2000 quantitative-aptitude average

### 7.10.3 Average: CAT 2001 | Question: 13 top

A college has raised 75% of the amount it needs for a new building by receiving an average donation of Rs. 600 from the people already solicited. The people already solicited represent 60% of the people the college will ask for donations. If the college is to raise exactly the amount needed for the new building, what should be the average donation from the remaining people to be solicited?

A. Rs 300 B. Rs 250 C. Rs 400 D. Rs 500

cat2001 quantitative-aptitude average

### 7.10.4 Average: CAT 2001 | Question: 22 top

Three math classes; X, Y, and Z, take an algebra test.

- The average score in class X is 83.
- The average score in class Y is 76.
- The average score in class Z is 85.
- The average score of all students in classes X and Y together is 79.
- The average score of all students in classes Y and Z together is 81.

What is the average for all three classes?

A. 81 B. 81.5 C. 82 D. 84.5

cat2001 quantitative-aptitude average

## 7.10.5 Average: CAT 2001 | Question: 38 top

The batting average (BA) of a test batsman is computed from runs scored and innings played-completed innings and incomplete innings (not out) in the following manner:

- $r_1$ = number of runs scored in completed innings;
- $n_1$ = number of completed innings
- $r_2$ = number of runs scored in incomplete innings;
- $n_2$ = number of incomplete innings
- BA = $\frac{r_1+r_2}{n_1}$

To better assess batsman's accomplishments, the ICC is considering two other measures $\text{MBA}_1$ and $\text{MBA}_2$ defined as follows:

- $\text{MBA}_1 = \frac{r_1}{n_1} + \frac{n_2}{n_1} \max\left[0, \left(\frac{r_2}{n_2} - \frac{r_1}{n_1}\right)\right]$
- $\text{MBA}_2 = \frac{r_1+r_2}{n_1+n_2}$

Based on the information provided which of the following is true?

A. $\text{MBA}_1 \le \text{BA} \le \text{MBA}_2$ B. $\text{BA} \le \text{MBA}_2 \le \text{MBA}_1$
C. $\text{MBA}_2 \le \text{BA} \le \text{MBA}_1$ D. None of these

cat2001 quantitative-aptitude average

## 7.10.6 Average: CAT 2001 | Question: 39 top

The batting average (BA) of a test batsman is computed from runs scored and innings played-completed innings and incomplete innings (not out) in the following manner:

- $r_1$ = number of runs scored in completed innings;
- $n_1$ = number of completed innings
- $r_2$ = number of runs scored in incomplete innings;
- $n_2$ = number of incomplete innings
- BA = $\frac{r_1+r_2}{n_1}$

To better assess batsman's accomplishments, the ICC is considering two other measures $\text{MBA}_1$ and $\text{MBA}_2$ defined as follows:

- $\text{MBA}_1 = \frac{r_1}{n_1} + \frac{n_2}{n_1} \max\left[0, \left(\frac{r_2}{n_2} - \frac{r_1}{n_1}\right)\right]$

- $MBA_2 = \frac{r_1 + r_2}{n_1 + n_2}$

An experienced cricketer with no incomplete innings has a BA of 50. The next time he bats, the innings is incomplete and he scores 45 runs. It can be inferred that:

A. BA and $MBA_1$ will both increase
B. BA will increase and $MBA_2$ will decrease
C. BA will increase and not enough data is available to assess change in $MBA_1$ and $MBA_2$
D. None of these

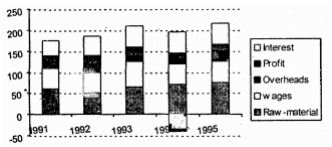
In which year was the amount spent on raw material per unit wage cost the maximum?

A. 1992 B. 1993 C. 1995 D. 1994

cat1997 quantitative-aptitude bars-charts data-interpretation

## 7.11.10 Bars Charts: CAT 1997 | Question: 171 top

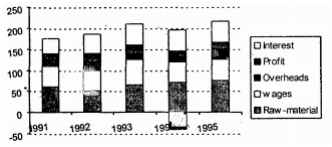


The maximum percentage increase in sales revenue between any two successive years was:

A. 27 B. 45 C. 34 D. 60

cat1997 quantitative-aptitude bars-charts data-interpretation

## 7.11.11 Bars Charts: CAT 1997 | Question: 172 top



Which cost component has remained relatively stable over the five years?

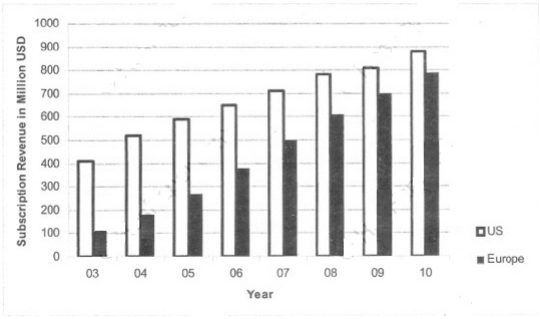
A. Raw material B. Interest C. Wages D. Overheads

cat1997 quantitative-aptitude data-interpretation bars-charts

## 7.11.12 Bars Charts: CAT 2008 | Question: 37 top

**Answer the following question based on the information given below.**

The bar chart shows the revenue received, in million US Dollars (USD), from subscribers to a particular Internet service. The data covers the period 2003 − 2007 for the Unites States (US) and Europe. The bar chart also shows the estimated revenues from subscription to this service for the period 2008– 2010.



The difference between the estimated subscription in Europe in 2008 and what it would have been if it were computed using the percentage growth rate of 2007 (over 2006), is closest to:

A. 50 B. 80 C. 20 D. 10 E. 0

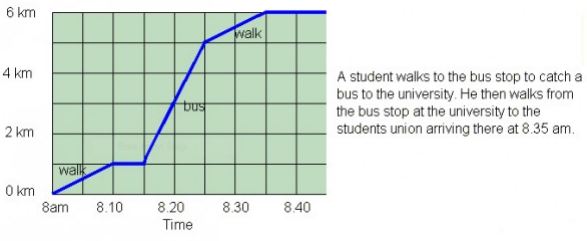
## 7.11.13 Bars Charts: How far does the student walk in total? top



A student walks to the bus stop to catch a bus to the university. He then walks from the bus stop at the university to the students union arriving there at 8 : 35 am.

How far does the student walk in total?

1. 1 Km
2. 2 Km
3. 3 Km
4. 4 Km
5. 5 Km

How far is he from university student's union at 8 : 20 am?

1. 1 Km
2. 2 Km
3. 3 Km
4. 4 Km
5. 5 Km

What is the average speed of the bus?

1. 14 Kmph
2. 24 Kmph
3. 40 Kmph
4. 48 Kmph

### 7.11.14 Bars Charts: If between 1987 and 2007 the trend for fashion ties had been the same as for cravats, how many fashion ties would have been sold in 2007? top

| Ties sold per year in Linbury | 1987 | 1992 | 1997 | 2002 | 2007 |
|---|---|---|---|---|---|
| Silk Ties | 35707 | 26775 | 23786 | 18557 | 14448 |
| Fashion Ties | 71400 | 61320 | 52241 | 43337 | 21371 |
| Bow Ties | 2863 | 2576 | 2443 | 2345 | 1757 |
| Clip Ons | 20440 | 17374 | 17255 | 15449 | 14308 |
| Cravats | 4074 | 4214 | 4452 | 4132 | 4116 |

If between 1987 and 2007 the trend for fashion ties had been the same as for cravats, how many fashion ties would have been sold in 2007?

1. 72600
2. 72100
3. 71300
4. 70500
5. 69200

For all types of tie together, what is the percentage decline between 2002 and 2007? (to nearest five percent. Clip ons and Cravats are types of tie)

1. 15%
2. 20%
3. 25%
4. 30%
5. 35%

What is the approximate absolute change in percentage market share for fashion tie between 1987 and 2007?

1. 15%
2. 20%
3. 25%
4. 30%
5. 35%

If the average retail price for silk ties in 2002 was £ 17.50 plus value added Tax at 17.5% what was the total value of silk Ties sold in 2002? ( to nearest £1000)

1. £372,000
2. £382,000
3. £392,000
4. £402,000
5. £412.000

## 7.11.17 Bars Charts: Which company had the widest range of share prices over the 5 years? top

Which company had the widest range of share prices over the 5 years?

1. Pilemin Airlines
2. RentaBanga
3. Rupt Bank
4. Cash Casinos
5. Stackem Supermarts

Which year had the widest range of Share prices?

1. 2002
2. 2003
3. 2004
4. 2005
5. 2006

Between 2002 and 2006 what was the approximate total change in share prices for all companies?

1. -15%
2. -5%
3. 5%
4. +15%
5. +25%

If the proportional change in share price for pilemin Airlines had been the same as that for Rupt bank between 2002 and 2006 what would have been the value of Pilemin Airlines shares in 2006?

1. 3.31
2. 3.81
3. 4.31
4. 4.81
5. 5.31

If in 2006-07, the average share price changes by the same percentage as the percentage of average share price increase

between 2002 and 2003 for all these companies, what will be the change in average share price for all these companies between 2006 & 2007?

1. 11 p
2. 15 p
3. 19 p
4. 23 p
5. 27 p

| Sep. | 53912 | 0 | 5660 | 0 | 110514 |
| Oct. | 12604 | 0 | 79591 | 24 | 92219 |
| Nov. | 3499 | 0 | 41872 | 42 | 45413 |
| Dec. | 1741 | 0 | 14822 | 15 | 16578 |
| Jan | 315 | 0 | 10922 | 201 | 11438 |
| Feb. | 25 | 0 | 11183 | 77 | 11285 |
| March | 0 | 0 | 683 | 86 | 760 |

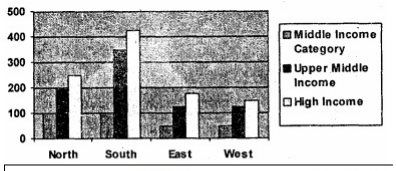
If the yield per tree was 40 kg, then from how many trees were the apples supplied to Delhi (in million)?

A. 11.5 B. 12.5
C. 13.5 D. Cannot be determined.

cat1998 data-interpretation

## 7.28.8 Data Interpretation: CAT 1998 | Question: 152 top

The following bar chart gives percentage growth in household incomes of the middle, upper middle and high-income categories in the four regions for the period between 87 − 88 to 94 − 95.



| | No. of Households in (87-88) (in thousands) | Avg House-hold Income (87-88) | Growth of Avg. Income (87-88)& (94-95) |
|---|---|---|---|
| Middle Income | 40 | 30000 | 50% |
| Upper Middle | 10 | 50000 | 60% |
| High Income | 5 | 75000 | 90% |

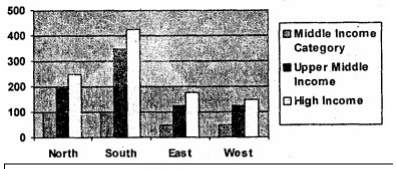
Which region showed the highest growth in all the income categories for the period?

A. North B. South C. West D. None

cat1998 quantitative-aptitude data-interpretation

## 7.28.9 Data Interpretation: CAT 1998 | Question: 153 top

The following bar chart gives percentage growth in household incomes of the middle, upper middle and high income categories in the four regions for the period between 87 − 88 to 94 − 95.



| | No. of Households in (87-88) (in thousands) | Avg House-hold Income (87-88) | Growth of Avg. Income (87-88)& (94-95) |
|---|---|---|---|
| Middle Income | 40 | 30000 | 50% |
| Upper Middle | 10 | 50000 | 60% |
| High Income | 5 | 75000 | 90% |

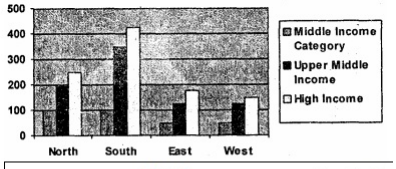
What was the total household income in Northern Region for upper middle class?

A. 50 lakhs
B. 500 million
C. 3000 million
D. Cannot be determined

cat1998 quantitative-aptitude data-interpretation

## 7.28.10 Data Interpretation: CAT 1998 | Question: 154 top

The following bar chart gives percentage growth in household incomes of the middle, upper middle and high-income categories in the four regions for the period between 87 − 88 to 94 − 95.



| | No. of Households in (87-88) (in thousands) | Avg House-hold Income (87-88) | Growth of Avg. Income (87-88)& (94-95) |
|---|---|---|---|
| Middle Income | 40 | 30000 | 50% |
| Upper Middle | 10 | 50000 | 60% |
| High Income | 5 | 75000 | 90% |

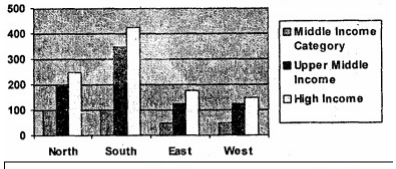
What is the percentage increase in total household income for the Northern Region (upper middle) over the given period?

A. 100
B. 200
C. 240
D. Cannot be determined

cat1998 quantitative-aptitude data-interpretation

## 7.28.11 Data Interpretation: CAT 1998 | Question: 155 top

The following bar chart gives percentage growth in household incomes of the middle, upper middle and high income categories in the four regions for the period between 87 − 88 to 94 − 95.



| | No. of Households in (87-88) (in thousands) | Avg House-hold Income (87-88) | Growth of Avg. Income (87-88)& (94-95) |
|---|---|---|---|
| Middle Income | 40 | 30000 | 50% |
| Upper Middle | 10 | 50000 | 60% |
| High Income | 5 | 75000 | 90% |

What was the average income of the highincome group in 87-88?

A. 75000
B. 25000
C. 225000
D. Cannot be determined.

### 7.33.2 Equations: CAT 1995 | Question: 64 top

Refer to the following data:

le(x, y) = | least of(x, y)

mo(x) = |x| me(x)

(x, y) = maximum of(x, y)

Find the value of me(a + mo(le(a, b)); mo(a + me(mo(a), mo(b)), at $a = -2$ and $b = -3$.

A. 1
B. 0
C. 5
D. 3

cat1995 quantitative-aptitude equations multiple-sub-parts

### 7.33.3 Equations: CAT 1995 | Question: 65 top

Refer to the following data:

le(x, y) = | least of(x, y)

mo(x) = |x| me(x)

(x, y) = maximum of(x, y)

Which of the following must be correct?

A. mo(le(a, b)$^3$ (me(mo(a), mo(b))
B. mo(le(a, b)) > (me(mo(a), mo(b))
C. mo(le(a, b)) < (le(mo(a), mo(b))
D. mo(le(a, b)) le(mo(a), mo(b))

cat1995 quantitative-aptitude equations multiple-sub-parts

### 7.33.4 Equations: CAT 1995 | Question: 66 top

Refer to the following data:

le(x, y) = | least of(x, y)

mo(x) = |x|

me(x) (x, y) = maximum of(x, y)

For what values of a is $me(a^2 - 3a, a - 3) < 0$?

A. $a < 3$ and $a < 1$
B. $1 < a < 3$
C. $a < 3$ or $a < 1$
D. $a < 3$ or $a < 0$

cat1995 quantitative-aptitude equations multiple-sub-parts

### 7.33.5 Equations: CAT 1995 | Question: 67 top

Refer to the following data:

le(x, y) = | least of(x, y)

mo(x) = |x|

me(x) (x, y) = maximum of(x, y)

For what values of $a$ is $le(a^2 - 3a, a - 3) < 0$?

A. $1 < a < 3$
B. $a < 0$ and $a < 3$
C. $a < 0$ and $a < 3$
D. $a < 0$ or $a < 3$

## 7.38 Functions (48) top

### 7.38.1 Functions: CAT 2000 | Question: 105 top

The set of all positive integers is the union of two disjoint subsets $\{f(1), f(2), \ldots, f(n), \ldots\}$ and $\{g(1), g(2), \ldots, g(n), \ldots\}$, where $f(1) < f(2) < \cdots < f(n) < \ldots$, and $g(1) < g(2) < \cdots < g(n) < \ldots$, and $g(n) = f(f(n)) + 1$ for all $n \geq 1$. What is the value of $g(1)$?

A. Zero
B. Two
C. One
D. Cannot be determined

cat2000 quantitative-aptitude functions

### 7.38.2 Functions: CAT 2000 | Question: 107 top

For all non-negative integers $x$ and $y$, $f(x, y)$ is defined as below

- $f(0, y) = y + 1$
- $f(x + 1, 0) = f(x, 1)$
- $f(x + 1, y + 1) = f(x, f(x + 1, y))$

Then, what is the value of $f(1, 2)$?

A. Two
B. Four
C. Three
D. Cannot be determined

cat2000 quantitative-aptitude functions

### 7.38.3 Functions: CAT 2000 | Question: 75 top

**Answer the following question based on the information given below.**
For real numbers $x, y,$ let

$$f(x,y) = \begin{cases} \text{Positive square-root of } (x+y), & \text{if } (x+y)^{0.5} \text{ is real} \\ (x+y)^2, & \text{otherwise} \end{cases}$$

$$g(x,y) = \begin{cases} (x+y)^2, & \text{if } (x+y)^{0.5} \text{ is real} \\ -(x+y), & \text{otherwise} \end{cases}$$

Which of the following expressions yields a positive value for every pair of non-zero real number $(x, y)$?

A. $f(x,y) - g(x,y)$
B. $f(x,y) - (g(x,y))^2$
C. $g(x,y) - (f(x,y))^2$
D. $f(x,y) + g(x,y)$

cat2000 quantitative-aptitude functions

### 7.38.4 Functions: CAT 2000 | Question: 76 top

**Answer the following question based on the information given below.**
For real numbers $x, y,$ let

$$f(x,y) = \begin{cases} \text{Positive square-root of } (x+y), & \text{if } (x+y)^{0.5} \text{ is real} \\ (x+y)^2, & \text{otherwise} \end{cases}$$

$$g(x,y) = \begin{cases} (x+y)^2, & \text{if } (x+y)^{0.5} \text{ is real} \\ -(x+y), & \text{otherwise} \end{cases}$$

Under which of the following conditions is $f(x, y)$ necessarily greater than $g(x, y)$?

A. Both $x$ and $y$ are less than – 1
B. Both $x$ and $y$ are positive

C. Both $x$ and $y$ are negative

D. $y > x$

cat2000 quantitative-aptitude functions

## 7.38.5 Functions: CAT 2000 | Question: 77 top

**Answer the following question based on the information given below.**
For three distinct real numbers $x, y$ and $z$, let

- $f(x, y, z) =$ min ( max $(x, y)$, max $(y, z)$, max $(z, x)$)
- $g(x, y, z) =$ max ( min $(x, y)$, min $(y, z)$, min $(z, x)$)
- $h(x, y, z) =$ max ( max $(x, y)$, max $(y, z)$, max $(z, x)$)
- $j(x, y, z) =$ min ( min $(x, y)$, min $(y, z)$, min $(z, x)$)
- $m(x, y, z) =$ max $(x, y, z)$
- $n(x, y, z) =$ min $(x, y, z)$

Which of the following is necessarily greater than 1?

A. $(h(x, y, z) - f(x, y, z))/j(x, y, z)$

B. $j(x, y, z)/h(x, y, z)$

C. $f(x, y, z)/g(x, y, z)$

D. $(f(x, y, z) + h(x, y, z) - g(x, y, z))/j(x, y, z)$

cat2000 quantitative-aptitude functions

## 7.38.6 Functions: CAT 2000 | Question: 78 top

**Answer the following question based on the information given below.**
For three distinct real numbers $x, y$ and $z$, let

- $f(x, y, z) =$ min ( max $(x, y)$, max $(y, z)$, max $(z, x)$)
- $g(x, y, z) =$ max ( min $(x, y)$, min $(y, z)$, min $(z, x)$)
- $h(x, y, z) =$ max ( max $(x, y)$, max $(y, z)$, max $(z, x)$)
- $j(x, y, z) =$ min ( min $(x, y)$, min $(y, z)$, min $(z, x)$)
- $m(x, y, z) =$ max $(x, y, z)$
- $n(x, y, z) =$ min $(x, y, z)$

Which of the following expressions is necessarily equal to 1?

A. $(f(x, y, z) - m(x, y, z))/(g(x, y, z) - h(x, y, z))$

B. $(m(x, y, z) - f(x, y, z))/(g(x, y, z) - n(x, y, z))$

C. $(j(x, y, z) - g(x, y, z))/h(x, y, z)$

D. $(f(x, y, z) - h(x, y, z))/f(x, y, z)$

cat2000 quantitative-aptitude functions

Answer key

## 7.38.7 Functions: CAT 2000 | Question: 79 top

**Answer the following question based on the information given below.**
For three distinct real numbers $x, y$ and $z$, let

- $f(x, y, z) =$ min ( max $(x, y)$, max $(y, z)$, max $(z, x)$)
- $g(x, y, z) =$ max ( min $(x, y)$, min $(y, z)$, min $(z, x)$)
- $h(x, y, z) =$ max ( max $(x, y)$, max $(y, z)$, max $(z, x)$)
- $j(x, y, z) =$ min ( min $(x, y)$, min $(y, z)$, min $(z, x)$)
- $m(x, y, z) =$ max $(x, y, z)$
- $n(x, y, z) =$ min $(x, y, z)$

Which of the following expressions is indeterminate?

A. $(f(x, y, z) - h(x, y, z))/(g(x, y, z) - j(x, y, z))$

B. $(f(x, y, z) + h(x, y, z) + g(x, y, z) + j(x, y, z))/(j(x, y, z) + h(x, y, z) - m(x, y, z) - n(x, y, z))$

C. $(g(x, y, z) - j(x, y, z))/(f(x, y, z) - h(x, y, z))$

D. $(h(x, y, z) - f(x, y, z))/(n(x, y, z) - g(x, y, z))$

A. 1 B. 2 C. 3 D. 4

cat2000 quantitative-aptitude functions

## 7.38.11 Functions: CAT 2000 | Question: 87 top

Answer the following question based on the information given below.
For a real number $x$, let

f(x) = 1/(1 + x), if x is non-negative

$= 1+ x,$ if x is negative

$f^n(x)$ $= f(f^{n-1}(x)),$ n $= 2, 3, ....$

What is the value of the product, $f(2)f^2(2)f^3(2)f^4(2)f^5(2)$?

A. $\frac{1}{3}$ B. 3 C. $\frac{1}{18}$ D. None of these

cat2000 quantitative-aptitude functions

## 7.38.12 Functions: CAT 2000 | Question: 88 top

Answer the following question based on the information given below.
For a real number $x$, let

| | | |
|---|---|---|
| f(x) | $= 1/(1 + x),$ | if x is non-negative |
| | $= 1+ x,$ | if x is negative |
| $f^n(x)$ | $= f(f^{n-1}(x)),$ n $= 2, 3, ....$ | |

$r$ is an integer $\geq 2$. Then what is the value of $f^{r-1}(-r) + f^r(-r) + f^{r+1}(-r)$?

A. $-1$ B. 0 C. 1 D. None of these

cat2000 quantitative-aptitude functions

## 7.38.13 Functions: CAT 2002 | Question: 68 top

If $f(x) = \log(1 + x)/(1 - x))$, then $f(x) + f(y) =$

A. $f(x + y)$ B. $f(1 + xy)$ C. $(x + y) f(1 + xy)$ D. $f(\frac{x+y}{1+xy})$

cat2002 quantitative-aptitude functions

## 7.38.14 Functions: CAT 2003 | Question: 1-117 top

The function $f(x) = |x - 2| + |2.5 - x| + |3.6 - x|$, where $x$ is a real number, attains a minimum at

A. $x = 2.3$ B. $x = 2.5$ C. $x = 2.7$ D. None of these

cat2003-1 quantitative-aptitude functions

## 7.38.15 Functions: CAT 2004 | Question: 47 top

If $f(x) = x^3 - 4x + p$, and $f(0)$ and $f(1)$ are of opposite signs, then which of the following is necessarily true?

A. $-1 < p < 2$ B. $0 < p < 3$
C. $-2 < p < 1$ D. $-3 < p < 0$

cat2004 quantitative-aptitude functions

Answer key

## 7.38.16 Functions: CAT 2004 | Question: 61 top

Answer the questions on the basis of the information given below:

- $f_1(x) = \begin{cases} x & 0 \leq x \leq 1 \\ 1 & x \geq 1 \\ 0 & \text{otherwise} \end{cases}$
- $f_2(x) = f_1(-x)$ for all $x$

- $f_3(x) = -f_2(-x)$ for all $x$
- $f_4(x) = f_3(-x)$ for all $x$

How many of the following products are necessarily zero for every $x$: $f_1(x)f_2(x)$, $f_2(x)f_3(x)$, $f_2(x)f_4(x)$

A. 0 B. 1 C. 2 D. 3

cat2004 quantitative-aptitude functions

Answer key

### 7.38.17 Functions: CAT 2004 | Question: 62 top

Answer the questions on the basis of the information given below:

- $f_1(x) = \begin{cases} x & 0 \le x \le 1 \\ 1 & x \ge 1 \\ 0 & \text{otherwise} \end{cases}$
- $f_2(x) = f_1(-x)$ for all $x$
- $f_3(x) = -f_2(-x)$ for all $x$
- $f_4(x) = f_3(-x)$ for all $x$

Which of the following is necessarily true?

A. $f_4(x) = f_1(x)$ for all $x$
B. $f_1(x) = f_3(-x)$ for all $x$
C. $f_2(-x) = f_4(x)$ for all $x$
D. $f_1(x) + f_3(x) = 0$ for all $x$

cat2004 quantitative-aptitude functions

### 7.38.18 Functions: CAT 2005 | Question: 27 top

Let $g(x)$ be a function such that $g(x+1) + g(x-1) = g(x)$ for every real $x$. Then for what value of $p$ is the relation $g(x+p) = g(x)$ necessarily true for every real $x$?

A. 5 B. 3 C. 2 D. 6

cat2005 quantitative-aptitude functions

### 7.38.19 Functions: CAT 2007 | Question: 25 top

A function $f(x)$ satisfies $f(1) = 3600$ and $f(1) + f(2) + \cdots + f(n) = n^2 f(n)$, for all positive integers $n > 1$. What is the value of $f(9)$?

A. 80 B. 240 C. 200 D. 100 E. 120

cat2007 quantitative-aptitude functions

Answer key

## 7.38.21 Functions: CAT 2010 | Question: 16 top

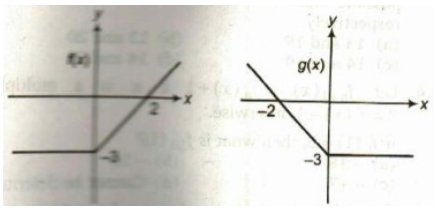
Let $f$ be an injective map with domain $\{x, y, z\}$ and the range $\{1, 2, 3\}$ such that exactly one of the following statements is correct and the remaining are false. $f\{x\} = 1, f(y) \neq 1, f(z) \neq 2$. The value of $f^{-1}(1)$ is

A. $x$ B. $y$ C. $z$ D. None of the above

cat2010 quantitative-aptitude functions

## 7.38.22 Functions: CAT 2011 | Question: 17 top

The graphs given alongside represent two functions $f(x)$ and $g(x)$ respectively. Which of the following is true?



A. $g(x) = [f(x)]$ B. $g(x) = f(-x)$ C. $g(x) = -f(x)$ D. None of these

cat2011 quantitative-aptitude functions

## 7.38.23 Functions: CAT 2011 | Question: 21 top

Consider the function given by $f(x) = |x - 1| - x$

Which of the following is not true about the graph of $f(x)$?

A. A portion of the graph is parallel to the line $y = 25$.
B. A portion of graph is in 2nd quadrant.
C. Some portion of graph lies in 1st quadrant.
D. Some portion of graph lies in 3rd quadrant.

cat2011 quantitative-aptitude functions

## 7.38.24 Functions: CAT 2011 | Question: 4 top

Let $f_{n+1}(x) = f_n(x) + 1$ if $n$ is a multiple of 3

$= f_n(x) - 1$ otherwise.

If $f_1(1) = 0$, then what is $f_{50}(1)$?

A. $-18$ B. $-16$
C. $-17$ D. Cannot be determined

cat2011 quantitative-aptitude functions

Answer key

## 7.38.25 Functions: CAT 2013 | Question: 23 top

If $g(x) = p|x| - qx^2$, where $p$ and $q$ are constants, then at $x = 0$, $g(x)$ will be

A. maximum when $p > 0, q > 0$ B. minimum when $p < 0, q < 0$
C. minimum when $p > 0, q < 0$ D. maximum when $p > 0, q < 0$

cat2013 quantitative-aptitude functions

## 7.38.26 Functions: CAT 2013 | Question: 29 top

Let $f(x) = \frac{1}{1+x^2}$ and $g(x) = \frac{e^{-x}}{1+[x]}$, where $[x]$ is the greatest integer less than or equal to $x$. Then which of the following domain is true?

I. domain of $(f+g) = R - (-2, -1]$
II. domain of $(f+g) = R - [-1, 0)$

III. [range of f] ∩ [range of g] = $\left[-2, \frac{1}{2}\right]$

IV. [range of f] ∩ [range of g] = $\left[-\frac{1}{2}, \frac{1}{2}\right] - \{0\}$

A. Both II and IV B. Both I and III C. Both I and IV D. Both II and III

cat2013 quantitative-aptitude functions

## 7.38.27 Functions: CAT 2014 | Question: 11 top

If $y = f(x)$ and $f(x) = (1 - x)/(1 + x)$, which of the following is true?

a. $f(2x) = f(x) - 1$
b. $x = f(2y) - 1$
c. $f(1/x) = f(x)$
d. $x = f(y)$

cat2014 quantitative-aptitude functions

Answer key

## 7.38.28 Functions: CAT 2014 | Question: 32 top

Use the following information for next two questions: A function $f(x)$ is said to be even if $f(-x) = f(x)$, and odd if $f(-x) = -f(x)$. Thus, for example, the function given by $f(x) = x^2$ is even, while the function given by $f(x) = x^3$ is odd. Using this definition, answer the following questions.

The function given by $f(x) = |x|^3$

A. even B. odd C. neither D. both

cat2014 quantitative-aptitude functions

Answer key

## 7.38.29 Functions: CAT 2014 | Question: 33 top

**Use the following information for next two questions:**

A function $f(x)$ is said to be even if $f(-x) = f(x)$, and odd if $f(-x) = -f(x)$. Thus, for example, the function given by $f(x) = x^2$ is even, while the function given by $f(x) = x^3$ is odd. Using this definition, answer the following questions.

The sum of two odd functions

A. is always an even function
B. is always an odd function
C. is sometimes odd and sometimes even
D. may be neither odd nor even

cat2014 quantitative-aptitude functions

Answer key

## 7.38.30 Functions: CAT 2014 | Question: 50 top

A quadratic function $f(x)$ attains a maximum of 3 at $x = 1$. The value of the function at $x = 0$ is 1. What is the value $f(x)$ at $x = 10$?

a. – 119 b. – 159 c. – 110 d. – 180

cat2014 quantitative-aptitude functions

Answer key

## 7.38.31 Functions: CAT 2015 | Question: 81 top

The set of all positive integers is the union of two disjoint subsets : $\{f(1), f(2), \ldots, f(n), \ldots\}$ and $\{g(1), g(2), \ldots, g(n), \ldots\}$, where $f(1) < f(2) < \cdots < f(n)\ldots$, and $g(1) < g(2) < \cdots < g(n)\ldots$, and $g(n) = f(f(n)) + 1$ for all $n \geq 1$. What is the value of $g(1)$?

A. 0
B. 2
C. 1
D. Cannot be determined

cat2015 quantitative-aptitude functions

## 7.38.32 Functions: CAT 2015 | Question: 82 top

For all non-negative integers $x$ and $y$, $f(x, y)$ is defined as below.

- $f(0, y) = y + 1$
- $f(x + 1, 0) = f(x, 1)$
- $f(x + 1, y + 1) = f(x, f(x + 1, y))$

Then what is the value of $f(1, 2)$ _____

cat2015 quantitative-aptitude functions numerical-answer

Answer key

### 7.38.33 Functions: CAT 2016 | Question: 73 top

$A$, $S$, $M$ and $D$ are functions of $x$ and $y$, and they are defined as follows.

- $A(x, y) = x + y$
- $M(x, y) = xy$
- $S(x, y) = x - y$
- $D(x, y) = x/y, y \neq 0$

What is the value of $M(M(A(M(x, y), S(y, x)), x), A(y, x))$ for $x = 2, y = 3$?

A. 60 B. 140 C. 25 D. 70

cat2016 quantitative-aptitude functions

Answer key

### 7.38.34 Functions: CAT 2017 Set-1 | Question: 99 top

If $f(x) = \dfrac{5x + 2}{3x - 5}$ and $g(x) = x^2 - 2x - 1$, then the value of $g(f(f(3)))$ is

A. 2 B. 1/3 C. 6 D. 2/3

cat2017-1 quantitative-aptitude functions

Answer key

### 7.38.35 Functions: CAT 2017 Set-2 | Question: 89 top

Let $f(x) = x^2$ and $g(x) = 2^x$, for all real $x$. Then the value of $f(f(g(x)) + g(f(x)))$ at $x = 1$ is

A. 16 B. 18 C. 36 D. 40

cat2017-2 quantitative-aptitude functions

Answer key

### 7.38.36 Functions: CAT 2017 Set-2 | Question: 97 top

If $f(ab) = f(a)f(b)$ for all positive integers $a$ and $b$, then the largest possible value of $f(1)$ is

A. 1 B. 2 C. 0 D. 3

cat2017-2 quantitative-aptitude functions

Answer key

### 7.38.37 Functions: CAT 2017 Set-2 | Question: 98 top

Let $f(x) = 2x - 5$ and $g(x) = 7 - 2x$. Then $|f(x) + g(x)| = |f(x)| + |g(x)|$ if and only if

A. $5/2 < x < 7/2$
B. $x \leq 5/2$ or $x \geq 7/2$
C. $x < 5/2$ or $x \geq 7/2$
D. $5/2 \leq x \leq 7/2$

cat2017-2 quantitative-aptitude functions

Answer key

### 7.38.38 Functions: CAT 2018 Set-1 | Question: 93 top

If $f(x+2) = f(x) + f(x+1)$ for all positive integers $x$, and $f(11) = 91, f(15) = 617$, then $f(10)$ equals _____

cat2018-1 quantitative-aptitude functions numerical-answer

Answer key

### 7.38.39 Functions: CAT 2019 Set-1 | Question: 87 top

For any positive integer $n$, let $f(n) = n(n+1)$ if n is even, and $f(n) = n+3$ if n is odd. if $m$ is a positive integer such that $8f(m+1) - f(m) = 2$, then $m$ equals _____

cat2019-1 quantitative-aptitude functions numerical-answer

Answer key

### 7.38.40 Functions: CAT 2019 Set-1 | Question: 90 top

Consider a function $f$ satisfying $f(x+y) = f(x)f(y)$ where $x, y$ are positive integers, and $f(1) = 2$. If $f(a+1) + f(a+2) + \ldots + f(a+n) = 16(2^n - 1)$ then $a$ is equal to _____

cat2019-1 quantitative-aptitude functions numerical-answer

Answer key

### 7.38.41 Functions: CAT 2019 Set-2 | Question: 95 top

Let $f$ be a function such that $f(mn) = f(m)f(n)$ for every positive integers $m$ and $n$. If $f(1), f(2)$ and $f(3)$ are positive integers, $f(1) < f(2)$, and $f(24) = 54$, then $f(18)$ equals _____

cat2019-2 quantitative-aptitude functions numerical-answer

Answer key

### 7.38.42 Functions: CAT 2020 Set-1 | Question: 68 top

If $f(5+x) = f(5-x)$ for every real $x$, and $f(x) = 0$ has four distinct real roots, then the sum of these roots is

A. 0 B. 40 C. 10 D. 20

cat2020-set1 quantitative-aptitude functions

Answer key

### 7.38.43 Functions: CAT 2020 Set-2 | Question: 72 top

Let $f(x) = x^2 + ax + b$ and $g(x) = f(x+1) - f(x-1)$. If $f(x) \geq 0$ for all real $x$, and $g(20) = 72$, then the smallest possible value of $b$ is

A. 1 B. 16 C. 0 D. 4

cat2020-set2 quantitative-aptitude functions

Answer key

### 7.38.44 Functions: CAT 2020 Set-3 | Question: 58 top

If $f(x+y) = f(x)f(y)$ and $f(5) = 4$, then $f(10) - f(-10)$ is equal to

A. 0 B. 15.9375 C. 3 D. 14.0625

cat2020-set3 quantitative-aptitude functions

## 7.39 Game Player (4) top

### 7.39.1 Game Player: CAT 1995 | Question: 69 top

Four sisters Suvarna, Tara, Uma, and Vibha are playing a game such that the loser doubles the money of each of the other players from her share. They played four games and each sister lost one game in the alphabetical order. At the end of fourth game each sister had Rs. 32.

Who started with the lowest amount?

A. Suvarna B. Tara. C. Uma D. Vibha

cat1995 quantitative-aptitude game-player multiple-sub-parts

Answer key

### 7.39.2 Game Player: CAT 1995 | Question: 70 top

Four sisters Suvarna, Tara, Uma, and Vibha are playing a game such that the loser doubles the money of each of the other players from her share. They played four games and each sister lost one game in the alphabetical order. At the end of fourth game each sister had Rs. 32.

Who started with the highest amount?

A. Suvarna B. Tara C. Uma D. Vibha

cat1995 quantitative-aptitude game-player multiple-sub-parts

Answer key

### 7.39.3 Game Player: CAT 1995 | Question: 71 top

Four sisters Suvarna, Tara, Uma, and Vibha are playing a game such that the loser doubles the money of each of the other players from her share. They played four games and each sister lost one game in the alphabetical order. At the end of fourth game each sister had Rs. 32.

What was the amount with Uma at the end of the second round?

A. 36 B. 72 C. 16 D. None of these

cat1995 quantitative-aptitude game-player multiple-sub-parts

Answer key

### 7.39.4 Game Player: CAT 1995 | Question: 72 top

Four sisters Suvarna, Tara, Uma, and Vibha are playing a game such that the loser doubles the money of each of the other players from her share. They played four games and each sister lost one game in the alphabetical order. At the end of fourth game each sister had Rs. 32.

How many rupees did Suvarna start with?

A. 60 B. 34 C. 66 D. 28

cat1995 quantitative-aptitude game-player multiple-sub-parts

Answer key

## 7.40 Geometric Mean (2) top

### 7.40.1 Geometric Mean: CAT 1994 | Question: 61 top

If the harmonic mean between two positive numbers is to their geometric mean as $12:13$, then the numbers could be in the ratio:

A. $12:13$ B. $1/12:1/13$ C. $4:9$ D. $2:3$

cat1994 quantitative-aptitude number-series geometric-mean

Answer key

### 7.40.2 Geometric Mean: CAT 2017 Set-1 | Question: 87 top

Suppose, $\log_3 x = \log_{12} y = a$, where $x, y$ are positive numbers. If G is the geometric mean of $x$ and $y$, and $\log_6 G$ is equal to

A. $\sqrt{a}$ B. $2a$ C. $a/2$ D. $a$

cat2017-1 quantitative-aptitude geometric-progression geometric-mean

Answer key

## 7.41 Geometric Progression (3) top

### 7.41.1 Geometric Progression: CAT 2012 | Question: 8 top

If $(a^2 + b^2)$, $(b^2 + c^2)$ and $(a^2 + c^2)$ are in geometric progression, which of the following holds true?

A. $b^2 - c^2 = \dfrac{a^4 - c^4}{b^2 + a^2}$

B. $b^2 - a^2 = \dfrac{a^4 - c^4}{b^2 + c^2}$

C. $b^2 - c^2 = \dfrac{b^4 - a^4}{b^2 + a^2}$

D. $b^2 - a^2 = \dfrac{b^4 - c^4}{b^2 + a^2}$

cat2012 quantitative-aptitude geometric-progression

Answer key

### 7.41.2 Geometric Progression: CAT 2018 Set-1 | Question: 67 top

Let $x, y, z$ be three positive real numbers in a geometric progression such that $x < y < z$. If $5x$, $16y$, and $12z$ are in an arithmetic progression then the common ratio of the geometric progression is

A. $3/6$ B. $3/2$ C. $5/2$ D. $1/6$

cat2018-1 quantitative-aptitude arithmetic-progression geometric-progression

Answer key

### 7.41.3 Geometric Progression: CAT 2020 Set-2 | Question: 55 top

Let the m-th and n-th terms of a geometric progression be $\frac{3}{4}$ and 12, respectively, where $m < n$. If the common ratio of the progression is an integer $r$, then the smallest possible value of $r+n-m$ is

A. $-2$ B. 2 C. 6 D. $-4$

cat2020-set2 quantitative-aptitude geometric-progression

## 7.42 Geometry (174) top

### 7.42.1 Geometry: CAT 1994 | Question: 56 top

Choose the best alternative

A right circular cone, a right circular cylinder and a hemisphere, all have the same radius, and the heights of the cone and cylinder equal their diameters. Then their volumes are proportional, respectively to:

A. 1:3:1 B. 2:1:3 C. 3:2:1 D. 1:2:3

cat1994 quantitative-aptitude geometry

Answer key

### 7.42.2 Geometry: CAT 1994 | Question: 59 top

Choose the best alternative:

A right circular cone of height h' is cut by a plane parallel to the base and at a distance h/3 from the vertex, then the volumes of the resulting cone and frustum are in the ratio:

A. 1 : 3 B. 8 : 19 C. 1 : 4 D. 1 : 7

cat1994 quantitative-aptitude geometry

Answer key

### 7.42.3 Geometry: CAT 1995 | Question: 84 top

The length of a ladder is exactly equal to the height of the wall it is resting against. If lower end of the ladder is kept on a stool of height 3 m and the stool is kept 9 m away from the wall, the upper end of the ladder coincides with the top of the wall. Then, the height of the wall is:

A. 12m B. 15m C. 18m D. 11m

cat1995 quantitative-aptitude geometry

Answer key

### 7.42.4 Geometry: CAT 1996 | Question: 109 top

A closed wooden box of thickness 0.5 cm and length 21 cm, width 11 cm, and height 6 cm, is panted on the inside. The cost of painting is Rs 70. What is the rate of painting in rupees per sq. cm?

A. 0.7 B. 0.5 C. 0.1 D. 0.2

cat1996 quantitative-aptitude geometry

Answer key

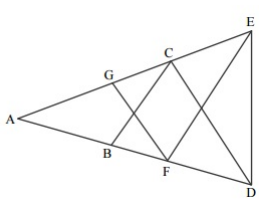
### 7.42.5 Geometry: CAT 2000 | Question: 101 top

If $a, b, c$ are the sides of a triangle, and $a^2 + b^2 + c^2 = bc + ca + ab$, then the triangle is

A. equilateral
B. isosceles
C. right angled
D. obtuse angled

cat2000 quantitative-aptitude geometry

### 7.42.6 Geometry: CAT 2000 | Question: 102 top



In the figure above, AB = BC = CD = DE = EF = FG = GA . Then ∠DAE is approximately

A. 15˚ B. 20˚ C. 30˚ D. 25˚

cat2000 quantitative-aptitude geometry

### 7.42.7 Geometry: CAT 2000 | Question: 106 top

ABCDEFGH is a regular octagon. A and E are opposite vertices of the octagon. A frog starts jumping from vertex to vertex, beginning from A. From any vertex of the octagon except E, it may jump to either of the two adjacent vertices. When it reaches E, the frog stops and stays there. Let an be the number of distinct paths of exactly n jumps ending in E. Then what is the value of $a_{2n-1}$?

A. Zero
B. Four
C. $2n-1$
D. Cannot be determined

cat2000 quantitative-aptitude geometry

### 7.42.8 Geometry: CAT 2000 | Question: 110 top

A farmer has decided to build a wire fence along one straight side of his property. For this, he planned to place several fence-posts at six metre intervals, with posts fixed at both ends of the side. After he bought the posts and wire, he found that the number of posts he had bought was five less than required. However, he discovered that the number of posts he had bought would be just sufficient if he spaced them eight metres apart. What is the length of the side of his property and how many posts did he buy?

A. 100 metres, 15
B. 100 metres, 16
C. 120 metres, 15
D. 120 metres, 16

cat2000 quantitative-aptitude geometry

### 7.42.9 Geometry: CAT 2000 | Question: 96 top

ABCD is a rhombus with the diagonals AC and BD intersecting at the origin on the $x-y$ plane. The equation of the straight line AD is $x+y=1$. What is the equation of BC?

A. $x+y=-1$
B. $x-y=-1$
C. $x+y=1$
D. None of the above

cat2000 quantitative-aptitude geometry

Answer key

### 7.42.10 Geometry: CAT 2000 | Question: 97 top

Consider a circle with unit radius. There are 7 adjacent sectors, $S_1, S_2, S_3, \ldots, S_7$ in the circle such that their total area is $(1/8)$ th of the area of the circle. Further, the area of the $j$-th sector is twice that of the $(j-1)$-th sector, for $j = 2, \ldots, 7$. What the angle, in radians, subtended by the arc of $S_1$ at the centre of the circle?

A. $\frac{\pi}{508}$
B. $\frac{\pi}{2040}$
C. $\frac{\pi}{1016}$
D. $\frac{\pi}{1524}$

cat2000 quantitative-aptitude geometry

## 7.42.11 Geometry: CAT 2001 | Question: 2 top

A square, whose side is 2 metres, has its corners cut away so as to form an octagon with all sides equal. Then the length of each side of the octagon, in metres is

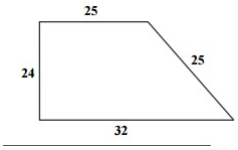
A. $\frac{\sqrt{2}}{\sqrt{2}+1}$ B. $\frac{2}{\sqrt{2}+1}$ C. $\frac{2}{\sqrt{2}-1}$ D. $\frac{\sqrt{2}}{\sqrt{2}-1}$

cat2001 quantitative-aptitude geometry

Answer key

## 7.42.12 Geometry: CAT 2001 | Question: 23 top

Two sides of a plot measure 32 metres and 24 metres and the angle between them is a perfect right angle. The other two sides measure 25 metres each and the other three are not right angles.



What is the area of the plot?

A. 768 B. 534 C. 696.5 D. 684

cat2001 quantitative-aptitude geometry

Answer key

## 7.42.13 Geometry: CAT 2001 | Question: 29 top

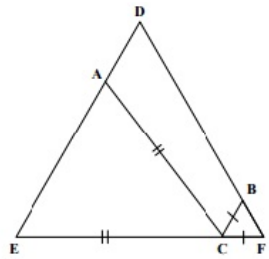
Euclid has a triangle in mind, Its longest side has length 20 and another of its sides has length 10. Its area is 80. What is the exact length of its third side?

A. $\sqrt{260}$ B. $\sqrt{250}$ C. $\sqrt{240}$ D. $\sqrt{270}$

cat2001 quantitative-aptitude geometry

## 7.42.14 Geometry: CAT 2001 | Question: 34 top

In $\triangle DEF$ shown below, points A, B, and C are taken on DE, DF and EF respectively such that $EC = AC$ and $CF = BC$. If $\angle D = 40^\circ$, then what is $\angle ACB$ in degrees?



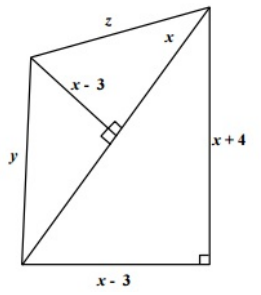
A. 140 B. 70 C. 100 D. None of these

cat2001 quantitative-aptitude geometry

Answer key

## 7.42.15 Geometry: CAT 2001 | Question: 40 top

Based on the figure below, what is the value of $x$, if $y = 10$?



A. 0 B. 11 C. 12 D. None of these

cat2001 quantitative-aptitude geometry

## 7.42.16 Geometry: CAT 2001 | Question: 41 top

A rectangular pool 20 metres wide and 60 metres long is surrounded by a walkway of uniform width. If the total area of the walkway is 516 square metres, how wide, in metres, is the walkway?

A. 43 m B. 4.3 m C. 3 m D. 3.5 m

cat2001 quantitative-aptitude geometry

## 7.42.17 Geometry: CAT 2001 | Question: 7 top

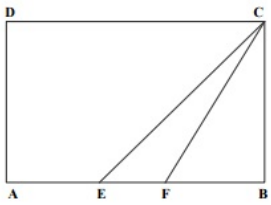
A certain city has a circular wall around it, and this wall has four gates pointing north, south, east and west. A house stands outside the city, three km north of the north gate, and it can just be seen from a point nine km east of the south gate. What is the diameter of the wall what surrounds the city?

A. 6 km B. 9 km C. 12 km D. None of these

cat2001 quantitative-aptitude geometry

## 7.42.18 Geometry: CAT 2001 | Question: 8 top

In the above diagram, ABCD is a rectangle with AE = EF = FB. What is the ratio of the area of the triangle CEF and that of the rectangle?

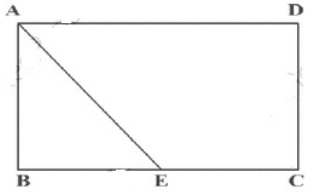


A. $\frac{1}{6}$ B. $\frac{1}{8}$ C. $\frac{1}{9}$ D. None of these

cat2001 quantitative-aptitude geometry

## 7.42.19 Geometry: CAT 2002 | Question: 58 top

In the following figure, the area of the isosceles right triangle ABE is 7 sq.cm. If EC = 3BE, then the area of rectangle ABCD id (insq.cm.)



A. 64 B. 82 C. 26 D. 56

cat2002 quantitative-aptitude geometry

Answer key

## 7.42.20 Geometry: CAT 2002 | Question: 64 top

In order to cover less distance, a boy – rather than going along the longer and the shorter lengths of the rectangular path, goes by the diagonal. The boy finds that he saved a distance equal to half the longer side. The ration of the length and breadth is

A. 1/2 B. 2/3 C. 3/4 D. 7/15

cat2002 quantitative-aptitude geometry

## 7.42.21 Geometry: CAT 2002 | Question: 70 top

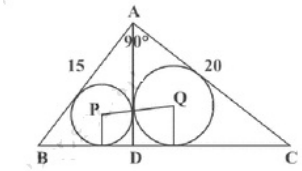
The internal bisector of an angle A in a triangle ABC meets the side BC at point D. AB = 4, AC = 3 and angle A = 60°. Then what is the length of the bisector AD?

A. $\frac{12\sqrt{3}}{7}$ B. $\frac{12\sqrt{13}}{7}$ C. $\frac{4\sqrt{13}}{7}$ D. $\frac{4\sqrt{3}}{7}$

cat2002 quantitative-aptitude geometry

## 7.42.22 Geometry: CAT 2002 | Question: 71 top

In the figure given below, find the distance PQ.



A. 7 m B. 4.5 m C. 10.5 m D. 6 m

cat2002 quantitative-aptitude geometry

## 7.42.23 Geometry: CAT 2002 | Question: 74 top

There is a common chord of 2 circles with radius 15 and 20. The distance between the two centres is 25. The length of the chord is

A. 48 B. 24 C. 36 D. 28

cat2002 quantitative-aptitude geometry

## 7.42.24 Geometry: CAT 2002 | Question: 81 top

The area of the triangle with the vertices $(a, a)$, $(a + 1, a)$ and $(a, a + 2)$ is

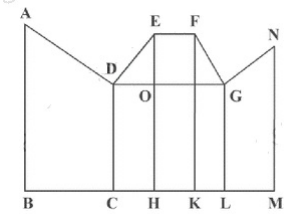
A. $a^3$ B. 1 C. 0 D. None of these

cat2002 quantitative-aptitude geometry

## 7.42.25 Geometry: CAT 2002 | Question: 88 top

**Answer the question based on the diagram**

ABC = 90° = Angle DCH = Angle DOE = Angle EHK = Angle FKL = Angle GLM = Angle LMN,
AB = BC = 2CH = 2CD = EH = FK = 2HK = 4KL = 2LM = MN



The magnitude of Angle FGO =

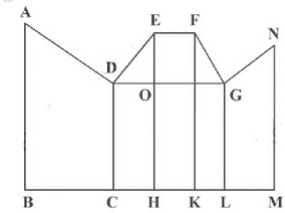
A. 30˚ B. 45˚ C. 60˚ D. None of these

cat2002 quantitative-aptitude geometry

## 7.42.26 Geometry: CAT 2002 | Question: 89 top

**Answer the question based on the diagram**

ABC = 90˚ = Angle DCH = Angle DOE = Angle EHK = Angle FKL = Angle GLM = Angle LMN,
AB = BC = 2CH = 2CD = EH = FK = 2HK = 4KL = 2LM = MN



The ratio of the areas of the two quadrangles ABCD and DEFG is

A. 1 : 2 B. 2 : 1 C. 12 : 7 D. None of these

cat2002 quantitative-aptitude geometry

## 7.42.27 Geometry: CAT 2003 | Question: 1-123 top

Choose 1 if the question can be answered by one of the statements alone but not by the other.

Choose 2 if the question can be answered by using either statement alone.

Choose 3 if the question can be answered by using both the statements together, but cannot be answered by using either statement alone.

Choose 4 if the question cannot be answered even by using both the statements together.

AB is a chord of a circle. AB = 5 cm, A tangent parallel to AB touches the minor arc AB at E. What is the radius of the circle?

A. AB is not a diameter of the circle.
B. The distance between AB and the tangent at E is 5 cm.

cat2003-1 quantitative-aptitude geometry

## 7.42.28 Geometry: CAT 2003 | Question: 1-125 top

Choose 1 if the question can be answered by one of the statements alone but not by the other.

Choose 2 if the question can be answered by using either statement alone.

Choose 3 if the question can be answered by using both the statements together, but cannot be answered by using either statement alone.

Choose 4 if the question cannot be answered even by using both the statements together.

D, E, F are the mid-points of the sides AB, BC and CA of triangle ABC respectively. What is the area of the DEF in square centimeter?

A. AD = 1 cm, DF = 1 cm and perimeter of DEF = 3 cm
B. Perimeter of ABC = 6 cm, AB = 2 cm, and AC = 2 cm

cat2003-1 quantitative-aptitude geometry

## 7.42.29 Geometry: CAT 2003 | Question: 1-127 top

Each side of a given polygon is parallel to either the X or the Y axis. A corner of such a polygon is said to be convex if the internal angle is 90˚ or concanve if the internal angle is 270˚. If the number of convex corners in such a polygon is 25, the number of concave corners must be

A. 20 B. 0 C. 21 D. 22

cat2003-1 quantitative-aptitude geometry

## 7.42.30 Geometry: CAT 2003 | Question: 1-130 top

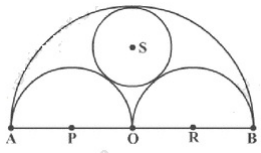
There are two concentric circles such that the area of the outer circle is four times of the area of inner circle. Let A, B and C be the three distinct points on the perimeter of the outer circle such that AB and AC are tangents to the inner circle. If the area of the outer circle is 12 square centimeters then the area of the triangle ABC (in square centimeter) would be

A. $\pi\sqrt{12}$ B. $\frac{9}{\pi}$ C. $\frac{9\sqrt{3}}{\pi}$ D. $\frac{6\sqrt{3}}{\pi}$

cat2003-1 quantitative-aptitude geometry

## 7.42.31 Geometry: CAT 2003 | Question: 1-132 top

Three horses are grazing within a semi-circular field. In the diagram given below, AB is the diameter of the semi-circular field with center at O. Horses are tied up at P, R and S such that PO and RO are the radii of semi-circles with centres at P and R respectively, and S is the centre of the circle touching the two semicircles with diameter AO and OB. The horses tied at P and R can graze within the respective semi-circles and the horse tied at S can graze within the circles centered at S. The percentage of the area of the semi-circle with diameter AB that cannot be grazed by the horses is nearest to

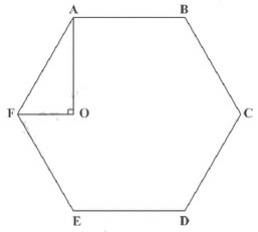


A. 20 B. 28 C. 36 D. 40

cat2003-1 quantitative-aptitude geometry

## 7.42.32 Geometry: CAT 2003 | Question: 1-133 top

In the figure below, ABCDEF is a rectangular hexagon and $\angle AOF = 90^\circ$ is parallel to ED. What is the ratio of the area of the triangle AOF to that of the hexagon ABCDEF?



A. $\frac{1}{12}$ B. $\frac{1}{6}$ C. $\frac{1}{24}$ D. $\frac{1}{18}$

cat2003-1 quantitative-aptitude geometry

## 7.42.33 Geometry: CAT 2003 | Question: 1-136 top

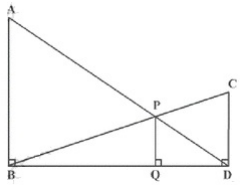
In a triangle ABC, AB= 6, BC= 8 and AC=10. A perpendicular dropped from B, meets the side AC at D. A circles of radius BD (with centre B) is drawn. If the circle cuts AB and BC at P and Q respectively, then AP : QC is equal to

A. 1:1 B. 3:2 C. 4:1 D. 3:8

cat2003-1 quantitative-aptitude geometry

## 7.42.34 Geometry: CAT 2003 | Question: 1-137 top

In the diagram given below, $\angle ABD = \angle CDB = \angle PQD = 90^\circ$. If AB : CD = 3:1, the ratio of CD : PQ is

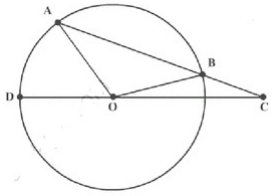


A. 1 : 0.69 B. 1 : 0.75 C. 1 : 0.72 D. None of these

cat2003-1 quantitative-aptitude geometry

## 7.42.35 Geometry: CAT 2003 | Question: 1-141 top

In the figure given below, AB is the chord of a circle with centre O. AB is extended to C such that BC = OB. The straight line CO is produced to meet the circle at D. If $\angle ACD = y^\circ$ and $\angle AOD = x^\circ$ such that $x = ky$, then the value of $k$ is

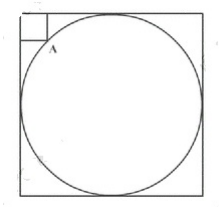


A. 3 B. 2 C. 1 D. None of these

cat2003-1 quantitative-aptitude geometry

## 7.42.36 Geometry: CAT 2003 | Question: 1-142 top

In the figure below, the rectangle at the corner measures 10 cm × 20 cm. The corner A also the rectangle is also a point on the circumference of the circle. What is the radius of the circle in cm?



A. 10 cm B. 40 cm C. 50 cm D. None of these

cat2003-1 quantitative-aptitude geometry

## 7.42.37 Geometry: CAT 2003 | Question: 2-51 top

A piece of paper is in the shape of a right angled triangle and is cut along a line that is parallel to the hypotenuse, leaving a smaller triangle. There was a 35% reduction in the length of the hypotenuse of the triangle. If the area of the original triangle was 34 square inches before the cut, what is the area (in square inches) of the smaller triangle?

A. 16.665 B. 16.565 C. 15.465 D. 14.365

cat2003-2 quantitative-aptitude geometry

Answer key

## 7.42.38 Geometry: CAT 2003 | Question: 2-55 top

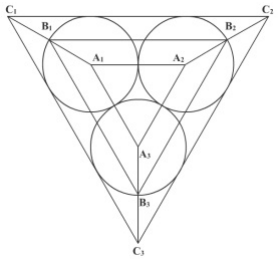
A square tin sheet of side 12 inches is converted into a box with open top in the following steps – The sheet is placed horizontally. Then, equal sized squares, each of side x inches, are cut from the four corners of the sheet. Finally, the four resulting sides are bent vertically upwards in the shape of a box. If $x$ is an integer, then what value of $x$ maximizes the volume of the box?

A. 3 B. 4 C. 1 D. 2

cat2003-2 quantitative-aptitude geometry

## 7.42.39 Geometry: CAT 2003 | Question: 2-66 top

Answer the question on the basis on the basis of the information given below.
Consider three circular parks of equal size with centres at $A_1$, $A_2$, and $A_3$ respectively. The parks touch each other at the edge as shown in the figure (not drawn to scale). There are three paths formed by the triangles $A_1$, $A_2$, $A_3$, $B_1$, $B_2$, $B_3$, and $C_1$, $C_2$, $C_3$, as shown. Three sprinters A, B, and C begin running from points $A_1$, $B_1$ and $C_1$ respectively. Each sprinter traverses her respective triangular path clockwise and returns to her starting point.



Let the radius of each circular park be $r$, and the distances to be traversed by the sprinters A, B and C be $a, b$ and $c$, respectively. Which of the following is true?

A. $b - a = c - b = 3\sqrt{3}r$

B. $b - a = c - b = \sqrt{3}r$

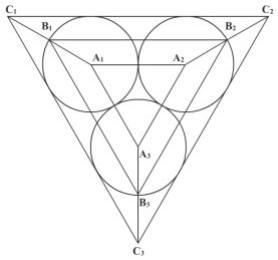
C. $b = \frac{a+c}{2} = 2(1 + \sqrt{3})r$

D. $c = 2b - a = (2 + \sqrt{3}r$

cat2003-2 quantitative-aptitude geometry

## 7.42.40 Geometry: CAT 2003 | Question: 2-67 top

**Answer the question on the basis on the basis of the information given below.**
Consider three circular parks of equal size with centres at $A_1$, $A_2$, and $A_3$ respectively. The parks touch each other at the edge as shown in the figure (not drawn to scale). There are three paths formed by the triangles $A_1$, $A_2$, $A_3$, $B_1$, $B_2$, $B_3$, and $C_1$, $C_2$, $C_3$, as shown. Three sprinters A, B, and C begin running from points $A_1$, $B_1$ and $C_1$ respectively. Each sprinter traverses her respective triangular path clockwise and returns to her starting point.



Sprinter A traverses distances $A_1A_2, A_2A_3$, and $A_3A_1$ at average speeds of 20, 30 and 15, respectively. B traverses her entire path at a uniform speed of $(10\sqrt{3} + 20)$. C traverses distances $C_1C_2, C_2C_3$, and $C_3C_1$ at average speeds of $\frac{40}{3}(\sqrt{3} + 1)$, $\frac{40}{3}(\sqrt{3} + 1)$, and 120 respectively. All speeds are in the same unit. Where would B and C be respectively when A finishes her sprint?

A. $B_1$, $C_1$

B. $B_3$, $C_3$

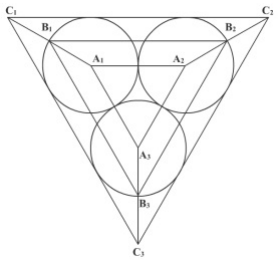
C. $B_1$, $C_3$

D. $B_1$, Somewhere between $C_3$ and $C_1$1

cat2003-2 quantitative-aptitude geometry

## 7.42.41 Geometry: CAT 2003 | Question: 2-68 top

**Answer the question on the basis on the basis of the information given below.**
Consider three circular parks of equal size with centres at $A_1$, $A_2$, and $A_3$ respectively. The parks touch each other at the edge as shown in the figure (not drawn to scale). There are three paths formed by the triangles $A_1$, $A_2$, $A_3$, $B_1$, $B_2$, $B_3$, and $C_1$, $C_2$, $C_3$, as shown. Three sprinters A, B, and C begin running from points $A_1$, $B_1$ and $C_1$ respectively. Each sprinter traverses her respective triangular path clockwise and returns to her starting point.



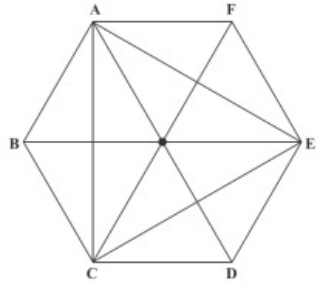
Sprinters A, B and C traverse their respective paths at uniform speeds u, v and w respectively. It is known that $u^2.v^2.w^2$ is equal to Area A: Area B: Area C, where Area A, Area B and Area C are the areas of triangles $A_1A_2A_3, B_1B_2B_3$, and $C_1C_2C_3$, respectively. Where would A and C be when B reaches point $B_3$?

A. $A_2, C_3$
B. $A_3, C_3$
C. $A_3, C_2$
D. Somewhere between $A_2$ and $A_3$, Somewhere between $C_3$ and $C_1$

cat2003-2 quantitative-aptitude geometry

## 7.42.42 Geometry: CAT 2003 | Question: 2-71 top

Let ABCDEF be a regular hexagon. What is the ratio of the area of the triangle ACE to that of the hexagon ABCDEF?



A. $\frac{1}{3}$
B. $\frac{1}{2}$
C. $\frac{2}{3}$
D. $\frac{5}{6}$

cat2003-2 quantitative-aptitude geometry

## 7.42.43 Geometry: CAT 2003 | Question: 2-76 top

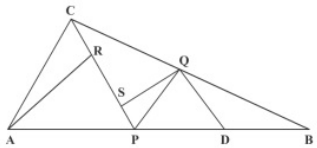
The length of the circumference of a circle equals the perimeter of a triangle of equal sides, and also the perimeter of a square. The areas covered by the circle, triangle, and square are $c$, $t$, and $s$, respectively. Then,

A. $s > t > c$
B. $c > t > s$
C. $c > s > t$
D. $s > c > t$

cat2003-2 quantitative-aptitude geometry

## 7.42.44 Geometry: CAT 2003 | Question: 2-85 top

In the figure (not drawn to scale) given below, P is a point on AB such that AP : PB = 4 : 3. PQ is parallel to AC and QD is parallel to CP. In $\triangle$ARC, $\measuredangle$ARC = 90°, and in $\triangle$PQS, $\measuredangle$PSQ = 90°. The length of QS is 6 cms. What is ratio AP : PD?

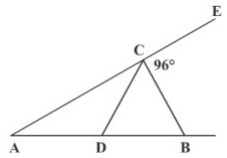


A. 10 : 3
B. 2 : 1
C. 7 : 3
D. 8 : 3

cat2003-2 quantitative-aptitude geometry

## 7.42.45 Geometry: CAT 2003 | Question: 2-87 top

In the figure (not drawn to scale) given below, if $AD = CD = BC$, and $\angle BCE = 96^\circ$, how much is $\angle DBC$?



A. $32^\circ$
B. $84^\circ$
C. $64^\circ$
D. Cannot be determined

cat2003-2 quantitative-aptitude geometry

## 7.42.46 Geometry: CAT 2003 | Question: 2-91 top

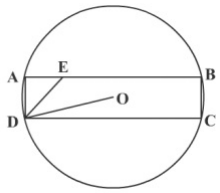
Consider two different cloth-cutting processes. In the first one, $n$ circular cloth pieces are cut from a square cloth piece of side $a$ in the following steps: the original square of side $a$ is divided into $n$ smaller squares, not necessarily of the same size; then a circle of maximum possible area is cut from each of the smaller squares. In the second process, only one circle of maximum possible area is cut from the square of side a and the process ends there. The cloth pieces remaining after cutting the circles are scrapped in both the processes. The ratio of the total area of scrap cloth generated in the former to that in the latter is

A. $1:1$
B. $\sqrt{2}:1$
C. $\frac{n(4-\pi)}{4n-\pi}$
D. $\frac{4n-\pi}{n(4-\pi)}$

cat2003-2 quantitative-aptitude geometry

## 7.42.47 Geometry: CAT 2003 | Question: 2-92 top

In the figure below (not drawn to scale), rectangle ABCD is inscribed in the circle with centre at O. The length of side AB is greater than that of side BC. The ratio of the area of the circle to the area of the rectangle ABCD is $\pi:3$. The line segment DE intersects AB at E such that $\angle ODC = \angle ADE$. What is the ratio AE : AD?

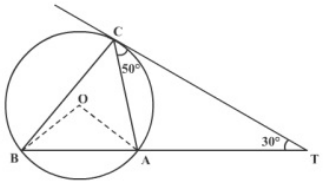


A. $1:\sqrt{3}$
B. $1:\sqrt{2}$
C. $1:2\sqrt{3}$
D. $1:2$

cat2003-2 quantitative-aptitude geometry

## 7.42.48 Geometry: CAT 2003 | Question: 2-95 top

In the figure given below (not drawn to scale), A, B and C are three points on a circle with centre O. The chord BA is extended to a point T such that CT becomes a tangent to the circle at point C. If $\angle ATC = 30^\circ$ and $\angle ACT = 50^\circ$, then the angle $\angle BOA$ is



A. $100^\circ$
B. $150^\circ$
C. $80^\circ$
D. Cannot be determined

cat2003-2 quantitative-aptitude geometry

## 7.42.49 Geometry: CAT 2003 | Question: 2-97 top

Let $S_1$ be a square of side a. Another square $S_2$ is formed by joining the mid-points of the sides of $S_1$. The same process is applied to $S_2$ to form yet another square $S_3$, and so on. If $A_1, A_2, A_3, \ldots$ be the areas and $P_1, P_2, P_3, \ldots.$ be the perimeters of

$S_1, S_2, S_3, \ldots$, respectively, then the ratio $\frac{P_1+P_2+P_3+\ldots}{A_1+A_2+A_3+\ldots}$ equals

A. $\frac{2(1+\sqrt{2})}{a}$ B. $\frac{2(2-\sqrt{2})}{a}$ C. $\frac{2(2+\sqrt{2})}{a}$ D. $\frac{2(1+2\sqrt{2})}{a}$

cat2003-2 quantitative-aptitude geometry

## 7.42.50 Geometry: CAT 2004 | Question: 55 top

A rectangular sheet of paper, when halved by folding it at mid-point of its longer side, results in a rectangle, whose longer and shorter sides are in same proportion as the longer and shorter sides of the original rectangle. If the shorter side of the original rectangle is 2, what is the area of the smaller rectangle?

A. $4\sqrt{2}$ B. $2\sqrt{2}$ C. $\sqrt{2}$ D. None of the above

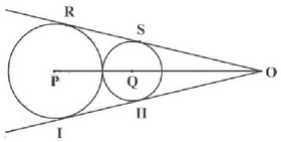
cat2004 quantitative-aptitude geometry

Answer key

## 7.42.51 Geometry: CAT 2004 | Question: 56 top

**Answer the question on the basis of the information given below:**

In the adjoining figure, I and II are circles with centres P and Q respectively. The two circles touch each other and have a common tangent that touches them at points R and S respectively. This common tangent meets the line P and Q at O. The diameters of I and II are in the ration 4 : 3. It is also known that the length of PO is 28 cm.



What is the ration of the length of PQ to that of QO?

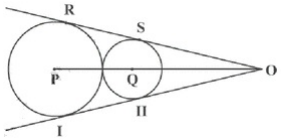
A. 1 : 4 B. 1 : 3 C. 3 : 8 D. 3 : 4

cat2004 quantitative-aptitude geometry

## 7.42.52 Geometry: CAT 2004 | Question: 57 top

**Answer the question on the basis of the information given below:**

In the adjoining figure, I and II are circles with centres P and Q respectively. The two circles touch each other and have a common tangent that touches them at points R and S respectively. This common tangent meets the line P and Q at O. The diameters of I and II are in the ration 4 : 3. It is also known that the length of PO is 28 cm.



What is the radius of the circle II?

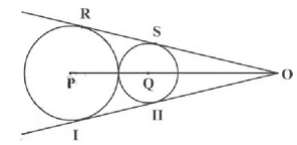
A. 2 cm B. 3 cm C. 4 cm D. 5 cm

cat2004 quantitative-aptitude geometry

## 7.42.53 Geometry: CAT 2004 | Question: 58 top

**Answer the question on the basis of the information given below:**

In the adjoining figure, I and II are circles with centres P and Q respectively. The two circles touch each other and have a common tangent that touches them at points R and S respectively. This common tangent meets the line P and Q at O. The diameters of I and II are in the ratio 4 : 3. It is also known that the length of PO is 28 cm.



The length of SO is

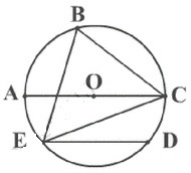
A. $8\sqrt{3}$ cm B. $10\sqrt{3}$ cm C. $12\sqrt{3}$ cm D. $14\sqrt{3}$ cm

cat2004 quantitative-aptitude geometry

Answer key

## 7.42.54 Geometry: CAT 2004 | Question: 59 top

In the adjoining figure, chord ED is parallel to the diameter AC of the circle. If $\angle CBE = 65^\circ$ then what is the value of $\angle DEC$?

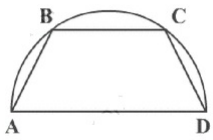


A. $35^\circ$ B. $55^\circ$ C. $45^\circ$ D. $25^\circ$

cat2004 quantitative-aptitude geometry

## 7.42.55 Geometry: CAT 2004 | Question: 60 top

On a semicircle with diameter AD; chord BC is parallel to the diameter. Further, each of the chords AB and CD has length 2, while has length 8. What is the length of BC?



A. 7.5 B. 7 C. 7.75 D. None of the above

cat2004 quantitative-aptitude geometry

## 7.42.56 Geometry: CAT 2004 | Question: 69 top

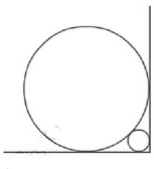
Let C be a circle with centre $P_0$ and AB be a diameter of C. suppose $P_1$ is the mid-point of the line segment $P_0B$, $P_2$ is the mid-point of the line segment $P_1B$ and so on. Let $C_1$, $C_2, C_3, \ldots$ be the circles with diameters $P_0P_1, P_1P_2, P_2P_3, \ldots$ respectively. Suppose the circles are all shaded. The ratio of the area of the unshaded portion of C to that of the original circle C is

A. 8:9 B. 9:10 C. 10:11 D. 11:12

cat2004 quantitative-aptitude geometry

## 7.42.57 Geometry: CAT 2004 | Question: 73 top

A circle with radius 2 is placed against a right angle. Another small circle is also placed as shown in the adjoining figure. What is the radius of the smaller circle?



A. $3-2\sqrt{2}$ B. $4-2\sqrt{2}$ C. $7-4\sqrt{2}$ D. $6-4\sqrt{2}$

cat2004 quantitative-aptitude geometry

Answer key

## 7.42.58 Geometry: CAT 2005 | Question: 03 top

Two identical circles intersect so that their centres, and the points at which they intersect, form a square of side 1 cm. The area in sq. cm of the portion that is common to the two circles is

A. $\pi/4$ B. $\frac{\pi}{2}-1$ C. $\frac{\pi}{5}$ D. $\sqrt{2}-1$

cat2005 quantitative-aptitude geometry

Answer key

## 7.42.59 Geometry: CAT 2005 | Question: 09 top

What is the distance in cm between two parallel chords of length 32 cm and 24 cm in a circle of radius 20 cm?

A. 1 or 7 B. 2 or 14 C. 3 or 21 D. 4 or 28

cat2005 quantitative-aptitude geometry

Answer key

## 7.42.60 Geometry: CAT 2005 | Question: 17 top

Four points A, B, C and D lie on the straight line in X-Y plane, such that AB = BC = CD and the length of AB is 1 meter. An ant at A wants to reach a sugar particle at D. But there are insect repellents kept at points B and C. The ant would not go within any insect repellent. The minimum distance in meters the ant must traverse to reach the sugar particle is

A. $3\sqrt{2}$ B. $1+\pi$ C. $\frac{4\pi}{3}$ D. 5

cat2005 quantitative-aptitude geometry

## 7.42.61 Geometry: CAT 2005 | Question: 20 top

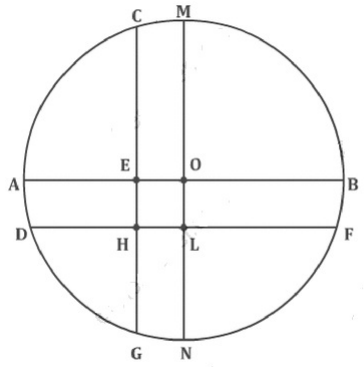
Rectangular tiles each of size 70 cm by 30 cm must be laid horizontally on a rectangular floor of size 110 cm by 130 cm, such that the tiles do not overlap. A tile can be placed in any orientation so long as its edges are parallel to the edges on the floor. No tile should overshoot any edge of the floor. The maximum number of tiles that can be accommodated on the floor is

A. 4 B. 5 C. 6 D. 7

cat2005 quantitative-aptitude geometry

## 7.42.62 Geometry: CAT 2005 | Question: 22 top

In the following figure, the diameter of the circle is 3 cm. AB and MN are two diameters such that MN is perpendicular to AB. In addition, CG is perpendicular to AB such that AE : EB = 1 : 2, and DF is perpendicular to MN such that NL : LM = 1 : 2. The length of DH in cm is



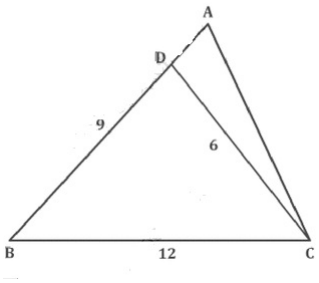
A. $2\sqrt{2}-1$ B. $((2\sqrt{2}-1))/2$

C. $((3\sqrt{2}-1))/2$ D. $((2\sqrt{2}-1))/3$

cat2005 quantitative-aptitude geometry

## 7.42.63 Geometry: CAT 2005 | Question: 23 top

Consider the triangle ABC shown in the following figure where BC = 12 cm, DB =9 cm, CD=6 cm, and $\angle BCD = \angle BAC$. What is the ratio of the perimeter of the triangle ADC to that of the triangle BDC?



A. 7/9 B. 8/9 C. 6/9 D. 5/9

cat2005 quantitative-aptitude geometry

## 7.42.64 Geometry: CAT 2005 | Question: 24 top

P, Q, S and R are points on the circumference of a circle of radius $r$, such that PQR is an equilateral triangle and PS is a diameter of the circle. What is the perimeter of the quadrilateral PQSR?

A. $2r(1+\sqrt{3})$ B. $2r(2+\sqrt{3})$ C. $r(1+\sqrt{5})$ D. $2r+\sqrt{3}$

cat2005 quantitative-aptitude geometry

## 7.42.65 Geometry: CAT 2005 | Question: 30 top

A rectangular floor is fully covered with square tiles of identical size. The tiles on the edges are white and the tiles in the interior are red. The number of white tiles is the same as the number of red tiles. A possible value of the number of tiles along one edge of the floor is

A. 10 B. 12 C. 14 D. 16

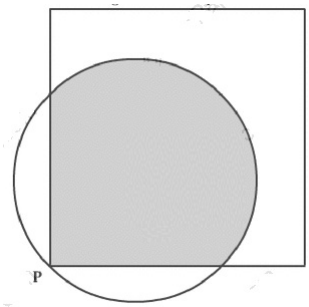
cat2005 quantitative-aptitude geometry

Answer key

## 7.42.66 Geometry: CAT 2006 | Question: 63 top

**Below question is on the basis of information given below:**

A punching machine is used to punch a circular hole of diameter 2 units from a square sheet of aluminium of width 2 units, as shown below. The hole is punched such that circular hole touches one corner P of the square sheet and the diameter of the hole originating at P is in line with a diagonal of the square.



The proportion of the sheet area that remains after punching is

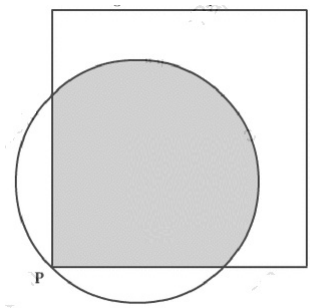
A. $(\pi+2)/8$ B. $(6-\pi)/8$ C. $(4-\pi)/4$ D. $(\pi-2)/4$ E. $(14-3\pi)/6$

cat2006 quantitative-aptitude geometry

## 7.42.67 Geometry: CAT 2006 | Question: 64 top

**Below question is on the basis of information given below:**

A punching machine is used to punch a circular hole of diameter 2 units from a square sheet of aluminium of width 2 units, as shown below. The hole is punched such that circular hole touches one corner P of the square sheet and the diameter of the hole originating at P is in line with a diagonal of the square.



Find the area of the part of the circle (round punch)falling outside the square sheet

A. $\pi/4$
B. $(\pi-1)/2$
C. $(\pi-1)/4$
D. $(\pi-2)/2$
E. $(\pi-2)/4$

cat2006 quantitative-aptitude geometry

## 7.42.68 Geometry: CAT 2006 | Question: 71 top

A semi-circle is drawn with AB as its diameter. From C, a point on AB, a line perpendicular to AB is drawn meeting the circumference of the semi-circle at D. Given that AC = 2 cm and CD = 6 cm the area of the semi-circle (in sq. cm) will be

A. $32\pi$ B. $50\pi$ C. $40.5\pi$ D. $81\pi$ E. undeterminable

cat2006 quantitative-aptitude geometry

Answer key

## 7.42.69 Geometry: CAT 2006 | Question: 75 top

An equilateral triangle BP is drawn inside a square ABCD. What is the value of the angle APD in degrees?

A. 75 B. 90 C. 120 D. 135 E. 150

cat2006 quantitative-aptitude geometry

## 7.42.70 Geometry: CAT 2007 | Question: 03 top

Two circles with centres P and Q cut each other at two distinct points A and B. The circles have the same radii and neither P nor Q falls within the intersection of the circles. What is the smallest range that includes all possible values of the angle AQP in degrees?

A. Between 0 and 90 B. Between 0 and 30 C. Between 0 and 60 D. Between 0 and 75 E. Between 0 and 45

cat2007 quantitative-aptitude geometry

## 7.42.71 Geometry: CAT 2008 | Question: 07 top

In a triangle ABC, the lengths of the sides AB and AC equal 17.5 cm and 9 cm respectively. Let D be a point on the line segment BC such that AD is perpendicular to BC. If AD = 3 cm, then what is the radius (in cm) of the circle circumscribing the triangle ABC?

A. 17.05 B. 27.85 C. 22.45 D. 32.25 E. 26.25

cat2008 quantitative-aptitude geometry

## 7.42.72 Geometry: CAT 2008 | Question: 18 top

Consider a square ABCD with midpoints E, F, G, H of AB, BC, CD and DA respectively. Let L denote the line passing through F and H. Consider points P and Q, on L and inside ABCD, such that the angles APD and BQC both equal $120^\circ$.

What is the ratio of the area of ABQCDP to the remaining area inside ABCD?

A. $\frac{4\sqrt{2}}{3}$ B. $2+\sqrt{3}$ C. $\frac{10-3\sqrt{3}}{9}$ D. $1+\frac{1}{\sqrt{3}}$ E. $2\sqrt{3}-1$

cat2008 quantitative-aptitude geometry

Answer key

## 7.42.73 Geometry: CAT 2008 | Question: 19 top

Consider obtuse-angled triangles with sides 8 cm, 15 cm and $x$ cm. If x is an integer, then how many such triangles exist?

A. 5 B. 21 C. 10 D. 15 E. 14

cat2008 quantitative-aptitude geometry

Answer key

## 7.42.74 Geometry: CAT 2008 | Question: 23 top

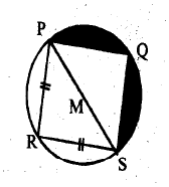
Two circles, both of radii 1 cm, intersect such that the circumference of each one passes through the centre of the other. What is the area (in sq cm) of the intersecting region?

A. $\frac{\pi}{3}-\frac{\sqrt{3}}{4}$
B. $\frac{2\pi}{3}+\frac{\sqrt{3}}{2}$
C. $\frac{4\pi}{3}-\frac{\sqrt{3}}{2}$
D. $\frac{4\pi}{3}+\frac{\sqrt{3}}{2}$
E. $\frac{2\pi}{3}-\frac{\sqrt{3}}{2}$

cat2008 quantitative-aptitude geometry

## 7.42.75 Geometry: CAT 2009 | Question: 18 top

M is the center of the circle. $l(\text{QS}) = 10\sqrt{2}$, $l(\text{PR}) = l(\text{RS})$ and PR∥QS. Find the area of the shaded region. (use $\pi = 3$)



a. 100 sq. units
b. 114 sq. units
c. 50 sq. units
d. 200 sq. units

cat2009 quantitative-aptitude geometry

## 7.42.76 Geometry: CAT 2010 | Question: 11 top

ABCD is a rectangle. The points P and Q lie on AD and AB respectively. If the triangle PAQ, QBC and PCD all have the same areas and BQ = 2, then AQ =

A. $1+\sqrt{5}$ B. $1-\sqrt{5}$ C. $\sqrt{7}$ D. $2\sqrt{7}$

cat2010 quantitative-aptitude geometry

## 7.42.77 Geometry: CAT 2010 | Question: 4 top

Consider the following statements :

When two straight lines intersect, then :

I. adjacent angles are complementary
II. adjacent angles are supplementary
III. opposite angles are equal
IV. opposite angles are supplementary

Of these statements:

A. (I) and (III) are correct
B. (II) and (III) are correct
C. (I) and (IV) are correct
D. (II) and (IV) are correct

cat2010 quantitative-aptitude geometry

Answer key

## 7.42.78 Geometry: CAT 2010 | Question: 5 top

A pole has to be erected on the boundary of a circular park of diameter 13 meters in such a way that the difference of its distances from two diametrically opposite fixed gates A and B on the boundary is 7 meters. The distance of the pole from one of the gates is:

A. 8 metres
B. 8.25 metres
C. 5 metres
D. None these

cat2010 quantitative-aptitude geometry

## 7.42.79 Geometry: CAT 2010 | Question: 6 top

From a square piece of card-board measuring $2a$ on each side of a box with no top is to be formed by cutting out from each corner a square with sides $b$ and bending up the flaps. The value of $b$ for which the box has the greatest volume is

A. $b = \frac{a}{5}$
B. $b = \frac{a}{4}$
C. $b = \frac{2a}{3}$
D. $b = \frac{a}{2}$

cat2010 quantitative-aptitude geometry

## 7.42.80 Geometry: CAT 2010 | Question: 7 top

The sum of the areas of two circles which touch each other externally is $153\pi$. If the sum of their radii is 15, find the ratio of the larger to the smaller radius

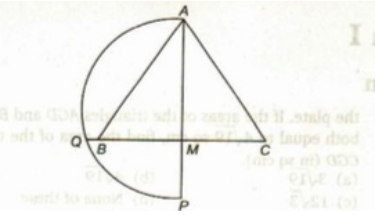
A. 4
B. 2
C. 3
D. None of these

cat2010 quantitative-aptitude geometry

Answer key

## 7.42.81 Geometry: CAT 2011 | Question: 10 top

In the figure alongside, $\triangle ABC$ is equilateral with area S. M is the mid-point of BC and P is a point on AM extended such that MP = BM. If the semi-circle on AP intersects CB extended at Q and the area of a square with MQ as a side is T, which of the following is true?

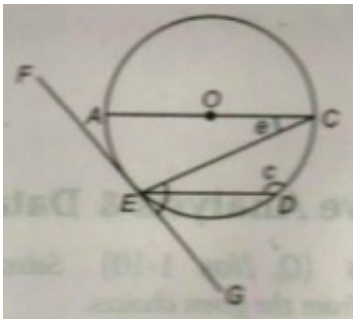


A. $T = \sqrt{2}\,S$
B. $T = S$
C. $T = \sqrt{3}\,S$
D. $T = 2S$

cat2011 quantitative-aptitude geometry

## 7.42.82 Geometry: CAT 2011 | Question: 14 top

In the figure alongside, O is the centre of the circle and AC is the diameter. The line FEG is tangent to the circle at E. If $\angle GEC = 52^\circ$, find the value of $\angle e + \angle c$.



A. $154^\circ$ B. $156^\circ$ C. $166^\circ$ D. $180^\circ$

cat2011 quantitative-aptitude geometry

## 7.42.83 Geometry: CAT 2011 | Question: 15 top

Rekha drew a circle of radius 2 cm on a graph paper of grid 1 cm × 1 cm. She then calculated the area of the circle by adding up only the number of full unit-squares that fell within the perimeter of the circle. If the value that Rekha obtained was $d$ sq cm. less than the correct value, then find the maximum possible value of $d$?

A. 6.28 B. 7.28 C. 7.56 D. 8.56

cat2011 quantitative-aptitude geometry

## 7.42.84 Geometry: CAT 2011 | Question: 16 top

Rekha drew a circle of radius 2 cm on a graph paper of grid 1 cm × 1 cm. She then calculated the area of the circle by adding up only the number of full unit-squares that fell within the perimeter of the circle. If the value that Rekha obtained was $d$ sq cm . less than the correct value,

In the above question what is the minimum possible value of $d$?

A. 4.56 B. 5.56 C. 6.56 D. 3.56

cat2011 quantitative-aptitude geometry

## 7.42.85 Geometry: CAT 2011 | Question: 5 top

On a plate in the shape of an equilateral triangle ABC with area $16\sqrt{3}$ sq cm, a rod GD, of height 8 cm, is fixed vertically at the centre of the triangle. G is a point on the plate. If the areas of the triangles AGD and BGD are both equal to $4\sqrt{19}$; sq cm, find the area of the triangle CGD (in sq cm).

A. $3\sqrt{19}$ B. $4\sqrt{19}$

C. $12\sqrt{3}$ D. None of these

cat2011 quantitative-aptitude geometry

## 7.42.86 Geometry: CAT 2012 | Question: 11 top

A rectangle is drawn such that none of its sides has length greater than '$a$'. All lengths less than '$a$' are equally likely. The chance that the rectangle has its diagonal greater than '$a$' is (in terms of %)

A. 29.3% B. 21.5% C. 66.66% D. 33.33%

cat2012 quantitative-aptitude geometry

## 7.42.87 Geometry: CAT 2012 | Question: 30 top

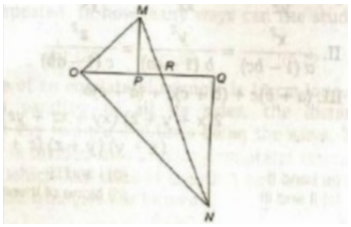
The side of an equilateral triangle is 10 cm long. By drawing parallels to all its sides, the distance between any two parallel lines being the same. The triangle is divided into smaller equilateral triangle, each of which has sides of length 1 cm. How many such small triangles are formed?

A. 60 B. 90 C. 120 D. None of these

cat2012 quantitative-aptitude geometry

## 7.42.88 Geometry: CAT 2012 | Question: 7 top

In the figure below, $\angle MON = \angle MPO = \angle NQO = 90^\circ$ and OQ is the bisector of $\angle MON$ and QN = 10, OR = 40/7. Find OP.



A. 4.8 B. 4.5 C. 4 D. 5

cat2012 quantitative-aptitude geometry

## 7.42.89 Geometry: CAT 2013 | Question: 10 top

$a$, $b$ and $c$ are the lengths of the triangle ABC and $d$, $e$ and $f$ are the lengths of the sides of the triangle DEF. If the following equations hold true:

- $a(a+b+c) = d^2$
- $b(a+b+c) = e^2$
- $c(a+b+c) = f^2$

then which of the following is always true of triangle DEF?

A. It is an acute-angled triangle
B. It is an right-angled triangle
C. It is an obtuse-angled triangle
D. None of the above

cat2013 quantitative-aptitude geometry

## 7.42.90 Geometry: CAT 2013 | Question: 16 top

In a triangle PQR, PQ = 12 cm and PR = 9 cm and $\angle Q + \angle R = 120^\circ$. Find the length of QR

A. $\frac{15}{\sqrt{2}}$ cm B. $3\sqrt{13}$ cm C. $5\sqrt{5}$ cm D. $5\sqrt{17}$ cm

cat2013 quantitative-aptitude geometry

## 7.42.91 Geometry: CAT 2013 | Question: 17 top

In a triangle PQR, PQ = 12 cm and PR = 9 cm and $\angle Q + \angle R = 120^\circ$. If the angle bisector of $\angle P$ meets QR at M, find the length of PM

A. $\frac{28\sqrt{5}}{9}$ cm B. $\frac{42\sqrt{5}}{11}$ cm C. $\frac{36\sqrt{3}}{7}$ cm D. $4\sqrt{3}$

cat2013 quantitative-aptitude geometry

## 7.42.92 Geometry: CAT 2013 | Question: 27 top

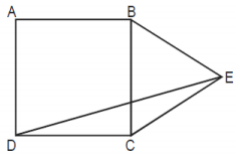
Each side of a polygon is either parallel to the $x$-axis or parallel to the $y$-axis. A corner of the polygon is known as convex if the corresponding internal angle is $90^\circ$ and as concave if the corresponding internal angle is $270^\circ$. If the polygon has 26 convex corners, the number of its concave corners is

A. 18 B. 22 C. 26 D. 24

cat2013 quantitative-aptitude geometry

## 7.42.93 Geometry: CAT 2014 | Question: 1 top

If ABCD is a square and BCE is an equilateral triangle, what is the measure of angle $\angle DEC$?



a. $15^\circ$ b. $30^\circ$ c. $20^\circ$ d. $45^\circ$

cat2014 quantitative-aptitude geometry

## 7.42.94 Geometry: CAT 2014 | Question: 10 top

A circle is inscribed in a given square and another circle is circumscribed about the square. What is the ratio of the area of the inscribed circle to that of the circumscribed circle?

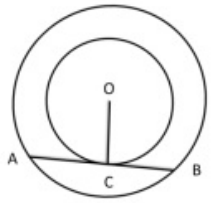
a. 2 : 3 b. 3 : 4 c. 1 : 4 d. 1 : 2

cat2014 quantitative-aptitude geometry

Answer key

## 7.42.95 Geometry: CAT 2014 | Question: 27 top

The line AB is 6 metres in length and is tangent to the inner one of the two concentric circles at point C. It is known that the radii of the two circles are integers. The radius of the outer circle is



a. 5 metres
b. 4 metres
c. 6 metres
d. 3 metres

cat2014 quantitative-aptitude geometry

Answer key

## 7.42.96 Geometry: CAT 2014 | Question: 3 top

From a circular sheet of paper with a radius 20 cm, four circles of radius 5 cm each are cut out. What is the ratio of the uncut to the cut portion?

a. 1 : 3 b. 4 : 1 c. 3 : 1 d. 4 : 3

cat2014 quantitative-aptitude geometry

## 7.42.97 Geometry: CAT 2014 | Question: 49 top

Two circles with centres P and Q cut each other at two distinct points A and B. The circles have the same radii and neither P nor Q falls within the intersection of the circles. What is the smallest range that includes all possible values of the angle AQP in degrees?

a. Between 0 and 90
b. Between 0 and 30
c. Between 0 and 60
d. Between 0 and 75

cat2014 quantitative-aptitude geometry

Answer key

## 7.42.98 Geometry: CAT 2015 | Question: 71 top

ABCD is a square of area 4 with diagonals AC and BD, dividing square into 4 congruent triangles. Figure looks like four non-over lapping triangles. Then the sum of the perimeters of the triangles is

A. $8\left(2+\sqrt{2}\right)$

B. $8\left(1+\sqrt{2}\right)$

C. $4\left(1+\sqrt{2}\right)$

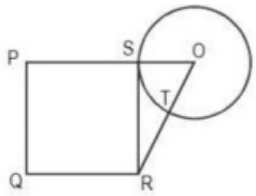
D. $4\left(2+\sqrt{2}\right)$

cat2015 quantitative-aptitude geometry

Answer key

## 7.42.99 Geometry: CAT 2015 | Question: 72 top

PQRS is a square. SR is a tangent (at point S) to the circle with centre O and TR = OS. Then the ratio of area of the circle to the area of the square is



A. $\pi/3$

B. $11/7$

C. $3/\pi$

D. $7/11$

cat2015 quantitative-aptitude geometry

Answer key

## 7.42.100 Geometry: CAT 2015 | Question: 73 top

From a circular sheet of paper with a radius 20 cm, four circles of radius 5 each are cut out. What is the ratio of the uncut to the cut portion?

A. 1:3

B. 4:1

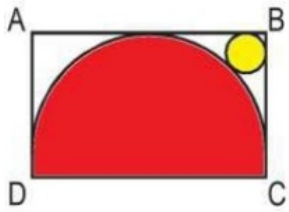
C. 3:1

D. 4:3

cat2015 quantitative-aptitude geometry

## 7.42.101 Geometry: CAT 2015 | Question: 76 top

The figure shows the rectangle ABCD with a semicircle and a circle inscribed inside in it as shown. What is the ratio of the area of the circle to that of the semicircle?



A. $\left(\sqrt{2}-1\right)^2:1$

B. $2\left(\sqrt{2}-1\right)^2:1$

C. $\left(\sqrt{2}-1\right)^2:2$

D. None of these

cat2015 quantitative-aptitude geometry

Answer key

## 7.42.102 Geometry: CAT 2015 | Question: 80 top

ABCD is a rhombus with the diagonals AC and BD intersecting at the origin on the $x$-$y$ plane. The equation of the straight line AD is $x+y=1$. What is the equation of BC?

A. $x+y=-1$

B. $x-y=-1$

C. $x+y=1$

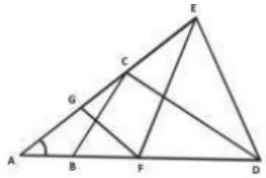
D. None of these

cat2015 quantitative-aptitude geometry

Answer key

## 7.42.103 Geometry: CAT 2015 | Question: 83 top

In the figure above, AB = BC = CD = DE = EF = FG = GA . Then $\angle$ DAE is approximately



A. $15^\circ$ B. $20^\circ$ C. $30^\circ$ D. $25^\circ$

cat2015 quantitative-aptitude geometry

## 7.42.104 Geometry: CAT 2016 | Question: 67 top

Direction for questions: Answer the questions based on the following information.

In a locality, there are five small cities: A, B, C, D and E. The distances of these cities from each other are as follows. AB = 2 km; AC = 2 km; AD > 2 km; AE > 3 km; BC = 2 km; BD = 4 km; BE = 3 km; CD = 2 km; CE = 3 km; DE > 3 km.

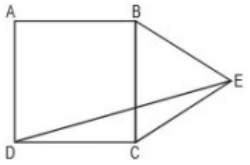
If a ration shop is to be set up within 3 km of each city, how many ration shops will be required?

A. 1 B. 2 C. 3 D. 4

cat2016 quantitative-aptitude geometry

## 7.42.105 Geometry: CAT 2016 | Question: 69 top

If ABCD is a square and BCE is an equilateral triangle, what is the measure of $\angle DEC$?



A. $15^\circ$ B. $30^\circ$ C. $20^\circ$ D. $45^\circ$

cat2016 quantitative-aptitude geometry

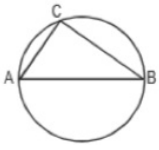
## 7.42.107 Geometry: CAT 2016 | Question: 76 top

The figure shows a circle of diameter AB and radius 6.5 cm.



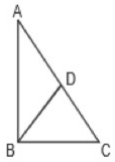
If chord CA is 5 cm long, find the area of $\triangle ABC$ _____

cat2016 quantitative-aptitude geometry numerical-answer

Answer key

## 7.42.108 Geometry: CAT 2016 | Question: 79 top

In $\triangle ABC$, $\angle B$ is a right angle, AC = 6 cm, and D is the mid-point of AC. The length of BD is _____



cat2016 quantitative-aptitude geometry numerical-answer

Answer key

## 7.42.109 Geometry: CAT 2017 Set-1 | Question: 82 top

From a triangle ABC with sides of lengths 40 ft, 25 ft and 35 ft, a triangular portion GBC is cut off where G is the centroid of ABC. The area, in sq ft, of the remaining portion of triangle ABC is

A. $225\sqrt{3}$

B. $\frac{500}{\sqrt{3}}$

C. $\frac{275}{\sqrt{3}}$

D. $\frac{250}{\sqrt{3}}$

cat2017-1 quantitative-aptitude geometry

## 7.42.110 Geometry: CAT 2017 Set-1 | Question: 83 top

Let ABC be a right-angled isosceles triangle with hypotenuse BC. Let BQC be a semi-circle, away from A, with diameter BC. Let BPC be an arc of a circle centered at A and lying between BC and BQC. If AB has length 6 cm then the area, in sq cm, of the region enclosed by BPC and BQC is

A. $9\pi - 18$ B. 18 C. $9\pi$ D. 9

cat2017-1 quantitative-aptitude geometry

Answer key

## 7.42.111 Geometry: CAT 2017 Set-1 | Question: 86 top

Let ABC be a right-angled triangle with BC as the hypotenuse. Lengths of AB and AC are 15 km and 20 km, respectively. The minimum possible time, in minutes, required to reach the hypotenuse from A at a speed of 30 km per hour is

A. 23 B. 22 C. None of these D. 24

cat2017-1 quantitative-aptitude geometry

Answer key

## 7.42.112 Geometry: CAT 2017 Set-1 | Question: 95 top

Let AB, CD, EF, GH, and JK be five diameters of a circle with center at O. In how many ways can three points be chosen out of A, B, C, D, E, F, G, H, J, K, and O so as to form a triangle?

A. 160 B. 159 C. 169 D. 150

cat2017-1 quantitative-aptitude geometry

Answer key

## 7.42.113 Geometry: CAT 2017 Set-2 | Question: 81 top

Let ABCDEF be a regular hexagon with each side of length 1 cm. The area (in sq cm) of a square with AC as one side is

A. $3\sqrt{2}$ B. 3 C. 4 D. $\sqrt{3}$

cat2017-2 quantitative-aptitude geometry

Answer key

## 7.42.114 Geometry: CAT 2017 Set-2 | Question: 82 top

The base of a vertical pillar with uniform cross section is a trapezium whose parallel sides are of lengths 10 cm and 20 cm

while the other two sides are of equal length. The perpendicular distance between the parallel sides of the trapezium is 12 cm. If the height of the pillar is 20 cm, then the total area, in sq cm, of all six surfaces of the pillar is

A. 1300 B. 1340 C. 1480 D. 1520

cat2017-2 quantitative-aptitude geometry

Answer key

### 7.42.115 Geometry: CAT 2017 Set-2 | Question: 84 top

ABCD is a quadrilateral inscribed in a circle with centre O. If $\angle COD = 120$ degrees and $\angle BAC = 30$ degrees, then the value of $\angle BCD$ (in degrees) is

A. 89 B. 87 C. 86 D. 90

cat2017-2 quantitative-aptitude geometry

Answer key

### 7.42.116 Geometry: CAT 2017 Set-2 | Question: 85 top

If three sides of a rectangular park have a total length 400 ft, then the area of the park is maximum when the length (in ft) of its longer side is

A. 299 B. 200 C. 201 D. 399

cat2017-2 quantitative-aptitude geometry

Answer key

### 7.42.117 Geometry: CAT 2017 Set-2 | Question: 86 top

Let P be an interior point of a right-angled isosceles triangle ABC with hypotenuse AB. If the perpendicular distance of P from each of AB, BC, and CA is $4\left(\sqrt{2}-1\right)$cm, then the area, in sq cm, of the triangle ABC is

A. 16 B. 15 C. 14 D. 12

cat2017-2 quantitative-aptitude geometry

Answer key

### 7.42.118 Geometry: CAT 2018 Set-1 | Question: 73 top

In a circle, two parallel chords on the same side of a diameter have lengths 4 cm and 6 cm. If the distance between these chords is 1 cm, then the radius of the circle, in cm, is

A. $\sqrt{12}$ B. $\sqrt{14}$ C. $\sqrt{13}$ D. $\sqrt{11}$

cat2018-1 quantitative-aptitude geometry

Answer key

### 7.42.119 Geometry: CAT 2018 Set-1 | Question: 76 top

Given an equilateral triangle T1 with side 24 cm, a second triangle T2 is formed by joining the midpoints of the sides of T1. Then a third triangle T3 is formed by joining the midpoints of the sides of T2. If this process of forming triangles is continued, the sum of the areas, in sq cm, of infinitely many such triangles T1, T2, T3, … will be

A. $164\sqrt{3}$ B. $188\sqrt{3}$ C. $248\sqrt{3}$ D. $192\sqrt{3}$

cat2018-1 quantitative-aptitude geometry

Answer key

### 7.42.120 Geometry: CAT 2018 Set-1 | Question: 80 top

Points E, F, G, H lie on the sides AB, BC, CD, and DA, respectively, of a square ABCD. If EFGH is also a square whose area is 62.5% of that of ABCD and CG is longer than EB, then the ratio of length of EB to that of CG is

A. 2:5 B. 4:9 C. 3:8 D. 1:3

cat2018-1 quantitative-aptitude geometry

Answer key

## 7.42.121 Geometry: CAT 2018 Set-1 | Question: 88 top

Let ABCD be a rectangle inscribed in a circle of radius 13 cm. Which one of the following pairs can represent, in cm, the possible length and breadth of ABCD?

A. 24, 10 B. 25, 9 C. 24, 12 D. 25, 10

cat2018-1 quantitative-aptitude geometry

Answer key

## 7.42.122 Geometry: CAT 2018 Set-1 | Question: 89 top

In a parallelogram ABCD of area 72 sq cm, the sides CD and AD have lengths 9 cm and 16 cm, respectively. Let P be a point on CD such that AP is perpendicular to CD. Then the area, in sq cm, of triangle APD is

A. $18\sqrt{3}$ B. $24\sqrt{3}$ C. $32\sqrt{3}$ D. $12\sqrt{3}$

cat2018-1 quantitative-aptitude geometry

Answer key

## 7.42.123 Geometry: CAT 2018 Set-1 | Question: 90 top

In a circle with center O and radius 1 cm, an arc AB makes an angle 60 degrees at O. Let R be the region bounded by the radii OA, OB and the arc AB. If C and D are two points on OA and OB, respectively, such that OC = OD and the area of triangle OCD is half that of R, then the length of OC, in cm, is

A. $\left(\frac{\pi}{3\sqrt{3}}\right)^{\frac{1}{2}}$ B. $\left(\frac{\pi}{4}\right)^{\frac{1}{2}}$

C. $\left(\frac{\pi}{6}\right)^{\frac{1}{2}}$ D. $\left(\frac{\pi}{4\sqrt{3}}\right)^{\frac{1}{2}}$

cat2018-1 quantitative-aptitude geometry

Answer key

## 7.42.124 Geometry: CAT 2018 Set-2 | Question: 72 top

On a triangle ABC, a circle with diameter BC is drawn, intersecting AB and AC at points P and Q, respectively. If the lengths of AB, AC, and CP are 30 cm, 25 cm, and 20 cm respectively, then the length of BQ, in cm, is _____

cat2018-2 quantitative-aptitude geometry numerical-answer

Answer key

## 7.42.125 Geometry: CAT 2018 Set-2 | Question: 73 top

A chord of length 5 cm subtends an angle of $60^\circ$ at the centre of a circle. The length, in cm, of a chord that subtends an angle of $120^\circ$ at the centre of the same circle is

A. 8 B. $6\sqrt{2}$ C. $5\sqrt{3}$ D. $2\pi$

cat2018-2 quantitative-aptitude geometry

Answer key

## 7.42.126 Geometry: CAT 2018 Set-2 | Question: 86 top

A parallelogram ABCD has area 48 sqcm. If the length of CD is 8 cm and that of AD is $s$ cm, then which one of the following is necessarily true?

A. $s \geq 6$ B. $s \neq 6$ C. $s \leq 6$ D. $5 \leq s \leq 7$

cat2018-2 quantitative-aptitude geometry

Answer key

### 7.42.127 Geometry: CAT 2018 Set-2 | Question: 94 top

The area of a rectangle and the square of its perimeter are in the ratio $1:25$. Then the lengths of the shorter and longer sides of the rectangle are in the ratio

A. $1:4$ B. $2:9$ C. $1:3$ D. $3:8$

cat2018-2 quantitative-aptitude geometry

Answer key

### 7.42.128 Geometry: CAT 2018 Set-2 | Question: 96 top

From a rectangle ABCD of area 768 sq cm, a semicircular part with diameter AB and area $72\pi$ sq cm is removed. The perimeter of the leftover portion, in cm, is

A. $80 + 16\pi$ B. $86 + 8\pi$ C. $82 + 24\pi$ D. $88 + 12\pi$

cat2018-2 quantitative-aptitude geometry

Answer key

### 7.42.129 Geometry: CAT 2018 Set-2 | Question: 97 top

A triangle ABC has area 32 sq units and its side BC, of length 8 units, lies on the line $x = 4$. Then the shortest possible distance between A and the point $(0, 0)$ is

A. 4 units B. 8 units C. $4\sqrt{2}$ units D. $2\sqrt{2}$ units

cat2018-2 quantitative-aptitude geometry

Answer key

### 7.42.130 Geometry: CAT 2019 Set-1 | Question: 71 top

Corners are cut off from an equilateral triangle T to produce a regular hexagon H. Then, the ratio of the area of H to the area of T is

A. $5:6$ B. $4:5$ C. $3:4$ D. $2:3$

cat2019-1 quantitative-aptitude geometry

Answer key

### 7.42.131 Geometry: CAT 2019 Set-1 | Question: 76 top

In a circle of radius 11 cm, CD is a diameter and AB is a chord of length 20.5 cm. If AB and CD intersect at a point E inside the circle and CE has length 7 cm, then the difference of the lengths of BE and AE, in cm, is

A. 2.5 B. 3.5 C. 0.5 D. 1.5

cat2019-1 quantitative-aptitude geometry

Answer key

### 7.42.132 Geometry: CAT 2019 Set-1 | Question: 86 top

AB is a diameter of a circle of radius 5 cm. Let P and Q be two points on the circle so that the length of PB is 6 cm, and the length of AP is twice that of AQ. Then the length, in cm, of QB is nearest to

A. 7.8 B. 8.5 C. 9.1 D. 9.3

cat2019-1 quantitative-aptitude geometry

Answer key

### 7.42.133 Geometry: CAT 2019 Set-2 | Question: 72 top

Two circles, each of radius 4 cm, touch externally. Each of these two circles is touched externally by a third circle. If these

three circles have a common tangent, then the radius of the third circle, in cm, is

A. $\sqrt{2}$ B. $\frac{\pi}{3}$ C. $\frac{1}{\sqrt{2}}$ D. 1

cat2019-2 quantitative-aptitude geometry

Answer key

## 7.42.134 Geometry: CAT 2019 Set-2 | Question: 82 top

In a triangle ABC, medians AD and BE are perpendicular to each other, and have lengths 12 cm and 9 cm, respectively. Then, the area of triangle ABC, in sq cm. is

A. 68 B. 72 C. 78 D. 80

cat2019-2 quantitative-aptitude geometry

Answer key

## 7.42.135 Geometry: CAT 2019 Set-2 | Question: 93 top

Let ABC be a right-angled triangle with hypotenuse BC of length 20 cm. If AP is perpendicular on BC, then the maximum possible length of AP, in cm, is

A. 10 B. $6\sqrt{2}$ C. $8\sqrt{2}$ D. 5

cat2019-2 quantitative-aptitude geometry

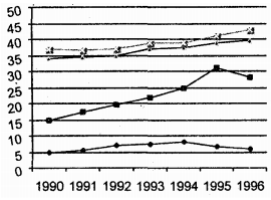
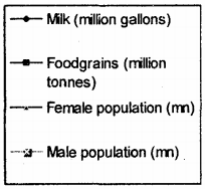
## 7.43.20 Graphs: CAT 1997 | Question: 166 top

These questions are based on the following graph.





Referring to the above question, in which year was the per capita consumption of this nutrient the highest?

A. 1993 B. 1994 C. 1995 D. 1996

cat1997 quantitative-aptitude data-interpretation graphs

## 7.43.21 Graphs: CAT 2000 | Question: 104 top

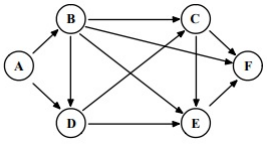
There are three cities A, B and C, each of these cities is connected with the other two cities by at least one direct road. If a traveller wants to go from one city (origin) to another city (destination), she can do so either by traversing a road connecting the two cities directly, or by traversing two roads, the first connecting the origin to the third city and the second connecting the third city to the destination. In all there are 33 routes from A to B (including those via C). Similarly there are 23 routes from B to C (including those via A). How many roads are there from A to C directly?

A. 6 B. 3 C. 5 D. 10

cat2000 quantitative-aptitude graphs

## 7.43.22 Graphs: CAT 2001 | Question: 47 top

The figure below shows the network connecting cities A, B, C, D, E and F. The arrows indicate permissible direction of travel. What is the number of distinct paths from A to F?



A. 9 B. 10 C. 11 D. None of these

Answer key

### 7.43.23 Graphs: CAT 2003 | Question: 1-148 top

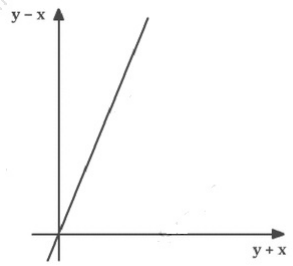
A graph may be defined as a set of points connected by lines called edges. Every edge connects a pair of points. Thus, a triangle is a graph with 3 edges and three points. The degree of the point is the number of edges connected to it. For example, A triangle is a graph with three points of 2 degree each. Consider a graph with 12 points. It is possible to reach any point from any other point through a sequence of edges. The number of edges, $e$, in the graph must satisfy the condtion

A. $11 \leq e \leq 66$
B. $10 \leq e \leq 66$
C. $11 \leq e \leq 65$
D. $0 \leq e \leq 11$

cat2003-1 quantitative-aptitude graphs

### 7.43.24 Graphs: CAT 2006 | Question: 61 top

The graph $y - x$ against $y + x$ is as shown as below. (all graphs in this question are drawn to scale and the same scale has been used on



each axis). Then, Which of the options given shows the graph of $y$ against $x$.

A. B. C. D. E.

## 7.46 Income Expenditure (1) top

### 7.46.1 Income Expenditure: What is the total income in pounds of the taxi driver for the whole year? top

A taxi driver works 46 weeks of the year and gets an average of 70 customers per week which average 4 miles each at 90 pence per mile.

Her expenditure is as follows:

| | |
|---|---|
| Car Service/Repair/MOT/Insurance | £1,250 per annum |
| Diesel fuel costs | 6 pence per mile. |
| Mortgage costs | £250 per month |
| Other expenditure - food/electricity etc. | £125 per week |

What is the total income in pounds of the taxi driver for the whole year?

1. 11,592
2. 12,192
3. 12,692
4. 12,992
5. 13,192

What is the total expenditure over the year to the nearest pound?

1. 9,353
2. 9,953
3. 10,453
4. 10,953
5. 11,523

What is her average excess of income over expenditure per month to the nearest pound?

1. 6

## 7.57 Mensuration (23) top

### 7.57.1 Mensuration: CAT 2000 | Question: 109 top

Two full tanks, one shaped like a cylinder and the other like a cone, contain jet fuel. The cylindrical tank holds 500 litres more than the conical tank. After 200 litres of fuel has been pumped out from each tank the cylindrical tank contains twice the amount of fuel in the conical tank. How many litres of fuel did the cylindrical tank have when it was full?

A. 700 B. 1000 C. 1100 D. 1200

cat2000 quantitative-aptitude mensuration

### 7.57.2 Mensuration: CAT 2003 | Question: 1-107 top

Let A and B two solid spheres such that the surface area of B is 300% higher than the surface area of A. The volume of area is found to be $k$% lower than the volume of B. The value of $k$ must be _____

A. 85.5 B. 92.5 C. 90.5 D. 87.5

cat2003-1 quantitative-aptitude mensuration

### 7.57.3 Mensuration: CAT 2003 | Question: 1-138 top

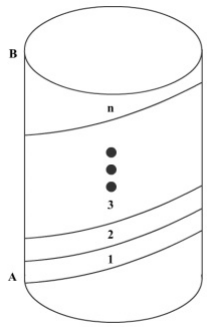
There are 8436 steel balls, each with a radius of 1 centimeter, stacked in a pile, with 1 ball on top, 3 balls in second layer, 6 in the third layer, 10 in the fourth, and so on. The number of horizontal layers in the pile is

A. 34 B. 38 C. 36 D. 32

cat2003-1 quantitative-aptitude mensuration

## 7.57.4 Mensuration: CAT 2003 | Question: 2-63 top

Consider a cylinder of height h cms and radius $r = \frac{2}{\pi}$ cms as shown in the figure (not drawn to scale). A string of a certain length, when wound on its cylindrical surface, starting at point A and ending at point B, gives a maximum of n turns (in other words, the string"s length is the minimum length required to wind n turns.)
What is the vertical spacing in cms between two consecutive turns?



A. $\frac{h}{n}$

B. $\frac{h}{\sqrt{n}}$

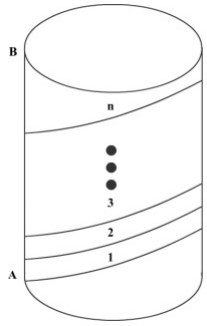
C. $\frac{h}{n^2}$

D. Cannot be determined with given information

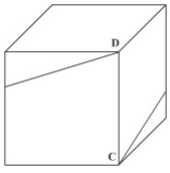
cat2003-2 quantitative-aptitude mensuration

## 7.57.5 Mensuration: CAT 2003 | Question: 2-64 top

Consider a cylinder of height $h$ cms and radius $r = \frac{2}{\pi}$ cms as shown in the figure (not drawn to scale). A string of a certain length, when wound on its cylindrical surface, starting at point A and ending at point B, gives a maximum of $n$ turns (in other words, the string"s length is the minimum length required to wind $n$ turns.)



The same string, when wound on the exterior four walls of a cube of side $n$ cms, starting at point C and ending at point D, can give exactly one turn (see figure, not drawn to scale). The length of the string, in cms, is

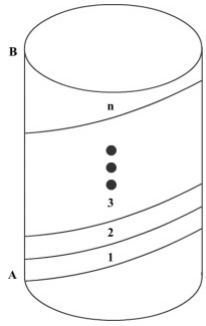


A. $\sqrt{2}n$ B. $\sqrt{12}n$ C. $n$ D. $\sqrt{13}n$

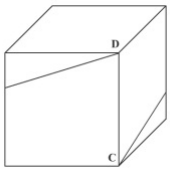
cat2003-2 quantitative-aptitude mensuration

## 7.57.6 Mensuration: CAT 2003 | Question: 2-65 top

Consider a cylinder of height $h$ cms and radius $r = \frac{2}{\pi}$ cms as shown in the figure (not drawn to scale). A string of a certain length, when wound on its cylindrical surface, starting at point A and ending at point B, gives a maximum of $n$ turns (in other words, the string"s length is the minimum length required to wind $n$ turns.)



The same string, when wound on the exterior four walls of a cube of side $n$ cms, starting at point C and ending at point D, can give exactly one turn (see figure, not drawn to scale).



How is $h$ related to $n$?

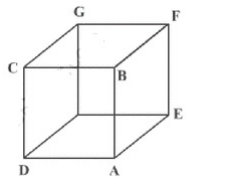
A. $h = \sqrt{2}n$ B. $h = \sqrt{17}n$ C. $h = n$ D. $h = \sqrt{13}n$

cat2003-2 quantitative-aptitude mensuration

Answer key

## 7.57.7 Mensuration: CAT 2004 | Question: 72 top

If the lengths of diagonals DF, AG and CE of the cube shown in the adjoining figure are equal to the three sides of a triangle, then the radius of the circle circumscribing that triangle will be



A. equal to the sides of the cube

B. $\sqrt{3}$ times the sides of the cube

C. $\frac{1}{\sqrt{3}}$ times the sides of the cube

D. impossible to find from the given information

### 7.62.30 Number Systems: CAT 2003 | Question: 1-118 top

How many even integers $n$, where $100 \leq n \leq 200$, are divisible neither by 7 nor by 9?

A. 40 B. 37 C. 39 D. 38

cat2003-1 quantitative-aptitude number-systems

### 7.62.31 Number Systems: CAT 2003 | Question: 1-119 top

A positive whole number M less than 100 is represented in base 2 notation, in base 3 notation, and base 5 notation. It is found that in all three cases the last digit is 1, while in exactly two out of three cases the leading digit is 1. Then M equals

A. 31 B. 63 C. 75 D. 91

cat2003-1 quantitative-aptitude number-systems

### 7.62.32 Number Systems: CAT 2003 | Question: 1-139 top

If the product of $n$ positive real numbers is unity, then their sum is necessarily

A. a multiple of $n$

B. equal to $n + \left(\frac{1}{n}\right)$

C. never less than $n$

D. a positive integer

cat2003-1 quantitative-aptitude number-systems

### 7.62.33 Number Systems: CAT 2003 | Question: 1-146 top

In a certain examination paper, there are n questions. For $j = 1, 2, \ldots, n$, there are $2^{n-i}$ students who answered $j$ or more questions wrongly. If the total number of wrong answer is 4095, then the value of $n$ is

A. 12 B. 11 C. 10 D. 9

cat2003-1 quantitative-aptitude number-systems

### 7.62.34 Number Systems: CAT 2003 | Question: 1-149 top

The number of positive integers $n$ in the range $12 \leq n \leq 40$ such that the product $(n-1)(n-2)\ldots3 \cdot 2 \cdot 1$ is not divisible by $n$ is

A. 5 B. 7 C. 13 D. 14

cat2003-1 quantitative-aptitude number-systems

### 7.62.35 Number Systems: CAT 2003 | Question: 1-150 top

Let T be the set of integers $\{3, 11, 19, 27, \ldots, 451, 459, 467\}$ and S be a subset of T such that the sum of no two elements of S is 470. The maximum possible number of elements in S is

A. 32 B. 28 C. 29 D. 30

cat2003-1 quantitative-aptitude number-systems

### 7.62.36 Number Systems: CAT 2003 | Question: 2-52 top

In a coastal village, every year floods destroy exactly half of the huts. After the flood water recedes, twice the number of huts destroyed are rebuilt. The floods occurred consecutively in the last three years namely 2001, 2002 and 2003. If floods are again expected in 2004, the number of huts expected to be destroyed is:

A. Less than the number of huts existing at the beginning of 2001.
B. Less than the total number of huts destroyed by floods in 2001 and 2003.
C. Less than the total number of huts destroyed by floods in 2002 and 2003.
D. More than the total number of huts built in 2001 and 2002.

cat2003-2 quantitative-aptitude number-systems

Answer key

## 7.62.37 Number Systems: CAT 2003 | Question: 2-61 top

Let $n(>1)$ be a composite integer such that $\sqrt{n}$ is not an integer. Consider the following statements

A. $n$ has a perfect integer–valued divisor which is greater than 1 and less than $\sqrt{n}$.

B. $n$ has a perfect integer–valued divisor which is greater than $\sqrt{n}$ but less than $n$.

Then,

A. Both A and B are false
B. A is true but B is false
C. A is false but B is true
D. Both A and B are true

cat2003-2 quantitative-aptitude number-systems

## 7.62.38 Number Systems: CAT 2003 | Question: 2-77 top

What is the remainder when $4^{96}$ is divided by 6?

A. 0 B. 2 C. 3 D. 4

cat2003-2 quantitative-aptitude number-systems

Answer key

## 7.62.39 Number Systems: CAT 2003 | Question: 2-94 top

What is the sum of all two-digit numbers that give a remainder of 3 when they are divided by 7?

A. 666 B. 676 C. 683 D. 777

cat2003-2 quantitative-aptitude number-systems

Answer key

## 7.62.40 Number Systems: CAT 2003 | Question: 2-98 top

**Answer the questions on the basis of the information given below.**
The seven basic symbols in a certain numeral system and their respective values are as follows:
I = 1, V = 5, X = 10, L = 50, C = 100, D = 500, and M = 1000
In general, the symbols in the numeral system are read from left to right, starting with the symbol representing the largest value; the same symbol cannot occur continuously more than three times; the value of the numeral is the sum of the values of the symbols. For example, XXVII = 10 + 10 + 5 + 1 + 1 = 27. An exception to the left-to-right reading occurs when a symbol is followed immediately by a symbol of greater value; then, the smaller value is subtracted from the large. For example, XLVI = (50– 10) + 5 + 1 = 46.

The value of the numeral MDCCLXXXVII is

A. 1687 B. 1787 C. 1887 D. 1987

cat2003-2 quantitative-aptitude number-systems

Answer key

## 7.62.41 Number Systems: CAT 2003 | Question: 2-99 top

**Answer the questions on the basis of the information given below.**
The seven basic symbols in a certain numeral system and their respective values are as follows:
I = 1, V = 5, X = 10, L = 50, C = 100, D = 500, and M = 1000
In general, the symbols in the numeral system are read from left to right, starting with the symbol representing the largest value; the same symbol cannot occur continuously more than three times; the value of the numeral is the sum of the values of the symbols. For example, XXVII = 10 + 10 + 5 + 1 + 1 = 27. An exception to the left-to-right reading occurs when a symbol is followed immediately by a symbol of greater value; then, the smaller value is subtracted from the large. For example, XLVI = (50– 10) + 5 + 1 = 46.

The value of the numeral MCMXCIX is

A. 1999 B. 1899 C. 1989 D. 1889

cat2003-2 quantitative-aptitude number-systems

Answer key

## 7.62.42 Number Systems: CAT 2004 | Question: 42 top

N persons stand on the circumference of a circle at distinct points. Each possible pair of persons, not standing next to each other, sings a two minute song one pair after the other. If the total time taken for singing is 28 minutes then what is N?

A. 5 B. 7 C. 9 D. None of these

cat2004 quantitative-aptitude number-systems

Answer key

## 7.62.43 Number Systems: CAT 2004 | Question: 45 top

On January 1 2004, two new societies, $S_1$ and $S_2$ are formed, each with $n$ members. On the first day of each subsequent month, $S_1$ adds $b$ members and $S_2$ multiplies its current number of members by a constant factor $r$. Both societies have the same number of members on July 2, 2004. If $b = 10.5n$, what is the value of $r$?

A. 2.0 B. 1.9 C. 1.8 D. 1.7

cat2004 quantitative-aptitude number-systems

Answer key

## 7.62.44 Number Systems: CAT 2004 | Question: 48 top

Suppose $n$ is an integer such that the sum of the digits of $n$ is 2, and $10^{10} < n < 10^{11}$. The number of different values for $n$ is

A. 11 B. 10 C. 9 D. 8

cat2004 quantitative-aptitude number-systems

Answer key

## 7.62.45 Number Systems: CAT 2004 | Question: 53 top

Each family in a locality has at most two adults, and no family has fewer than three children. Considering all the families together, there are more adults than boys, more boys than girls, and more girls than families. Then the minimum possible number of family in the locality is

A. 4 B. 5 C. 2 D. 3

cat2004 quantitative-aptitude number-systems

Answer key

## 7.62.46 Number Systems: CAT 2004 | Question: 67 top

The remainder, when $(15^{23} + 23^{23})$ is divided by 19, is

A. 4 B. 15 C. 0 D. 18

cat2004 quantitative-aptitude number-systems

## 7.62.47 Number Systems: CAT 2005 | Question: 01 top

If $x = (16^3 + 17^3 + 18^3 + 19^3)$ then $x$ divided by 70 leaves a remainder of

A. 0 B. 1 C. 69 D. 35

cat2005 quantitative-aptitude number-systems

Answer key

## 7.62.48 Number Systems: CAT 2005 | Question: 11 top

Let $n! = 1 \times 2 \times 3 \times \cdots \times n$ for integer $n \geq 1$. If $p = 1!(2 \times 2!) + (3 \times 3!) + \cdots + (10 \times 10!)$, then $p + 2$ when divided by 11! leaves a remainder of

A. 10 B. 0 C. 7 D. 1

cat2005 quantitative-aptitude number-systems

## 7.62.49 Number Systems: CAT 2005 | Question: 13 top

The digits of a three digit number A are written in the reverse order to form another three digit number B. If B is greater than A and B-A is perfectly divisible by 7, then which of the following is necessarily true?

A. $100 < A < 299$
B. $106 < A < 305$
C. $112 < A < 311$
D. $118 < A < 317$

cat2005 quantitative-aptitude number-systems

Answer key

## 7.62.50 Number Systems: CAT 2005 | Question: 16 top

The rightmost non zero digit of the number $30^{2720}$ is

1. 1
2. 3
3. 7
4. 9

cat2005 quantitative-aptitude number-systems

Answer key

## 7.62.51 Number Systems: CAT 2005 | Question: 19 top

For a positive integer $n$, let $P_n$ denote product of the digits of $n$ and $S_n$ denote the sum of the digits of $n$ The number of integers between 10 and 1000 for which $P_n + S_n = n$ is

A. 81 B. 16 C. 18 D. 9

cat2005 quantitative-aptitude number-systems

Answer key

## 7.62.52 Number Systems: CAT 2005 | Question: 25 top

Let S be a positive integer such that every element $n$ of S satisfies the conditions

a. $1000 \leq n \leq 1200$ b. every digit in $n$ is odd Then how many elements of S are divisible by 3?

A. 9 B. 10 C. 11 D. 12

cat2005 quantitative-aptitude number-systems

## 7.62.53 Number Systems: CAT 2005 | Question: 29 top

Three Englishmen and three Frenchmen work for the same company. Each of them knows a secret not known to others. They need to exchange these secrets over person-to- person phone calls so that eventually each person knows all six secrets. None of the Frenchmen knows English, and only one Englishman knows French. what is the minimum number of phone calls needed for the above purpose?

A. 5 B. 10 C. 9 D. 15

cat2005 quantitative-aptitude number-systems

Answer key

## 7.62.54 Number Systems: CAT 2006 | Question: 51 top

If $x = -0.5$ then which of the following has the smallest value?

A. $2^{\frac{1}{x}}$ B. $\frac{1}{x}$ C. $\frac{1}{x^2}$ D. $2^x$ E. $\frac{1}{\sqrt{-x}}$

cat2006 quantitative-aptitude number-systems

### 7.62.55 Number Systems: CAT 2006 | Question: 52 top

Which among $2^{\frac{1}{2}}, 3^{\frac{1}{3}}, 4^{\frac{1}{4}}, 6^{\frac{1}{6}}$ and $12^{\frac{1}{12}}$ is the largest?

A. $2^{\frac{1}{2}}$ B. $3^{\frac{1}{3}}$ C. $4^{\frac{1}{4}}$ D. $6^{\frac{1}{6}}$ E. $12^{\frac{1}{12}}$

cat2006 quantitative-aptitude number-systems

Answer key

### 7.62.56 Number Systems: CAT 2006 | Question: 59 top

A survey was conducted of 100 people to find out whether that had read recent issue of Golmol, a monthly magazine. The summarized information regarding readership in 3 months is given below:

Only September : 18; September but not August : 23; September and July : 8; September : 28;

July : 48; July and August : 10; None of the three months 24

What is the number of surveyed people who have read exactly two consecutive issues (out of three)?

A. 7 B. 9 C. 12 D. 14 E. 17

cat2006 quantitative-aptitude number-systems

### 7.62.57 Number Systems: CAT 2006 | Question: 60 top

The sum of four consecutive two digit odd numbers, when divided by 10, becomes a perfect square. Which of the following can possibly be one of these four numbers?

A. 21 B. 25 C. 41 D. 67 E. 73

cat2006 quantitative-aptitude number-systems

Answer key

### 7.62.58 Number Systems: CAT 2006 | Question: 67 top

**The below question are based on the information given below:**

An airline has a certain free luggage allowance and charges for excess luggage at a fixed rate per kg. Two passengers, Raja and Praja have 60 kg of luggage between them, and are charged Rs. 1200 and Rs. 2400 respectively for excess luggage. hand the entre luggage to one of them, the excess luggage charge would have been Rs. 5400.

What is the weight of Praja's luggage?

A. 20 kg B. 25 kg C. 30 kg D. 35 kg E. 40 kg

cat2006 quantitative-aptitude number-systems

### 7.62.59 Number Systems: CAT 2006 | Question: 68 top

**The below question are based on the information given below:**

An airline has a certain free luggage allowance and charges for excess luggage at a fixed rate per kg. Two passengers, Raja and Praja have 60 kg of luggage between them, and are charged Rs. 1200 and Rs. 2400 respectively for excess luggage. hand the entre luggage to one of them, the excess luggage charge would have been Rs. 5400.

What is the free luggage allowance

A. 10 kg B. 15 kg C. 20 kg D. 25 kg E. 30 kg

cat2006 quantitative-aptitude number-systems

### 7.62.60 Number Systems: CAT 2006 | Question: 70 top

When you reverse the digits of the number 13, the number increases by 18. How many other two digit numbers increase by 18 when their digits are reversed?

A. 5 B. 6 C. 7 D. 8 E. 10

cat2006 quantitative-aptitude number-systems

Answer key

## 7.62.61 Number Systems: CAT 2006 | Question: 73 top

The number of employees in Obelix Menhor Co. is a prime number and is less than 300. The ratio of the number of employees who are graduates and above, to that of employees who are not, possibly be

A. 101:88 B. 87:100 C. 110:111 D. 85:98 E. 97:84

cat2006 quantitative-aptitude number-systems

Answer key

## 7.62.62 Number Systems: CAT 2007 | Question: 10 top

Consider four digit numbers for which the first two digits are equal and the last two digits are also equal. How many such numbers are perfect squares?

A. 3 B. 2 C. 4 D. 0 E. 1

cat2007 quantitative-aptitude number-systems

Answer key

## 7.62.63 Number Systems: CAT 2007 | Question: 14 top

**Directions for the below question:**

Let $a_1 = p$ and $b_1 = q$ where $p$ and $q$ are positive quantities.

Define:

$a_n pb_{n-1}$ $b_n = qb_{n-1}$ for even $n > 1$

and $a_n pa_{n-1}$ $b_n = qa_{n-1}$ for odd $n > 1$

Which of the following best describes $a_n + b_n$ for even $n$?

A. $q(pq)^{\frac{1}{2}n-1}(p+q)^{\frac{1}{2}n}$

B. $q(pq)^{\frac{1}{2}n-1}(p+q)$

C. $qp^{\frac{1}{2}n-1}(p+q)$

D. $q^{\frac{1}{2}n}(p+q)$

E. $q^{\frac{1}{2}n}(p+q)^{\frac{1}{2}n}$

cat2007 quantitative-aptitude number-systems

## 7.62.64 Number Systems: CAT 2007 | Question: 15 top

**Directions for the below question:**

Let $a_1 = p$ and $b_1 = q$ where $p$ and $q$ are positive quantities.

Define:

$a_n pb_{n-1}$ $b_n = qb_{n-1}$ for even $n > 1$

and $a_n pa_{n-1}$ $b_n = qa_{n-1}$ for odd $n > 1$

If $p = 1/3$ and $q = 2/3$, then what is the smallest odd $n$ such that $a_n + b_n < 0.01$?

A. 7 B. 13 C. 11 D. 9 E. 15

cat2007 quantitative-aptitude number-systems

## 7.62.65 Number Systems: CAT 2008 | Question: 06 top

What are the last two digits of $7^{2008}$?

A. 21 B. 61 C. 01 D. 41 E. 81

cat2008 quantitative-aptitude number-systems

Answer key

## 7.62.66 Number Systems: CAT 2008 | Question: 17 top

The integers 1, 2, …, 40 are written on a blackboard. The following operation is then repeated 39 times. In each repetition, any two numbers, say a and b, currently on the blackboard are erased and a new number $a + b - 1$ is written. What will be the number left on the board at the end?

A. 820 B. 821 C. 781 D. 819 E. 780

cat2008 quantitative-aptitude number-systems

## 7.62.67 Number Systems: CAT 2008 | Question: 20 top

Three consecutive positive integers are raised to the first, second and third powers respectively and then added. The sum so obtained is a perfect square root equals to the total of the three originals integers. Which of the following best describes the minimum, say m, of these three integers?

A. $1 \leq m \leq 3$
B. $4 \leq m \leq 6$
C. $7 \leq m \leq 9$
D. $10 \leq m \leq 12$
E. $13 \leq m \leq 15$

cat2008 quantitative-aptitude number-systems

## 7.62.68 Number Systems: CAT 2008 | Question: 25 top

suppose, the seed of any positive integer $n$ is defined as follows:

seed($n$) = $n$, if $n < 10$

= seed($s(n)$), otherwise

where $s(n)$ indicates the sum of digits $n$. For example, seed(7) = 7, seed(248) = seed(2 + 4 + 8) = seed(14) = seed(1 + 4) = seed(5) = 5 etc. How many positive integers $n$, such that $n < 500$, will have seed($n$) = 9?

A. 39 B. 72 C. 81 D. 108 E. 55

cat2008 quantitative-aptitude number-systems

Answer key

## 7.62.69 Number Systems: CAT 2010 | Question: 2 top

Let S be the set of rational numbers with the following properties:

I. $\frac{1}{2} \in$ S

II. If $x \in$ S then both $\frac{1}{x+1} \in$ S and $\frac{x}{x+1} \in$ S

Which of the following is true?

A. S contains all rational numbers in the interval $0 < x < 1$.
B. S contains all rational numbers in the interval $-1 < x < 1$.
C. S contains all rational numbers in the interval $-1 < x < 0$.
D. S contains all rational numbers in the interval $1 < x < \infty$.

cat2010 quantitative-aptitude number-systems

## 7.62.70 Number Systems: CAT 2010 | Question: 3 top

P, Q and R are three consecutive odd numbers in ascending order. If the value of three times P is three less than two times R, find the value of R.

A. 5 B. 7 C. 9 D. 11

cat2010 quantitative-aptitude number-systems

Answer key

### 7.62.71 Number Systems: CAT 2011 | Question: 1 top

The values of the numbers $2^{2004}$ and $5^{2004}$ are written one after another. How many digits are there in all?

A. 4008 B. 2003 C. 2004 D. None of these

cat2011 quantitative-aptitude number-systems

### 7.62.72 Number Systems: CAT 2011 | Question: 13 top

Auto fare in Bombay is ₹ 2.40 for the first 1 km,₹ 2.00 per km for the next 4 km and 1.20 for each additional km thereafter. Find the fare in rupees for $k$ km($k \geq 5$).

A. $2.4k + 1.2(2k - 3)$
B. $10.4 + 1.2(k - 5)$
C. $2.4 + 2(k - 3) + 1.2(k - 5)$
D. $10.4 + 1.2(k - 4)$

cat2011 quantitative-aptitude number-systems

### 7.62.73 Number Systems: CAT 2011 | Question: 6 top

Vaibhav wrote a certain number of positive prime numbers on a piece of paper. Vikram wrote down the product of all the possible triplets among those numbers. For every pair of numbers written by Vikram, Vishal wrote down the corresponding GCD. If 90 of the numbers written by Vishal were prime, how many numbers did Vaibhav write?

A. 6
B. 8
C. 10
D. Cannot be determined

cat2011 quantitative-aptitude number-systems

### 7.62.74 Number Systems: CAT 2012 | Question: 10 top

A certain number written in a certain base is 144. Which of the following is always true?

I. Square root of the number written in the same base is 12.
II. If base is increased by 2, the number becomes 100.

A. Only I
B. Only II
C. Neither I nor II
D. Both I and II

cat2012 quantitative-aptitude number-systems

### 7.62.75 Number Systems: CAT 2012 | Question: 12 top

If $x$ is a real number, $[x]$ is greatest integer less than or equal to $x$, then $3[x] + 2 - [x] = 0$. Will the above equation have any real root?

A. Yes
B. No
C. Will have real roots for $x < 0$
D. Will have real roots for $x > 0$

cat2012 quantitative-aptitude number-systems

### 7.62.76 Number Systems: CAT 2012 | Question: 2 top

Let P = {2, 3, 4, …100} and Q = {101, 102, 103, …200}. How many elements of Q are there such that they do not have any element of P as a factor?

A. 20 B. 24 C. 23 D. 21

cat2012 quantitative-aptitude number-systems

Answer key

### 7.62.77 Number Systems: CAT 2012 | Question: 28 top

When asked for his taxi number, the driver replied, “If you divide the number of my taxi by 2, 3, 4, 5, 6 each time you will find a reminder of one. But, if you divide it by 11, the remainder is zero.You will also not find any other driver with a taxi having a lower number who can say the same”. What is the taxi number?

A. 121 B. 1001 C. 1881 D. 781

cat2012 quantitative-aptitude number-systems

## 7.62.78 Number Systems: CAT 2012 | Question: 29 top

A student is asked to form numbers between 3000 and 9000 with digits $2, 3, 5, 7$ and 9. If no digit is to be repeated, in how many ways can the student do so?

A. 24 B. 120 C. 60 D. 72

cat2012 quantitative-aptitude number-systems

## 7.62.79 Number Systems: CAT 2012 | Question: 3 top

What is the sum of all the 2-digit numbers which leave a remainder of 6 when divided by 8?

A. 612 B. 594 C. 324 D. 872

cat2012 quantitative-aptitude number-systems

Answer key

## 7.62.80 Number Systems: CAT 2012 | Question: 4 top

Which of the terms $2^{\frac{1}{3}}, 3^{\frac{1}{4}}, 4^{\frac{1}{6}}, 6^{\frac{1}{8}}$ and $10^{\frac{1}{12}}$ is the largest?

A. $2^{\frac{1}{3}}$ B. $3^{\frac{1}{4}}$ C. $4^{\frac{1}{6}}$ D. $10^{\frac{1}{12}}$

cat2012 quantitative-aptitude number-systems

Answer key

## 7.62.81 Number Systems: CAT 2012 | Question: 6 top

Find the remainder of $2^{1040}$ divided by 131.

A. 1 B. 3 C. 5 D. 7

cat2012 quantitative-aptitude number-systems

Answer key

## 7.62.82 Number Systems: CAT 2012 | Question: 9 top

$p$ is a prime and $m$ is a positive integer. How many solutions exist for the equation $p^6 - p = (m^2 + m + 6)(p - 1)$?

A. 0 B. 1 C. 2 D. Infinite

cat2012 quantitative-aptitude number-systems

## 7.62.83 Number Systems: CAT 2013 | Question: 1 top

Functions $g$ and $h$ are defined on $n$ constants, $a_0, a_1, a_2, a_3, \ldots a_{n-1}$, as follows: $g(a_p, a_q) = a_{|p-q|}$, if $|p-q| \leq (n-4) = a_{n-|p-q|}$, if $|p-q| > (n-4) h(a_p, a_q) = a_k$, where $k$ is the remainder when $p + q$ is divided by $n$.

If $n = 10$, find the value of $g(g(a_2, a_8), g(a_1, a_7))$,

A. $a_9$ B. $a_7$ C. $a_2$ D. $a_0$

cat2013 quantitative-aptitude number-systems

## 7.62.84 Number Systems: CAT 2013 | Question: 11 top

Sujith looked at the six-digit number on his CAT admit card and said "If I multiply the first two digits with three, I get all ones. If I multiply the next two digits with six, I get all twos. If I multiply the last two digits 9, I get all threes". What is the sum of the digits of the number on Sujith's admit card?

A. 30 B. 33 C. 60 D. 45

cat2013 quantitative-aptitude number-systems

## 7.62.85 Number Systems: CAT 2013 | Question: 2 top

Functions $g$ and $h$ are defined on $n$ constants, $a_0, a_1, a_2, a_3, \ldots a_{n-1}$, as follows: $g(a_p, a_q) = a \mid p-q \mid$, if $\mid p-q \mid \leq (n-4) = a_n - \mid p-q \mid$, if $\mid p-q \mid > (n-4) h(a_p, a_q) = a_k$, where $k$ is the remainder when $p+q$ is divided by $n$.

If $h(a_k, a_m) = a_m$ for all $m$, where $1 \leq m < n$ and $0 \leq k < n$, and $m$ is a natural number, find $k$.

A. 0 B. 1 C. $n-1$ D. $n-2$

cat2013 quantitative-aptitude number-systems

## 7.62.86 Number Systems: CAT 2013 | Question: 4 top

Let P, Q, S, R, T, U and V represent the seven distinct digits from 0 to 6, not necessarily in that order. If PQ and RS are both two-digit numbers adding up to the three-digit number TUV, find the value of V.

A. 3
B. 6
C. 5
D. Cannot be determined

cat2013 quantitative-aptitude number-systems

## 7.62.87 Number Systems: CAT 2013 | Question: 5 top

There are five cards lying on a table in one row. Five numbers from among 1 to 100 have to be written on them, one number per card, such that the difference between the numbers on any two adjacent cards is not divisible by 4. The remainder when each ofthe five numbers is divided by 4 is written down on another card, i.e., a sixth card, in that order. How many sequences can be written down on the sixth card?

A. $2^2 3^3$ B. $4(3)^4$ C. $4^2 3^3$ D. $4^2 3^4$

cat2013 quantitative-aptitude number-systems

## 7.62.88 Number Systems: CAT 2014 | Question: 48 top

The price of Coffee (in rupees per kilogram) is $100 + 0.10n$, on the $n$th day of 2007 ($n = 1, 2, \ldots, 100$), and then remains constant. On the other hand, the price of Ooty tea (in rupees per kilogram) is $89 + 0.15n$, on the $n$th day of 2007 ($n = 1, 2, \ldots, 365$). On which date in 2007 will the prices of coffee and tea be equal?

a. May 21 b. April 11 c. May 20 d. April 10

cat2014 quantitative-aptitude number-systems

## 7.62.89 Number Systems: CAT 2014 | Question: 44 top

John bought five toffees and ten chocolates together for forty rupees. Subsequently, he returned one toffee and got two chocolates in exchange. The price of an chocolate would be

a. 1 b. 2 c. 3 d. 4

cat2014 quantitative-aptitude number-systems

## 7.62.90 Number Systems: CAT 2014 | Question: 47 top

Consider four-digit numbers for which the first two digits are equal and the last two digits are also equal. How many such numbers are perfect squares?

a. 3 b. 2 c. 4 d. 1

cat2014 quantitative-aptitude number-systems

### 7.66.1 Permutation Combination: CAT 2000 | Question: 63 top

One red flag, three white flags and two blue flags are arranged in a line such that,

A. no two adjacent flags are of the same colour B. the flags at the two ends of the line are of different colours.

In how many different ways can the flags be arranged?

A. 6 B. 4 C. 10 D. 2

cat2000 quantitative-aptitude permutation-combination

Answer key

### 7.66.2 Permutation Combination: CAT 2000 | Question: 67 top

What is the number of distinct triangles with integral valued sides and perimeter 14?

A. 6 B. 5 C. 4 D. 3

cat2000 quantitative-aptitude permutation-combination

### 7.66.3 Permutation Combination: CAT 2000 | Question: 89 top

**Answer the following questions based on the information given below.**
Sixteen teams have been invited to participate in the ABC Gold Cup cricket tournament. The tournament is conducted in two stages. In the first stage, the teams are divided into two groups. Each group consists of eight teams, with each team playing every other team in its group exactly once. At the end of the first stage, the top four teams from each group advance to the second stage while the rest are eliminated. The second stage comprises of several rounds. A round involves one match for each team. The winner of a match in a round advances to the next round, while the loser is eliminated. The team that remains undefeated in the second stage is declared the winner and claims the Gold Cup.
The tournament rules are such that each match results in a winner and a loser with no possibility of a tie. In the first stage, a team earns one point for each win and no points for a loss. At the end of the first stage teams in each group are ranked on the basis of total points to determine the qualifiers advancing to the next stage. Ties are resolved by a series of complex tie-breaking rules so that exactly four teams from each group advance to the next stage.

What is the total number of matches played in the tournament?

A. 28 B. 55 C. 63 D. 35

cat2000 quantitative-aptitude permutation-combination

### 7.66.4 Permutation Combination: CAT 2000 | Question: 90 top

**Answer the following question based on the information given below.**
Sixteen teams have been invited to participate in the ABC Gold Cup cricket tournament. The tournament is conducted in two stages. In the first stage, the teams are divided into two groups. Each group consists of eight teams, with each team playing every other team in its group exactly once. At the end of the first stage, the top four teams from each group advance to the second stage while the rest are eliminated. The second stage comprises of several rounds. A round involves one match for each team. The winner of a match in a round advances to the next round, while the loser is eliminated. The team that remains undefeated in the second stage is declared the winner and claims the Gold Cup.
The tournament rules are such that each match results in a winner and a loser with no possibility of a tie. In the first stage, a team earns one point for each win and no points for a loss. At the end of the first stage teams in each group are ranked on the basis of total points to determine the qualifiers advancing to the next stage. Ties are resolved by a series of complex tie-breaking rules so that exactly four teams from each group advance to the next stage.

The minimum number of wins needed for a team in the first stage to guarantee its advancement to the next stage is

A. 5 B. 6 C. 7 D. 4

cat2000 quantitative-aptitude permutation-combination

Answer key

### 7.66.5 Permutation Combination: CAT 2000 | Question: 91 top

**Answer the following question based on the information given below.**
Sixteen teams have been invited to participate in the ABC Gold Cup cricket tournament. The tournament is conducted in two stages. In the first stage, the teams are divided into two groups. Each group consists of eight teams, with each team playing every other team in its group exactly once. At the end of the first stage, the top four teams from each group advance to the second stage while the rest are eliminated. The second stage comprises of several rounds. ### 7.66.19 Permutation Combination: CAT 2003 | Question: 2-84 top

There are 12 towns grouped into four zones with three towns per zone. It is intended to connect the towns with telephone lines such that every two towns are connected with three direct lines if they belong to the same zone, and with only one direct line otherwise. How many direct telephone lines are required?

A. 72 B. 90 C. 96 D. 144

cat2003-2 quantitative-aptitude permutation-combination

Answer key

### 7.66.20 Permutation Combination: CAT 2003 | Question: 2-90 top

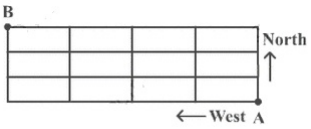
An intelligence agency forms a code of two distinct digits selected from 0, 1, 2, …9 such that the first digit of the code is nonzero. The code, handwritten on a slip, can however potentially create confusion, when read upside down – for example, the code 91 may appear as 16. How many codes are there for which no such confusion can arise?

A. 80 B. 78 C. 71 D. 69

cat2003-2 quantitative-aptitude permutation-combination

### 7.66.21 Permutation Combination: CAT 2004 | Question: 68 top

In the adjoining figure, the lines represent one-way roads allowing travel only northwards or only westwards. Along how many distinct routes can a car reach point B from point A?



A. 15 B. 56 C. 120 D. 336

cat2004 quantitative-aptitude permutation-combination

Answer key

## 7.66.22 Permutation Combination: CAT 2004 | Question: 71 top

A new flag is to be designed with six vertical stripes using some or all of the colors yellow, green, blue and red. Then the number of ways this can be done such that no two adjacent stripes have the same color is

A. $12 \times 81$
B. $16 \times 192$
C. $20 \times 125$
D. $24 \times 216$

cat2004 quantitative-aptitude permutation-combination

Answer key

## 7.66.23 Permutation Combination: CAT 2005 | Question: 05 top

In a chess competition involving some boys and girls of a school, every student had to play exactly one game with every other student. It was found that in 45 games both the players were girls, and in 190 games both were boys. The number of games in which one player was a boy and other was a girl is

A. 200 B. 216 C. 235 D. 256

cat2005 quantitative-aptitude permutation-combination

Answer key

## 7.66.24 Permutation Combination: CAT 2005 | Question: 15 top

Let S be the set of five digit numbers formed by the digits 1, 2, 3, 4 and 5 using each digit exactly once such that exactly two odd positions are occupied by odd digits. What is the sum of the digits in the rightmost position of the numbers in S?

A. 228 B. 216 C. 294 D. 192

cat2005 quantitative-aptitude permutation-combination

## 7.66.25 Permutation Combination: CAT 2006 | Question: 56 top

A group of 630 children is arranged in rows for a group photograph session. Each row contains three fewer children than the row in front of it. What numbers of rows is not possible?

A. 3 B. 4 C. 5 D. 6 E. 7

cat2006 quantitative-aptitude permutation-combination

Answer key

## 7.66.26 Permutation Combination: CAT 2007 | Question: 11 top

In a tournament, there are $n$ teams $T_1, T_2 \ldots\ldots, T$ with $n > 5$. Each team consists of $k$ players, $k > 3$. The following pairs of teams have one player in common:

$T_1$ and $T_2$, $T_2$ and $T_3, \ldots\ldots, T_{n-1}$ and $T_n$, and $T_n$ and $T_1$

No other pair of teams has any player in common. How many players are participating in the tournament, considering all the $n$ teams together?

A. $n(k-1)$ B. $k(n-1)$ C. $n(k-2)$ D. $k(k-2)$ E. $(n-1)(k-1)$

cat2007 quantitative-aptitude permutation-combination

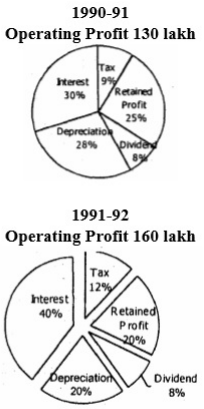
## 7.67 Pie Chart (11) top

### 7.67.1 Pie Chart: CAT 1995 | Question: 161 top

Refer to the following pie-chart



The operating profit in 1991-92 increased over that in 1990-91 by

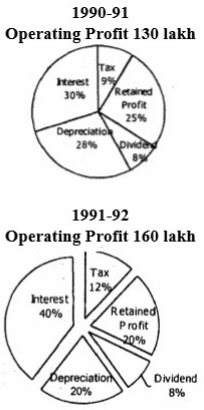
A. 23% B. 22% C. 25% D. 24%

cat1995 quantitative-aptitude pie-chart data-interpretation

Answer key

### 7.67.2 Pie Chart: CAT 1995 | Question: 162 top

Refer to the following pie-chart



The Interest burden in 1991-92 was higher than that in 1990-91 by:

A. 50% B. 25 lakh C. 90% D. 41 lakh

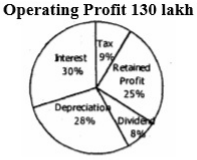
cat1995 quantitative-aptitude pie-chart data-interpretation

Answer key

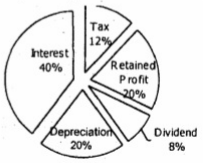
### 7.67.3 Pie Chart: CAT 1995 | Question: 163 top

Refer to the following pie-chart

1990-91
Operating Profit 130 lakh



1991-92
Operating Profit 160 lakh



If, on an average, 20% rate of interest was charged on borrowed funds, then the total borrowed funds used by this company in the given two years amounted to:

A. 221 lakh B. 195 lakh C. 368 lakh D. 515 lakh

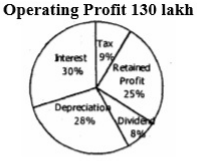
cat1995 quantitative-aptitude pie-chart data-interpretation

Answer key

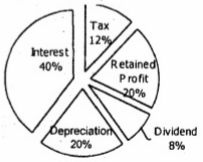
## 7.67.4 Pie Chart: CAT 1995 | Question: 164 top

Refer to the following pie-chart

1990-91
Operating Profit 130 lakh



1991-92
Operating Profit 160 lakh



The retained profit in 1991-92, as compared to that in 1990-91 was:

A. higher by 2.5% B. higher by l.5%
C. lower by 2.5% D. lower by 1.5%

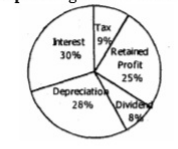
cat1995 quantitative-aptitude pie-chart data-interpretation

Answer key

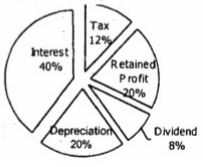
## 7.67.5 Pie Chart: CAT 1995 | Question: 165 top

Refer to the following pie-chart

1990-91
Operating Profit 130 lakh



1991-92
Operating Profit 160 lakh



The equity base of these companies remained unchanged. Then the total dividend earning (in lakh rupees) by the share holders in 1991-92 is:

A. 10.4 lakh B. 9 lakh C. 12.8 lakh D. 15.6 lakh

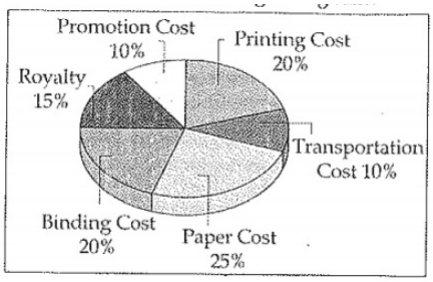
cat1995 quantitative-aptitude pie-chart data-interpretation

Answer key

### 7.67.6 Pie Chart: NIELIT 2016 DEC Scientist B - Section A: 5 top

The following pie-chart shows the percentage distribution of the expenditure incurred in publishing a magazine. Study the pie-chart and answer the question based on it.

**Various Expenditures (in percentage) Incurred in Publishing a Magazine**



What is the central angle of the sector corresponding to the expenditure incurred on Royalty ?

A. 15° B. 24° C. 54° D. 48°

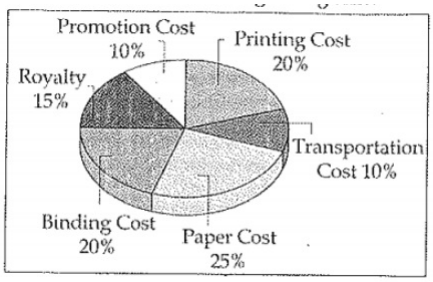
nielit2016dec-scientistb pie-chart

Answer key

### 7.67.7 Pie Chart: NIELIT 2016 DEC Scientist B - Section A: 6 top

The following pie-chart shows the percentage distribution of the expenditure incurred in publishing a magazine. Study the pie-chart and answer the question based on it.

**Various Expenditures (in percentage) Incurred in publishing a Magazine**



The price of the magagine is marked 20% above the *C. P.* If the marked price of the magazine is ₹ 180, then what is the cost of the paper used in a single copy of the magazine ?

A. ₹36 B. ₹37.50 C. ₹42 D. ₹44.25

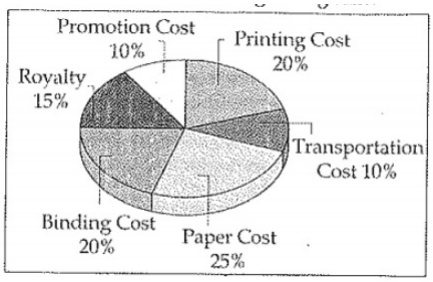
nielit2016dec-scientistb pie-chart percentage

Answer key

### 7.67.8 Pie Chart: NIELIT 2016 DEC Scientist B - Section A: 7 top

The following pie-chart shows the percentage distribution of the expenditure incurred in publishing a magazine. Study the pie-chart and answer the question based on it.

**Various Expenditures (in percentage) Incurred in publishing a Magazine**



If for a certain quantity of magazine, the publisher has to pay ₹ 30, 600 as printing cost, then what will be amount of royalty to be paid for these magazines ?

A. ₹19, 450 B. ₹21, 200 C. ₹22, 950 D. ₹26, 150

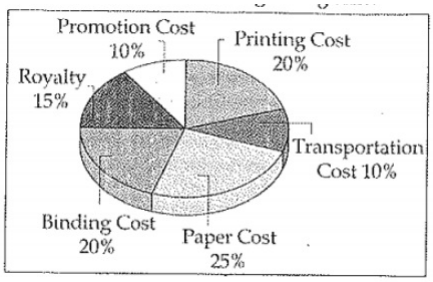
nielit2016dec-scientistb pie-chart

Answer key

## 7.67.9 Pie Chart: NIELIT 2016 DEC Scientist B - Section A: 8 top

The following pie-chart shows the percentage distribution of the expenditure incurred in publishing a magazine. Study the pie-chart and answer the question based on it.

**Various Expenditures (in percentage) Incurred in publishing a Magazine**



Royalty on the magazine is less than the printing cost by :

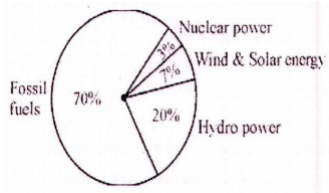
A. 5% B. $33\frac{1}{5}\%$ C. 20% D. 25%

nielit2016dec-scientistb pie-chart percentage

Answer key

## 7.67.10 Pie Chart: NIELIT 2016 MAR Scientist C - Section A: 8 top

The total electricity generation in a country is 97 *GW*. The contribution of various energy sources is indicated in percentage terms in the pie chart given below:



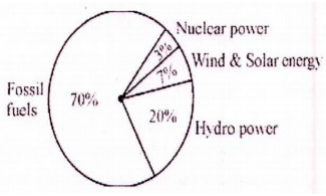
What is the contribution of wind and solar power in absolute terms in the electricity generation?

A. 6.79 *GW* B. 9.4 *GW* C. 19.7 *GW* D. 29.1 *GW*

nielit2016mar-scientistc pie-chart

## 7.67.11 Pie Chart: NIELIT 2016 MAR Scientist C - Section A: 9 top

The total electricity generation in a country is 97 *GW*. The contribution of various energy sources is indicated in percentage terms in the pie chart given below:



What is the contribution of renewable energy sources in absolute terms in the electricity generation?

A. 09.1 GW B. 26.19 GW C. 67.9 GW D. 97 GW

## 7.68 Pipes Cistern (13) top

### 7.68.1 Pipes Cistern: CAT 2000 | Question: 85 top

**Answer the following question based on the information given below.**
There are three bottles of water, A, B, C, whose capacities are 5 litres, 3 litres, and 2 litres respectively. For transferring water from one bottle to another and to drain out the bottles, there exists a piping system. The flow thorough these pipes is computer controlled. The computer that controls the flow through these pipes can be fed with three types of instructions, as explained below:

| Instruction Type | Explanation of the Instruction |
|---|---|
| FILL (X, Y) | Fill bottle labelled X from the water in bottle labelled Y, where the remaining capacity of X is less than or equal to the amount of water in Y. |
| EMPTY (X, Y) | Empty out the water in bottle labelled X into bottle labelled Y, where the amount of water in X is less than or equal to remaining capacity of Y. |
| DRAIN (X) | Drain out all the water contained in bottle labelled X.DRAIN (X) |

Initially A is full with water; and B and C are empty.

After executing a sequence of three instructions, bottle A contains one litre of water. The first and the third of these instructions are shown below

- First instruction FILL (C, A)
- Third instruction FILL (C, A)

Then which of the following statements about the instructions is true?

A. The second instruction is FILL (B, A)
B. The second instruction is EMPTY (C, B)
C. The second instruction transfers water from B to C
D. The second instruction involves using the water in bottle A.

cat2000 quantitative-aptitude work-time pipes-cistern

### 7.68.2 Pipes Cistern: CAT 2000 | Question: 86 top

**Answer the following question based on the information given below.**
There are three bottles of water, A, B, C, whose capacities are 5 litres, 3 litres, and 2 litres respectively. For transferring water from one bottle to another and to drain out the bottles, there exists a piping system. The flow thorough these pipes is computer controlled. The computer that controls the flow through these pipes can be fed with three types of instructions, as explained below:

| Instruction Type | Explanation of the Instruction |
|---|---|
| FILL (X, Y) | Fill bottle labelled X from the water in bottle labelled Y, where the remaining capacity of X is less than or equal to the amount of water in Y. |
| EMPTY (X, Y) | Empty out the water in bottle labelled X into bottle labelled Y, where the amount of water in X is less than or equal to remaining capacity of Y. |
| DRAIN (X) | Drain out all the water contained in bottle labelled X.DRAIN (X) |

Initially A is full with water; and B and C are empty.

Consider the same sequence of three instructions and the same initial state mentioned above. Three more instructions are added at the end of the above sequence to have A contain 4 litres of water. In this total sequence of six instructions, the fourth one is DRAIN (A). This is the only DRAIN instruction in the entire sequence. At the end of the execution of the above sequence, how much water (in litres) is contained in C?

A. One B. Two C. Zero D. None of these

### 7.68.3 Pipes Cistern: CAT 2002 | Question: 95 top

Three small pumps and one additional pump are filling a tank. Each of the three small pumps works at $2/3$ rd the rate of the large pump. If all 4 pumps work at the same time, then they should fill the tank in what function of time that it would have taken the large pump alone?

A. $4/7$ B. $1/3$ C. $2/3$ D. $3/4$

cat2002 quantitative-aptitude work-time pipes-cistern

### 7.68.4 Pipes Cistern: CAT 2011 | Question: 8 top

There are two water drums in my house whose volumes are in the ratio $1:5$. Every day the smaller drum is filled first and then the same pipe is used to fill the bigger drum. Normally by the time I return from my college, i.e., at $1:30$ pm, the smaller drum would just be full. But today I returned a little early and started drawing water from the well with the help of a bucket, poured one-third into the smaller drum and the remaining into the bigger drum. I continued this till the smaller drum was filled. Immediately after that, I shifted the pipe into the bigger drum and went for lunch. Today if the bigger drum was filled in 12 min before its normal time, when was the smaller drum full?

A. $1:18$ pm
B. $1:28$ pm
C. $1:26$ pm
D. Cannot be determined

cat2011 quantitative-aptitude work-time pipes-cistern

### 7.68.5 Pipes Cistern: CAT 2015 | Question: 84 top

A water tank has three taps A, B, and C. A fills four buckets in 24 mins, B fills 8 buckets in 1 hour and C fills 2 buckets in 20 minutes. If all taps are opened together a full tank is emptied in 2 hours. If a buckets can hold 5 litres of water, what is the capacity of the tank in litres _____

cat2015 quantitative-aptitude work-time pipes-cistern numerical-answer

### 7.68.6 Pipes Cistern: CAT 2017 Set-2 | Question: 74 top

A tank has an inlet pipe and an outlet pipe. If the outlet pipe is closed then the inlet pipe fills the empty tank in 8 hours. If the outlet pipe is open then the inlet pipe fills the empty tank in 10 hours. If only the outlet pipe is open then in how many hours the full tank becomes half-full?

A. 20 B. 30 C. 40 D. 45

cat2017-2 quantitative-aptitude work-time pipes-cistern

Answer key

### 7.68.7 Pipes Cistern: CAT 2018 Set-1 | Question: 68 top

A tank is fitted with pipes, some filling it and the rest draining it. All filling pipes fill at the same rate, and all draining pipes drain at the same rate. The empty tank gets completely filled in 6 hours when 6 filling and 5 draining pipes are on, but this time becomes 60 hours when 5 filling and 6 draining pipes are on. In how many hours will the empty tank get completely filled when one draining and two filling pipes are on?

cat2018-1 quantitative-aptitude work-time pipes-cistern numerical-answer

Answer key

### 7.68.8 Pipes Cistern: CAT 2018 Set-2 | Question: 76 top

A tank is emptied everyday at a fixed time point. Immediately thereafter, either pump A or pump B or both start working until the tank is full. On Monday, A alone completed filling the tank at 8 pm. On Tuesday, B alone completed filling the tank at 6 pm. On Wednesday, A alone worked till 5 pm, and then B worked alone from 5 pm to 7 pm, to fill the tank. At what time was the tank filled on Thursday if both pumps were used simultaneously all along?

A. 4:36 pm B. 4:12 pm C. 4:24 pm D. 4:48 pm

cat2018-2 quantitative-aptitude work-time pipes-cistern

Answer key

### 7.68.9 Pipes Cistern: CAT 2018 Set-2 | Question: 78 top

A water tank has inlets of two types A and B. All inlets of type A when open, bring in water at the same rate. All inlets of type B, when open, bring in water at the same rate. The empty tank is completely filled in 30 minutes if 10 inlets of type A and 45 inlets of type B are open, and in 1 hour if 8 inlets of type A and 18 inlets of type B are open. In how many minutes will the empty tank get completely filled if 7 inlets of type A and 27 inlets of type B are open?

cat2018-2 quantitative-aptitude work-time pipes-cistern numerical-answer

Answer key

### 7.68.10 Pipes Cistern: CAT 2021 Set-2 | Quantitative Aptitude | Question: 20 top

Two pipes A and B are attached to an empty water tank. Pipe A fills the tank while pipe B drains it. If pipe A is opened at 2 pm and pipe B is opened at 3 pm, then the tank becomes full at 10 pm. Instead, if pipe A is opened at 2 pm and pipe B is opened at 4 pm, then the tank becomes full at 6 pm. If pipe B is not opened at all, then the time, in minutes, taken to fill the tank is

A. 140 B. 264 C. 144 D. 120

### 7.71.11 Profit Loss: CAT 2007 | Question: 12 top

**Directions for below question:**

Mr. David manufacturers and sells a single product a fixed price in a niche market. The selling price of each unit is Rs. 30. On the other hand, the cost, in rupees, of producing x units is $240 + bx + cx^2$ where $b$ and $c$ are some constants. Mr. David noticed that doubling the daily production from 40 to 60 units results in an increases the daily production cost by 66.66%. However, an increase in daily production from 40 − 60 units results in an increase of only 50% in the daily production cost, Assume that demand is unlimited and that Mr. David can sell as much he can produce. His objective is to maximize the profit.

How many units should Mr.David produce daily?

A. 130
B. 100
C. 70
D. 150
E. cannot be determined

### 7.71.12 Profit Loss: CAT 2007 | Question: 13 top

**Directions for below question:**

Mr. David manufacturers and sells a single product a fixed price in a niche market. The selling price of each unit is Rs. 30. On the other hand, the cost, in rupees, of producing x units is $240 + bx + cx^2$ where $b$ and $c$ are some constants. Mr. David noticed that doubling the daily production from 40 to 60 units results in an increases the daily production cost by 66.66%. However, an increase in daily production from 40 − 60 units results in an increase of only 50% in the daily production cost, Assume that demand is unlimited and that Mr. David can sell as much he can produce. His objective is to maximize the profit.

What is the maximum daily profit, in rupees, that Mr.David can realize from his business?

A. 620
B. 920
C. 840
D. 760
E. cannot be determined

In a watch, the minute hand crosses the hour hand for the third time exactly after every 3 hrs 18 mm 15 seconds of watch time. What is the time gained or lost by this watch in one day?

A. 14 mm 10 seconds lost
B. 13 mm 50 seconds lost
C. 13 min 20 second gained
D. 14 mm 40 second gained.

cat1996 quantitative-aptitude

### 7.74.34 Quantitative Aptitude: CAT 1997 | Question: 101 top

A race consists of three stretches $A, B$ and $C$ of 2kms length each. The mode of coverage, and maximum and minimum of speeds possible in each stretch are:

| Stretch | Mode | Minimum Speed (Km/h) | Maximum Speed (Km/h) |
|---|---|---|---|
| A | Car | 40 | 60 |
| B | Motorcycle | 30 | 50 |
| C | Bicycle | 10 | 20 |

Speed in a given stretch remains constant. The previous record was ten minutes to complete the race.

Anshuman travelled at the minimum speed by car and at maximum speed over the stretch $B$. What should be his minimum speed over stretch $C$ to beat the previous record?

A. 15 kmph
B. Not possible to beat the previous record
C. 20 kmph
D. None of these

cat1997 quantitative-aptitude

## 7.74.35 Quantitative Aptitude: CAT 1997 | Question: 102 top

A race consists of three stretches $A, B$ and $C$ of 2kms length each. The mode of coverage, and maximum and minimum of speeds possible in each stretch are:

| Stretch | Mode | Minimum Speed (Km/h) | Maximum Speed (Km/h) |
|---|---|---|---|
| A | Car | 40 | 60 |
| B | Motorcycle | 30 | 50 |
| C | Bicycle | 10 | 20 |

Speed in a given stretch remains constant. The previous record was ten minutes to complete the race.

Mr. Hare travelled at the slowest speed in stretch $A$ and took the same amount of time to travel in stretch $B$ as he took in stretch $A$. If he took fifty percent more time than the previous record to complete the race, what was his speed in the stretch $C$?

A. 10 kmph B. 15 km/h C. 20 kmph D. None of these

cat1997 quantitative-aptitude

## 7.74.36 Quantitative Aptitude: CAT 1997 | Question: 103 top

A race consists of three stretches $A, B$ and $C$ of 2kms length each. The mode of coverage, and maximum and minimum of speeds possible in each stretch are:

| Stretch | Mode | Minimum Speed (Km/h) | Maximum Speed (Km/h) |
|---|---|---|---|
| A | Car | 40 | 60 |
| B | Motorcycle | 30 | 50 |
| C | Bicycle | 10 | 20 |

Speed in a given stretch remains constant. The previous record was ten minutes to complete the race.

Mr. Tortoise travelled in the overall race at an average speed of 20 km/h. However, his average speed over the first two stretches combined was four times that over the last stretch. What was his speed over the last stretch?

A. 15 km/h B. 10 km/h
C. 20 km/h D. Cannot be determined

## 7.74.38 Quantitative Aptitude: CAT 1997 | Question: 105 top

There are 60 students in a class. These students are divided into three groups $A, B$ and $C$ of 15, 20 and 25 students each. The groups $A$ and $C$ are combined to form group $D$.

If one students from Group A is shifted to group B, which of the following will be true?

A. The average weight of both groups increases.
B. The average weight of both the groups decreases.
C. The average weight of the class remains the same.
D. Cannot be determined.

cat1997 quantitative-aptitude

## 7.74.39 Quantitative Aptitude: CAT 1997 | Question: 106 top

There are 60 students in a class. These students are divided into three groups $A, B$ and $C$ of 15, 20 and 25 students each. The groups $A$ and $C$ are combined to form group $D$.

If all the students of the class have the same weight, then which of the following is false?

A. The average weight of all the four groups is the same.
B. The total weight of A and C is twice the total weight of $B$.
C. The average weight of D is greater than the average weight of $A$.
D. The average weight of all the groups remains the same even if a number of students are shifted from one group to another.

### 7.74.40 Quantitative Aptitude: CAT 1997 | Question: 108 top

In how many ways can the eight directors, the Vice chairman and the Chairman of a firm be seated at around- table, if the Chairman has to sit between the Vice- chairman and a director?

A. $9! \times 2$
B. $2 \times 8!$
C. $2 \times 7!$
D. None of these

cat1997 quantitative-aptitude

### 7.74.41 Quantitative Aptitude: CAT 1997 | Question: 109 top

If $\log_2[\log_7(x^2 - x + 37)] = 1$ then what could be the value of $x$?

A. 3 B. 5 C. 4 D. None of these E. $c$

cat1997 quantitative-aptitude

Answer key

### 7.74.42 Quantitative Aptitude: CAT 1997 | Question: 111 top

How many values of the natural number $n$ are possible so that the expression $(16n^2 + 7n + 6)/n$ is also a natural number?

A. Infinitely many B. 3 C. 4 D. None of these E. d & c

cat1997 quantitative-aptitude

Answer key

### 7.74.43 Quantitative Aptitude: CAT 1997 | Question: 112 top

A dry fruit seller purchased 3 kinds of nuts at the rate of Rs. 100/kg, Rs. 80/kg and Rs. 60/kg. He then mixed them, respectively, in the ratio $3:4:5$ by weight and sold the same to a customer at 50% profit. The price at which he sold to the customer is

A. Rs. 110
B. Rs. 90
C. Rs. 70
D. None of these

cat1997 quantitative-aptitude

### 7.74.44 Quantitative Aptitude: CAT 1997 | Question: 113 top

Fresh grapes contain 90% water by weight while dried grapes contain 20% water by weight. The weight of dry grapes available from 20 kg of fresh grapes will be.

A. 2 kg B. 2.4 kg C. 2.5 kg D. None of these

cat1997 quantitative-aptitude

### 7.74.45 Quantitative Aptitude: CAT 1997 | Question: 115 top

A candidate was asked to find $7/8$th of a positive number; he found $7/18$th of the same by mistake. If his answer was 770 less than the correct one, then the original given number was

A. 1260 B. 6160 C. 1584 D. None of these

cat1997 quantitative-aptitude

Answer key

### 7.74.46 Quantitative Aptitude: CAT 1997 | Question: 116 top

$P$ and $Q$ are two integers such that $P \times Q = 64$. Which of the following cannot be the value of $P + Q$?

A. 20 B. 65 C. 16 D. 35

cat1997 quantitative-aptitude

Answer key

### 7.74.47 Quantitative Aptitude: CAT 1997 | Question: 117 top

The average marks of a student in ten papers are 80. If the highest and the lowest scores are not considered, the average is 81. If his highest score is 92, find the lowest.

A. 55
B. 60
C. 62
D. Cannot be determined

cat1997 quantitative-aptitude

Answer key

### 7.74.48 Quantitative Aptitude: CAT 1997 | Question: 118 top

If the roots, $x_1$ and $x_2$ of the quadratic equation $x^2 - 2x + c = 0$ also satisfy the equation $7x_2 - 4x_1 = 47$, then which of the following is true?

A. $c = -15$ B. $x_1 = -5, x_2 = 3$ C. $x_1 = 4.5, x_2 = -2.5$ D. None of these

cat1997 quantitative-aptitude

Answer key

### 7.74.49 Quantitative Aptitude: CAT 1997 | Question: 119 top

The sum of the areas of two circles which touch each other externally is $153\pi$. If the sum of their radii is 15, find the ratio of the larger to the smaller radius.

A. 4 B. 2 C. 3 D. None of these

cat1997 quantitative-aptitude

Answer key

### 7.74.50 Quantitative Aptitude: CAT 1997 | Question: 120 top

If $m$ and $n$ are integers divisible by 5, which of the following is not necessarily true?

A. $m - n$ is divisible 5.
B. $m^2 - n^2$ is divisible by 25.
C. $m + n$ is divisible by 10
D. None of the above.

cat1997 quantitative-aptitude

Answer key

### 7.74.51 Quantitative Aptitude: CAT 1997 | Question: 121 top

Which of the following is true?

A. $7^{3^2} = (7^3)^2$
B. $7^{3^2} > (7^3)^2$
C. $7^{3^2} < (7^3)^2$
D. None of these

cat1997 quantitative-aptitude

### 7.74.52 Quantitative Aptitude: CAT 1997 | Question: 122 top

A survey of 200 people in a community who watched at least one of the three channels – BBC, CNN and DD showed that 80% of the people watched DD, 22% watched BBC, and 15% watched CNN.

What is the maximum percent of people who can watch all the three channels?

A. 12.5 B. 8.5 C. 17 D. Insufficient data

cat1997 quantitative-aptitude

### 7.74.53 Quantitative Aptitude: CAT 1997 | Question: 123 top

A survey of 200 people in a community who watched at least one of the three channels – BBC, CNN and DD showed that 80% of the people watched DD, 22% watched BBC, and 15% watched CNN.

If 5% of the people watched DD and CNN, 10% watched DD and BBC, then what percent of the people watched BBC and CNN only?

A. 2%
B. 5%
C. 8.5%
D. Cannot be determined

cat1997 quantitative-aptitude

## 7.74.54 Quantitative Aptitude: CAT 1997 | Question: 124 top

A survey of 200 people in a community who watched at least one of the three channels – BBC, CNN and DD showed that 80% of the people watched DD, 22% watched BBC, and 15% watched CNN.

Referring to the previous question, how many percents of the people watched all the three channels?

A. 3.5%
B. 0%
C. 8.5%
D. Cannot be determined

cat1997 quantitative-aptitude

## 7.74.55 Quantitative Aptitude: CAT 1997 | Question: 125 top

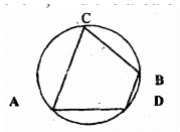
A man earns $x$% on the first 2000 rupees and $y$% on the rest of his income. If he earns Rs 700 from Rs 4000 and Rs 900 from Rs 5000 of income, find $x$.

A. 20
B. 15
C. 35
D. None of these

cat1997 quantitative-aptitude

## 7.74.56 Quantitative Aptitude: CAT 1997 | Question: 126 top

AB is the diameter of the given circle, while points C and D lie on the circumference as shown. If AB is 15 cm, AC is 12 cm and BD is 9 cm, find the area of the quadrilateral ACBD.



A. $54\pi$
B. $216\pi$
C. $162\pi$
D. None of these

cat1997 quantitative-aptitude

Answer key

## 7.74.57 Quantitative Aptitude: CAT 1997 | Question: 127 top

P, Q and R are three consecutive odd numbers in ascending order. If the value of three times P is three less than two times R, find the value of R.

A. 5
B. 7
C. 9
D. 11

cat1997 quantitative-aptitude

Answer key

## 7.74.58 Quantitative Aptitude: CAT 1997 | Question: 128 top

For these questions, the following functions have been defined:

$la(x, y, z) = min(x + y, y + z)$

$le(x, y, z) = max(x - y, y - z)$

$ma(x, y, z) = (1/2)[le(x, y, z) + la(x, y, z)]$

Given that $x > y > z > 0$, which of the following is necessarily true?

A. $la(x, y, z) < le(x, y, z)$
B. $ma(x, y, z) < la(x, y, z)$
C. $ma(x, y, z) < le(x, y, z)$
D. None of these

cat1997 quantitative-aptitude

## 7.74.59 Quantitative Aptitude: CAT 1997 | Question: 129 top

For these questions, the following functions have been defined:

$la(x, y, z) = min(x + y, y + z)$

$le(x, y, z) = max(x - y, y - z)$

$ma(x, y, z) = (1/2)[le(x, y, z) + la(x, y, z)]$

What is the value of $ma(10, 4, le(la(10, 5, 3), 5, 3))$

A. 7.0 B. 6.5 C. 8.0 D. 7.5

cat1997 quantitative-aptitude

## 7.74.60 Quantitative Aptitude: CAT 1997 | Question: 130 top

For these questions, the following functions have been defined:

$la(x, y, z) = min(x + y, y + z)$

$le(x, y, z) = max(x - y, y - z)$

$ma(x, y, z) = (1/2)[le(x, y, z) + la(x, y, z)]$

For $x = 15, y = 10$ and $z = 9$, find the value of: $le(x, \min(y, x - z), le(9, 8, ma(x, y, z))$.

A. 5 B. 12 C. 9 D. 4

cat1997 quantitative-aptitude

Answer key

## 7.74.61 Quantitative Aptitude: CAT 1997 | Question: 131 top

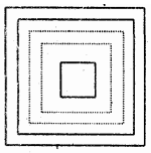
$ABC$ is a three-digit number in which $A > O$. The value of $ABC$ is equal to the sum of the factorials of its three digits. What is the value of $B$?

A. 9 B. 7 C. 4 D. 2

cat1997 quantitative-aptitude

## 7.74.62 Quantitative Aptitude: CAT 1997 | Question: 132 top

The adjoining figure shows a set of concentric squares.



If the diagonal of the innermost square is 2 units, and if the distance between the corresponding corners of any two successive squares is 1 unit, find the difference between the areas of the eighth and the seventh square, counting from the innermost square.

A. $10^2$ B. 30 C. $35^2$ D. None of these

cat1997 quantitative-aptitude

Answer key

## 7.74.63 Quantitative Aptitude: CAT 1997 | Question: 133 top

$A$, $B$ and $C$ are defined as follows:

$A = (2.000004) \div [(2.000004)^2 + (4.000008)]$

$B = (3.000003) \div [(3.000003)^2 + (9.000009)]$

$C = (4.000002) \div [(4.000002)^2 + (8.000004)]$

Which of the following is true about the value of the above three expressions?

A. All of them lie between 0.18 and 0.20.
B. $A$ is twice $C$.
C. $C$ is the smallest.
D. $B$ is the smallest

cat1997 quantitative-aptitude

### 7.74.64 Quantitative Aptitude: CAT 1997 | Question: 135 top

In a triangle $ABC$, points $P$, $Q$ and $R$ are the mid-points of the sides $AB$, $BC$ and $CA$ respectively. If the area of the triangle $ABC$ is 20 sq units, find the area of the triangle $PQR$

A. 10 sq. units B. 15 sq. units C. 5 sq. units D. None of these

cat1997 quantitative-aptitude

Answer key

### 7.74.65 Quantitative Aptitude: CAT 1997 | Question: 136 top

In a rectangle, the difference between the sum of the adjacent sides and the diagonal is half the length of the longer side. What is the ratio of the shorter to the longer side?

A. 3 : 2 B. 1 : 3 C. 2 : 5 D. 3 : 4

cat1997 quantitative-aptitude

Answer key

### 7.74.66 Quantitative Aptitude: CAT 1997 | Question: 139 top

Boston is 4 hours ahead of Frankfurt and two hours behind India. X leaves Frankfurt at 06 : 00 p.m. on Friday and reaches Boston the next day. After waiting there for two hours, he leaves exactly at noon and reaches India at 01 : 00 a.m. On his return journey, he takes the same route as before, but halts at Boston for one hour less than his previous halt there. He then proceeds to Frankfurt.

If his journey, including stoppages, was covered at an average speed of 180 miles per hour, what was the distance between Frankfurt and India?

A. 3600 miles B. 4500 miles C. 5580 miles D. Insufficient data.

cat1997 quantitative-aptitude

### 7.74.67 Quantitative Aptitude: CAT 1997 | Question: 140 top

Boston is 4 hours ahead of Frankfurt and two hours behind India. X leaves Frankfurt at 06 : 00 p.m. on Friday and reaches Boston the next day. After waiting there for two hours, he leaves exactly at noon and reaches India at 01 : 00 a.m. On his return journey, he takes the same route as before, but halts at Boston for one hour less than his previous halt there. He then proceeds to Frankfurt.

If $X$ had started his return journey from India at 02 : 55 a.m. on the same day that he reached there, after how much time would he reach Frankfurt?

A. 24 hrs B. 25 hrs C. 26 hrs D. Insufficient data.

cat1997 quantitative-aptitude

### 7.74.68 Quantitative Aptitude: CAT 1997 | Question: 141 top

Boston is 4 hours ahead of Frankfurt and two hours behind India. X leaves Frankfurt at 06 : 00 p.m. on Friday and reaches Boston the next day. After waiting there for two hours, he leaves exactly at noon and reaches India at 01 : 00 a.m. On his return journey, he takes the same route as before, but halts at Boston for one hour less than his previous halt there. He then proceeds to Frankfurt.

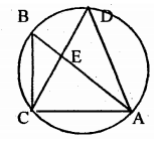
What was X's average speed for the entire journey?

A. 170 mph B. 180 mph C. 165 mph D. Insufficient data

cat1997 quantitative-aptitude

### 7.74.69 Quantitative Aptitude: CAT 1997 | Question: 142 top

In the adjoining figure, points $A$, $B$, $C$ and $D$ lie on the circle. $AD = 24$ and $BC = 12$. What is the ratio of the area of the triangle $CBE$ to that of the triangle $ADE$?

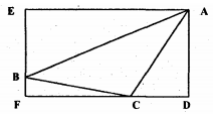


A. 1 : 4 B. 1 : 2 C. 1 : 3 D. Insufficient data

cat1997 quantitative-aptitude

## 7.74.70 Quantitative Aptitude: CAT 1997 | Question: 143 top

In the given figure, $EADF$ is a rectangle and $ABC$ is a triangle whose vertices lie on the sides of $EADF$. $AE = 22$, $BE = 6$, $CF = l6$ and $BF = 2$. Find the length of the line joining the midpoints of the sides $AB$ and $BC$.



A. $4\sqrt{2}$ B. 5 C. 3.5 D. None of these

cat1997 quantitative-aptitude

Answer key

## 7.74.71 Quantitative Aptitude: CAT 1997 | Question: 144 top

These questions are based on the following data:

A thief flees City $A$ in a car towards City $B$ on a stretch of straight road, 300 kilometres long, at the speed of 60 km/hr. In 15 minutes a police party (X) leaves city $A$ to chase the thief at 65 km/hr.

After leaving how long does it take for the police party $X$ to catch the thief"?

A. 2 hrs 45 min
B. 3hrs
C. 3 hrs 15 mm
D. None of these

cat1997 quantitative-aptitude

Answer key

## 7.74.72 Quantitative Aptitude: CAT 1997 | Question: 145 top

These questions are based on the following data:

A thief flees City $A$ in a car towards City $B$ on a stretch of straight road, 300 kilometres long, at the speed of 60 km/hr. In 15 minutes a police party (X) leaves city $A$ to chase the thief at 65 km/hr.

If a police party ($Y$) were to leave City $B$ at the same time as police party $X$ leaving City $A$ to catch the thief at 60km/hr., then which of the following statements is true?

A. Party $X$ reaches 37.5 minutes after Party $Y$ has caught the thief.
B. Party $Y$ reaches 37.5 minutes after Party $X$ has caught the thief
C. Party $X$ and Party $Y$ has caught the thief together.
D. Party $X$ was 20 km away when the thief caught.

cat1997 quantitative-aptitude

## 7.74.73 Quantitative Aptitude: CAT 1998 | Question: 146 top

The following table gives the quantity of Apples (in tonnes) arriving in the Agricultural Produce Market Committee (APMC), New Delhi in the year 1990-91. In the months in which demand was more than supply, the additional demand was met by the stock from cold storage.

| Month | HP | UP | J&K | Cold | Total |
|---|---|---|---|---|---|
| April | 7 | 0 | 7 | 59 | 73 |
| May | 12 | 1 | 0 | 0 | 13 |
| June | 9741 | 257 | 8017 | 0 | 18015 |
| July | 71497 | 10 | 18750 | 0 | 90257 |
| Aug | 77675 | 0 | 20286 | 0 | 97961 |

| | | | | | |
|---|---|---|---|---|---|
| Sep. | 539120 | | 5660 | 0 | 110514 |

| Feb. | 25 | 0 | 11183 | 77 | 11285 |
| March | 0 | 0 | 683 | 86 | 760 |

In which of the following periods was the supply greater than the demand?

A. Aug-Mar B. June-Oct C. May-Sep D. Nov-April

cat1998 quantitative-aptitude

## 7.74.77 Quantitative Aptitude: CAT 1998 | Question: 151 top

The following table gives the quantity of Apples (in tonnes) arriving in the Agricultural Produce Market Committee (APMC), New Delhi in the year 1990-91. In the months in which demand was more than supply, the additional demand was met by the stock from cold storage.

| Month | HP | UP | J&K | Cold | Total |
|---|---|---|---|---|---|
| April | 7 | 0 | 7 | 59 | 73 |
| May | 12 | 1 | 0 | 0 | 13 |
| June | 9741 | 257 | 8017 | 0 | 18015 |
| July | 71497 | 10 | 18750 | 0 | 90257 |
| Aug | 77675 | 0 | 20286 | 0 | 97961 |
| Sep. | 53912 | 0 | 5660 | 0 | 110514 |
| Oct. | 12604 | 0 | 79591 | 24 | 92219 |
| Nov. | 3499 | 0 | 41872 | 42 | 45413 |
| Dec. | 1741 | 0 | 14822 | 15 | 16578 |
| Jan | 315 | 0 | 10922 | 201 | 11438 |
| Feb. | 25 | 0 | 11183 | 77 | 11285 |
| March | 0 | 0 | 683 | 86 | 760 |

Using data in Q.150, if there were 250 trees per hectare then how many hectares of land was used?

A. 9400 B. 49900 C. 50000 D. 49453

cat1998 quantitative-aptitude

## 7.74.78 Quantitative Aptitude: CAT 1998 | Question: 156 top

If the same data as above can be used, with the additional information that the numbers of households in each category were equally distributed in all the regions then answer Q 156.

The ratio of total income for the high-income category to the upper middle class increased by how much percentage in the given period?

A. 20 B. 18.7
C. 25 D. cannot be determined.

cat1998 quantitative-aptitude

## 7.74.79 Quantitative Aptitude: CAT 1998 | Question: 157 top

If the same data as above can be used, with the additional information that the numbers of households in each category were equally distributed in all the regions then answer Q 157.

The average income for the northern region in $87-88$, was

A. 37727
B. 37277
C. 35000
D. cannot be determined.

## 7.74.80 Quantitative Aptitude: CAT 1998 | Question: 158 top

Krishna distributed 10 acres of land to Gopal and Ram who paid him the total amount in the ratio $2:3$. Gopal invested a further Rs. 2 lakh in the land and planted coconut and lemon trees in the ratio $5:1$ on equal area of land. There were a total of 100 lemon trees. The cost of one coconut was Rs. 5. The crop took 7 years to mature and when the crop was reaped in 1997, the total revenue generated was 25% of the total amount put in by Gopal and Ram together. The revenue generated from the coconut and lemon trees was in the ratio $3:2$ and it was shared equally by Gopal and Ram as the initial amount spent by them were equal.

What was the total output of coconuts?

A. 24000 B. 36000 C. 18000 D. 48000

cat1998 quantitative-aptitude

## 7.74.81 Quantitative Aptitude: CAT 1998 | Question: 159 top

Krishna distributed 10 acres of land to Gopal and Ram who paid him the total amount in the ratio $2:3$. Gopal invested a further Rs. 2 lakh in the land and planted coconut and lemon trees in the ratio $5:1$ on equal area of land. There were a total of 100 lemon trees. The cost of one coconut was Rs. 5. The crop took 7 years to mature and when the crop was reaped in 1997, the total revenue generated was 25% of the total amount put in by Gopal and Ram together. The revenue generated from the coconut and lemon trees was in the ratio $3:2$ and it was shared equally by Gopal and Ram as the initial amount spent by them were equal.

What was the value of output per acre of lemon tress planted (in lakh/acre)

A. 0.24
B. 2.4
C. 24
D. cannot be determined

cat1998 quantitative-aptitude

## 7.74.82 Quantitative Aptitude: CAT 1998 | Question: 160 top

Krishna distributed 10 acres of land to Gopal and Ram who paid him the total amount in the ratio $2:3$. Gopal invested a further Rs. 2 lakh in the land and planted coconut and lemon trees in the ratio $5:1$ on equal area of land. There were a total of 100 lemon trees. The cost of one coconut was Rs. 5. The crop took 7 years to mature and when the crop was reaped in 1997, the total revenue generated was 25% of the total amount put in by Gopal and Ram together. The revenue generated from the coconut and lemon trees was in the ratio $3:2$ and it was shared equally by Gopal and Ram as the initial amount spent by them were equal.

What was the amount received by Gopal in 1997?

A. Rs.1.5 lakh
B. Rs.3.0 lakh
C. Rs.6 lakh
D. None of these

cat1998 quantitative-aptitude

## 7.74.83 Quantitative Aptitude: CAT 1998 | Question: 161 top

Krishna distributed 10 acres of land to Gopal and Ram who paid him the total amount in the ratio $2:3$. Gopal invested a further Rs. 2 lakh in the land and planted coconut and lemon trees in the ratio $5:1$ on equal area of land. There were a total of 100 lemon trees. The cost of one coconut was Rs.5. The crop took 7 years to mature and when the crop was reaped in 1997, the total revenue generated was 25% of the total amount put in by Gopal and Ram together. The revenue generated from the coconut and lemon trees was in the ratio $3:2$ and it was shared equally by Gopal and Ram as the initial amount spent by them were equal.

What was the value of output per tree for coconuts?

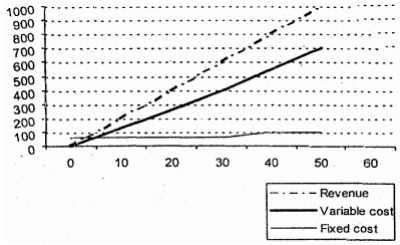
A. 36 B. 360 C. 3600 D. 240

cat1998 quantitative-aptitude

## 7.74.84 Quantitative Aptitude: CAT 1998 | Question: 163 top

Ghosh Babu has a manufacturing unit. The following graph gives the cost for a various number of units. Profit Revenue -

Variable Cost - Fixed Cost. The fixed cost remains constant up to 34 units after which additional investment is to be done in fixed assets. In any case, production can not exceed 50 units.



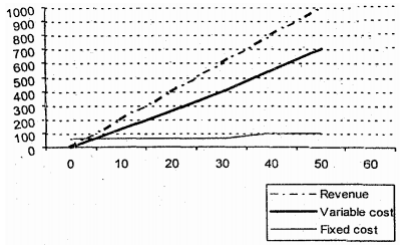
What is the minimum number of units that need to be produced to make sure that there was no loss?

A. 5 B. 10 C. 20 D. indeterminable.

cat1998 quantitative-aptitude

## 7.74.85 Quantitative Aptitude: CAT 1998 | Question: 164 top

Ghosh Babu has a manufacturing unit. The following graph gives the cost for a various number of units. Profit Revenue - Variable Cost - Fixed Cost. The fixed cost remains constant up to 34 units after which additional investment is to be done in fixed assets. In any case, production can not exceed 50 units.



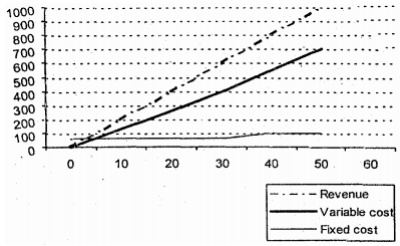
How many units should be manufactured such that profit was at least Rs. 50?

A. 20 B. 34 C. 45 D. 25

cat1998 quantitative-aptitude

## 7.74.86 Quantitative Aptitude: CAT 1998 | Question: 165 top

Ghosh Babu has a manufacturing unit. The following graph gives the cost for a various number of units. Profit Revenue - Variable Cost - Fixed Cost. The fixed cost remains constant up to 34 units after which additional investment is to be done in fixed assets. In any case, production can not exceed 50 units.



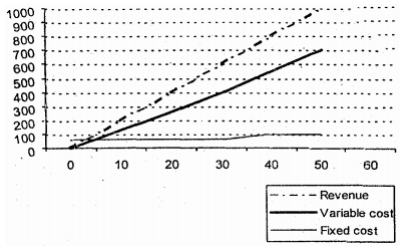
If at the most 40 units can be manufactured then what is the number of units that can be manufactured to maximise profit?

A. 40 B. 34 C. 35 D. 25

cat1998 quantitative-aptitude

## 7.74.87 Quantitative Aptitude: CAT 1998 | Question: 166 top

Ghosh Babu has a manufacturing unit. The following graph gives the cost for a various number of units. Profit Revenue - Variable Cost - Fixed Cost. The fixed cost remains constant up to 34 units after which additional investment is to be done in fixed assets. In any case, production can not exceed 50 units.



If the production cannot exceed 45 units then what is the number of units than can maximise profit?

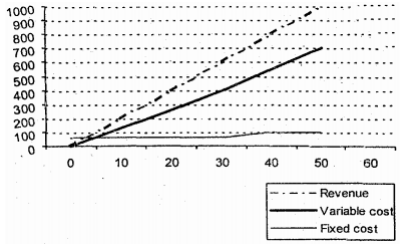
A. 40 B. 34 C. 45 D. 35

cat1998 quantitative-aptitude

Answer key

## 7.74.88 Quantitative Aptitude: CAT 1998 | Question: 167 top

Ghosh Babu has a manufacturing unit. The following graph gives the cost for a various number of units. Profit Revenue - Variable Cost - Fixed Cost. The fixed cost remains constant up to 34 units after which additional investment is to be done in fixed assets. In any case, production can not exceed 50 units.



If the fixed cost of production goes up by Rs. 40 then what is the minimum number of units that need to be manufactured to make sure that there is no loss?

A. 10 B. 17 C. 15 D. 20

cat1998 quantitative-aptitude

## 7.74.89 Quantitative Aptitude: CAT 1998 | Question: 51 top

You have reached Utopia where you find tow kinds of precious stones, rubies and emeralds. The worth of a ruby and that of an emerald are Rs. 4 crores and Rs. 5 crores respectively while their weights are 0.3 kg and 0.4 kg respectively. You have a bag that can carry a maximum of 12 kgs. How many rubies and emeralds would you carry such that their total value is maximised?

A. 20 rubies and 15 emeralds
B. 8 rubies and 24 emeralds
C. 0 rubies and 30 emeralds
D. None of the above

cat1998 quantitative-aptitude

## 7.74.90 Quantitative Aptitude: CAT 1998 | Question: 52 top

A colony of bacteria is a container grows by each bacterium splitting into eight next generation bacteria. However, because of environmental conditions, only 50% of the bacteria in a generation can split as above. A colony of first generation bacteria was put in the container and it was found that the number of seventh generation bacteria was 4096 million. What was the size of the first generation population initially put in the container?

A. 2 million B. 8 million C. 1 million D. 4 million

cat1998 quantitative-aptitude

## 7.74.91 Quantitative Aptitude: CAT 1998 | Question: 53 top

A factory produces a product (measured in cubic feet) over seven days as per the following schedule:

| Day 1 | Day 2 | Day 3 | Day 4 | Day 5 | Day 6 | Day 7 |
|---|---|---|---|---|---|---|
| 150 | 180 | 120 | 250 | 160 | 120 | 150 |

The finished goods are to be transported to the market by a truck having a capacity of 200 cubic feet. Any finished goods (ready at the end of the day) retained overnight at the factory will incur a storage cost of Rs. 5 per cubic foot for each night of

storage. The hiring cost for the truck is Rs. 100 per day.

If the total cost of transportation and storage is to be minimised, the truck should operate on

A. 2nd, 4th, 6th and 7th days.
B. only the 7th day
C. 2nd, 4th, 5th and 7th days
D. None of the above

cat1998 quantitative-aptitude

## 7.74.92 Quantitative Aptitude: CAT 1998 | Question: 54 top

A factory produces a product (measured in cubic feet) over seven days as per the following schedule:

Day 1 Day 2 Day 3 Day 4 Day 5 Day 6 Day 7

150 180 120 250 160 120 150

The finished goods are to be transported to the market by a truck having a capacity of 200 cubic feet. Any finished goods (ready at the end of the day) retained overnight at the factory will incur a storage cost of Rs. 5 per cubic foot for each night of storage. The hiring cost for the truck is Rs. 100 per day.

If the storage cost reduces to Rs. 0.80 per cubic foot per night, the truck should operate on

A. 2nd, 4th, 6th and 7th days
B. only the 7th day
C. 2nd, 4th, 5th and 7th days
D. None of the above

cat1998 quantitative-aptitude

## 7.74.93 Quantitative Aptitude: CAT 1998 | Question: 55 top

A company has a job to prepare certain number of cans and there are three machines A, B, C for this job. A can complete the job in 3 days, B can complete the job in 4 days and C can complete the job in 6 days. How many days the company will take to complete the job if all the machines are used simultaneously?

A. 4 days
B. 4/3 days
C. 3 days
D. 12 days.

cat1998 quantitative-aptitude

## 7.74.94 Quantitative Aptitude: CAT 1998 | Question: 56 top

$n^3$ is odd. Which of the following statement(s) is/are true.

A.$n$ is odd

B.$n^2$ is odd

C.$n^2$ is even

A. *A* only
B. *B* only
C. *A* and *B* only
D. *A* and *C* only.

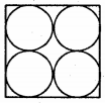
A man engaged a servant on the condition that he would pay him Rs. 90 and also give him a turban after service of one year. He served only for nine months and received a turban and Rs. 65. Find the value of the turban in rupees.

A. 10 B. 9 C. 0 D. 2.50

cat1998 quantitative-aptitude

## 7.74.106 Quantitative Aptitude: CAT 1998 | Question: 72 top

Four identical circular coins are placed inside the square $ABCD$ as in the following diagram:



If for each coin, (area/circumference) = (circumference/ area) then the area not occupied by the corns in $ABCD$ is

A. $8(4-\pi)$ B. $16(8-\pi)$ C. $16(4-\pi)$ D. None of these

cat1998 quantitative-aptitude

## 7.74.107 Quantitative Aptitude: CAT 1998 | Question: 73 top

Three wheels can complete respectively $60, 36, 24$ revolutions per minute. There is a red spot on each wheel that touches the ground at time zero. After how much time all these spots will simultaneously touch the ground again?

A. $5/2$ seconds B. $5/3$ seconds C. 5 seconds D. 7.5 seconds

cat1998 quantitative-aptitude

## 7.74.108 Quantitative Aptitude: CAT 1998 | Question: 74 top

A certain number when divided by $899$ leaves the remainder $63$. Find the remainder when the same number is divided by $29$.

A. 5
B. 4
C. 1
D. Cannot be determined.

cat1998 quantitative-aptitude

## 7.74.109 Quantitative Aptitude: CAT 1998 | Question: 75 top

A is the set of positive integers such that when divided by $2, 3, 4, 5, 6$ leaves the remainders $1, 2, 3, 4, 5$ respectively. How many integers between 0 and 100 belong to set $A$?

A. 0 B. 1 C. 2 D. None of these

cat1998 quantitative-aptitude

## 7.74.110 Quantitative Aptitude: CAT 1998 | Question: 81 top

The number of students who have opted the subjects $A, B, C$ are $60, 84, 108$ respectively. The examination is to be conducted for these students such that only the students of the same subject are allowed in one room. Also the number of students in each room must be same. What is the minimum number of rooms that should be arranged to meet all these conditions?

A. 28 B. 60 C. 12 D. 21

cat1998 quantitative-aptitude

## 7.74.111 Quantitative Aptitude: CAT 1998 | Question: 82 top

How many five digit numbers can be formed using $2, 3, 8, 7, 5$ exactly once such that the number is divisible by $125$?

A. 0 B. 1 C. 4 D. 4

cat1998 quantitative-aptitude

Answer key

## 7.74.112 Quantitative Aptitude: CAT 1998 | Question: 83 top

I have one rupee coins, fifty paise coins and twenty five paise coins. The number of coins are in the ratio $2.5:3:4$. If the total amount with me is Rs. 210, find the number of one rupee coins:

A. 90 B. 85 C. 100 D. 105

cat1998 quantitative-aptitude

## 7.74.113 Quantitative Aptitude: CAT 1998 | Question: 84 top

My ten year old nephew Debu adores chocolates, likes biscuits, and hates apples. One evening I took him to a super market and

told him that he could buy as many chocolates as he wanted, but then he should have twice that number of biscuits and finally buy more apples than the total number of chocolates and biscuits. The chocolates cost Re. 1 per piece and apples are twice as expensive; the price of four biscuits matches the price of one apple. Which of the following can possibly be the amount spent by me on Debu's evening snacks?

A. Rs.34 B. Rs.16 C. Rs.25 D. None of these

cat1998 quantitative-aptitude

### 7.74.114 Quantitative Aptitude: CAT 1998 | Question: 85 top

A company imports component *A* from Germany and component *B* from USA. If then assembles them along with other components to produce a machine used in a chemical process. Component *A* contributes 30% to the production cost and component *B* contributes 50% to the production cost. The current practice is to sell the machine at a price that is 20% over the production cost. Due to foreign exchange fluctuations the German Mark has become costlier by 30% and the US Dollar by 22 %. But the company is unable to increase the selling price by more than 10%.

The current margin of profit is:

A. 10% B. 15% C. 12% D. 8%

cat1998 quantitative-aptitude

### 7.74.115 Quantitative Aptitude: CAT 1998 | Question: 86 top

A company imports component *A* from Germany and component *B* from USA. If then assembles them along with other components to produce a machine used in a chemical process. Component *A* contributes 30% to the production cost and component *B* contributes 50% to the production cost. The current practice is to sell the machine at a price that is 20% over the production cost. Due to foreign exchange fluctuations the German Mark has become costlier by 30% and the US Dollar by 22 %. But the company is unable to increase the selling price by more than 10%.

Suppose the US dollar becomes cheaper by 12% of its original value, and the German Mark becomes costlier by 20% of its original value. To achieve a profit margin of 10%, the selling price must exceed the production cost by

A. 10% B. 20% C. 12% D. 15%

cat1998 quantitative-aptitude

### 7.74.116 Quantitative Aptitude: CAT 1998 | Question: 92 top

What is the digit in the unit place of $2^{51}$?

A. 2 B. 8 C. 1 D. 4

cat1998 quantitative-aptitude

Answer key

### 7.74.117 Quantitative Aptitude: CAT 1998 | Question: 93 top

From a barrel containing 500ml of alcohol, 3 cups of alcohol are poured into a barrel containing 500ml of water. After mixing the contests well, 3 cups of the mixture are poured into the barrel of alcohol. The percentage of water into the barrel of alcohol. The percentage of water in tie barrel of alcohol and the percentage of alcohol in the barrel of water are then compared. Which one of the following is true?

A. The former is greater than the latter
B. The two are equal
C. The latter is greater than the former
D. Cannot be determined

cat1998 quantitative-aptitude

### 7.74.118 Quantitative Aptitude: CAT 1998 | Question: 94 top

Consider a 99 digit number created by writing side by side the first fifty four natural number as follows:

12345678910111213…….5354

The above number when divided by 8 will leave a remainder of

A. 6 B. 4 C. 2 D. 0

cat1998 quantitative-aptitude

Answer key

## 7.82.10 Sequences&series: CAT 2006 | Question: 55 top

Consider the sequence where the $n^{\text{th}}$ term $t_n = \frac{n}{n+2}$, $n = 1, 2, \ldots$. The value of $t_3 \times t_4 \times t_5 \times \cdots \times t_{53}$ equals:

A. $2/495$ B. $2/477$ C. $12/55$ D. $1/1485$ E. $1/2970$

cat2006 quantitative-aptitude sequences&series

Answer key

## 7.82.11 Sequences&series: CAT 2007 | Question: 04 top

**Directions for the below question:**

Let $S$ be the set of all pairs $(i, j)$ where $1 \le i \le j < n$ and $n \ge 4$. Any two distinct number of $S$ are called 'friends' if they have one constituent of the pairs in common and 'enemies' otherwise. For example, if $n = 4$, then $S = \{(1, 2), (1, 3), (1, 4), (2, 3), (2, 4), (3, 4)\}$. Here, $(1, 2)$ and $(1, 3)$ are friends, $(1, 2), (2, 3)$ are also friends, but $(1, 4)$ and $(2, 3)$ are enemies.

For general, $n$ how many enemies will each member of $S$ have?

A. $n - 3$

B. $\frac{1}{2}(n^2 - 3n - 2)$

C. $2n - 7$

D. $\frac{1}{2}(n^2 - 5n + 6)$

E. $\frac{1}{2}(n^2 - 7n + 14)$

cat2007 quantitative-aptitude sequences&series

Answer key

## 7.82.12 Sequences&series: CAT 2007 | Question: 05 top

**Directions for the below question:**

Let $S$ be the set of all pairs $(i, j)$ where $1 \le i \le j < n$ and $n \ge 4$. Any two distinct number of $S$ are called 'friends' if they have one constituent of the pairs in common and 'enemies' otherwise. For example, if $n = 4$, then $S = \{(1, 2), (1, 3), (1, 4), (2, 3), (2, 4), (3, 4)\}$. Here, $(1, 2)$ and $(1, 3)$ are friends, $(1, 2), (2, 3)$ are also friends, but $(1, 4)$ and $(2, 3)$ are enemies.

For general $n$, consider any two members of $S$ that are friends. How many other members of $S$ will be common friends of both these members?

A. $\frac{1}{2}(n^2 - 5n + 8)$

B. $2n - 6$

C. $\frac{1}{2}n(n - 3)$

D. $n - 2$

E. $\frac{1}{2}(n^2 - 7n + 16)$

Let $a_{n+1} = 2a_n + 1 (n = 0, 1, 2, \ldots)$ and $a_0 = 0$. Then $a_{10}$ nearest to.

A. 1023 B. 2047 C. 4095 D. 8195

cat2014 quantitative-aptitude sequences&series

Answer key

### 7.82.18 Sequences&series: CAT 2014 | Question: 47, 48, 49, 50 top

Direction for questions: Answer the questions based on the following information. A series $S_1$ of five positive integers is such that the third term is half the first term and the fifth term is 20 more than the first term. In series $S_2$, the $n$th term defined as the difference between the $(n + 1)$ term and the $n$th term of series $S_1$, is an arithmetic progression with a common difference of 30.

First term of $S_1$ is

a. 80 b. 90 c. 100 d. 120

What is the difference between second and fourth terms of $S_1$?

a. 10 b. 20 c. 30 d. 60

What is the average value of the terms of series $S_1$?

a. 60 b. 70 c. 80 d. Average is not an integer

What is the sum of series $S_2$?

a. 10 b. 20 c. 30 d. 40

## 7.88 Speed Distance Time (82) top

### 7.88.1 Speed Distance Time: CAT 2000 | Question: 60 top

A truck travelling at 70 kilometres per hour uses 30% more diesel to travel a certain distance than it does when it travels at the speed of 50 kilometres per hour. If the truck can travel 19.5 kilometres on a litre of diesel at 50 kilometres per hour, how far can the truck travel on 10 litres of diesel at a speed of 70 kilometres per hour?

A. 130
B. 140
C. 150
D. 175

cat2000 quantitative-aptitude speed-distance-time

### 7.88.2 Speed Distance Time: CAT 2000 | Question: 80 top

**Answer the following questions based on the information given below.**
There are five machines A, B C, D and E situated on a straight line at distances of 10 metres, 20 metres, 30 metres, 40 metres and 50 metres respectively from the origin of the line. A robot is stationed at the origin of the line. The robot serves the machines with raw material whenever a machine becomes idle. All the raw material is located at the origin. The robot is in an idle state at the origin at the beginning of a day. As soon as one or more machines become idle, they send messages to the robot-station and the robot starts and serves all the machines from which it received messages. If a message is received at the station while the robot is away from it, the robot takes notice of the message only when it returns to the station. While moving, it serves the machines in the sequence in which they are encountered, and then returns to the origin. If any messages are

pending at the station when it returns, it repeats the process again. Otherwise, it remains idle at the origin till the next message(s) is received.

Suppose on a certain day, machines A and D have sent the first two messages to the origin at the beginning of the first second, and C has sent a message at the beginning of the 5th second and B at the beginning of the 6th second, and E at the beginning of the 10th second. How much distance in metres has the robot travelled since the beginning of the day, when it notices the message of E? Assume that the speed of movement of the robot is 10 metres per second.

A. 140 B. 80 C. 340 D. 360

cat2000 quantitative-aptitude speed-distance-time

### 7.88.3 Speed Distance Time: CAT 2000 | Question: 81 top

**Answer the following question based on the information given below.**
There are five machines A, B C, D and E situated on a straight line at distances of 10 metres, 20 metres, 30 metres, 40 metres and 50 metres respectively from the origin of the line. A robot is stationed at the origin of the line. The robot serves the machines with raw material whenever a machine becomes idle. All the raw material is located at the origin. The robot is in an idle state at the origin at the beginning of a day. As soon as one or more machines become idle, they send messages to the robot-station and the robot starts and serves all the machines from which it received messages. If a message is received at the station while the robot is away from it, the robot takes notice of the message only when it returns to the station. While moving, it serves the machines in the sequence in which they are encountered, and then returns to the origin. If any messages are pending at the station when it returns, it repeats the process again. Otherwise, it remains idle at the origin till the next message(s) is received.

Suppose there is a second station with raw material for the robot at the other extreme of the line which is 60 metres from the origin, that is, 10 metres from E. After finishing the services in a trip, the robot returns to the nearest station. If both stations are equidistant, it chooses the origin as the station to return to. Assuming that both stations receive the messages sent by the machines and that all the other data remains the same, what would be the answer to the above question?

A. 120 B. 140 C. 340 D. 70

cat2000 quantitative-aptitude speed-distance-time

### 7.88.4 Speed Distance Time: CAT 2001 | Question: 25 top

Shyama and Vyom walk up an escalator (moving stairway). The escalator moves at a constant speed. Shyama takes three steps for every two of Vyom's steps. Shyama gets to the top of the escalator after having taken 25 steps. While Vyom (because his slower pace lets the escalator do a little more of the work) takes only 20 steps to reach the top. If the escalator were turned off, how many steps would they have to take to walk up?

A. 40 B. 50 C. 60 D. 80

cat2001 quantitative-aptitude speed-distance-time

### 7.88.5 Speed Distance Time: CAT 2001 | Question: 32 top

A train X departs from station A at 11.00 a.m. for station B, which is 180 km away. Another train Y departs from station B at 11.00 a.m. for station A. Train X travels at an average speed of 70 km/hr and does not stop anywhere until it arrives at station B. Train Y travels at an average speed of 50 km/hr, but has to stop for 15 minutes at station *C*, which is 60 km away from station B enroute to station A. Ignoring the lengths of the trains, what is the distance, to the nearest km, from station A to point where the trains cross other?

A. 112 B. 118 C. 120 D. None of these

cat2001 quantitative-aptitude speed-distance-time

### 7.88.6 Speed Distance Time: CAT 2001 | Question: 36 top

Three runners A, B and C run a race, with runner A finishing 12 metres ahead of runner B and 18 metres ahead of runner C, while runner B finishes 8 metres ahead of runner C. Each runner travels the entire distance at a constant speed. What was the length of the race?

A. 36 meters B. 48 meters C. 60 meters D. 72 meters

cat2001 quantitative-aptitude speed-distance-time

Answer key

### 7.88.7 Speed Distance Time: CAT 2002 | Question: 56 top

Only a single rail track exists between station A and B on a railway line. One hour after the north bound superfast train N leaves station A for station B, a south passenger train S reaches station A from station B. The speed of the superfast train is twice that of a normal express train E, while the speed of a passenger train s is half that of E. On a particular day N leaves station B from station A, 20 minutes behind the normal schedule. In order to maintain the schedule both N and S increased their speed. If the superfast train doubles its speed, what should be the ration (approximately) of the speed of passenger train to that of the superfast train so that the passenger train S reaches exactly at the scheduled time at the station A on that day.

A. 1 : 3 B. 1 : 4 C. 1 : 5 D. 1 : 6

cat2002 quantitative-aptitude speed-distance-time

### 7.88.8 Speed Distance Time: CAT 2002 | Question: 69 top

On a straight road XY, 100 metres in length, 5 stones are kept beginning from the end X. The distance between two adjacent stones is 2 metres. A man is asked to collect the stones one at a time and put at the end Y. What is the distance covered by him?

A. 460 metres B. 540 metres C. 860 metres D. 920 metres

cat2002 quantitative-aptitude speed-distance-time

### 7.88.9 Speed Distance Time: CAT 2002 | Question: 97 top

There is a tunnel connecting city A & B. There is a CAT which is standing at $\frac{3}{8}$ the length of the tunnel from A. It listens a whistle of the train and starts running towards the entrance where, the train and the CAT meet. In another case, the CAT started running towards the exit and the train again met the CAT at the exit. What is the ratio of their speeds?

A. 4 : 1 B. 1 : 2 C. 8 : 1 D. None of these

cat2002 quantitative-aptitude speed-distance-time

### 7.88.10 Speed Distance Time: CAT 2003 | Question: 1-111 top

**Answer the question on the basis of the information given below:**

A city has two perfectly circular and concentric ring roads, the outer ring road (OR) being twice as long as the inner ring road (IR). There are also four (straight line) chord roads from E1, the east end point of OR to N2, the north end point of IR; from N1, the north end point of OR to W2, the west end point of IR; from W1, the west end point of OR, to S2, the south end point of IR; and from S1, the south end point of OR to E2, the east end point of IR. Traffic moves at a constant speed $30\pi$ km/hr on the OR road, $20\pi$ km/hr on the IR road, and $15\sqrt{5}$ km/hr on all chord roads.

The ratio of the sum of the length of all chord roads, to the length of the outer ring road is

A. $\sqrt{5} : 2$ B. $\sqrt{5} : -2$ C. $\sqrt{5} : \pi$ D. None of these

cat2003-1 quantitative-aptitude speed-distance-time

Answer key

### 7.88.11 Speed Distance Time: CAT 2003 | Question: 1-112 top

**Answer the question on the basis of the information given below:**

A city has two perfectly circular and concentric ring roads, the outer ring road (OR) being twice as long as the inner ring road (IR). There are also four (straight line) chord roads from E1, the east end point of OR to N2, the north end point of IR; from N1, the north end point of OR to W2, the west end point of IR; from W1, the west end point of OR, to S2, the south end point of IR; and from S1, the south end point of OR to E2, the east end point of IR. Traffic moves at a constant speed $30\pi$ km/hr on the OR road, $20\pi$ km/hr on the IR road, and $15\sqrt{5}$ km/hr on all chord roads.

Amit wants to reach N2 from S1. It would take him 90 minutes if he goes on minor arc S1 - E1 on OR, and then on the chord road E1 - N2. What is the radius of the outer ring road in km?

A. 60 B. 40 C. 30 D. 20

cat2003-1 quantitative-aptitude speed-distance-time

## 7.88.12 Speed Distance Time: CAT 2003 | Question: 1-113 top

**Answer the question on the basis of the information given below:**

A city has two perfectly circular and concentric ring roads, the outer ring road (OR) being twice as long as the inner ring road (IR). There are also four (straight line) chord roads from E1, the east end point of OR to N2, the north end point of IR; from N1, the north end point of OR to W2, the west end point of IR; from W1, the west end point of OR, to S2, the south end point of IR; and from S1, the south end point of OR to E2, the east end point of IR. Traffic moves at a constant speed $30\pi$ km/hr on the OR road, $20\pi$ km/hr on the IR road, and $15\sqrt{5}$ km/hr on all chord roads.

Amit wants to reach E2 from N1 using the first chord N1 - W2 and then the inner ring road. What will be his travel time in minutes on the basis of the information given in the above question?

A. 60 B. 45 C. 90 D. 105

cat2003-1 quantitative-aptitude speed-distance-time

## 7.88.13 Speed Distance Time: CAT 2003 | Question: 1-120 top

In a 4000 meter race around a circular stadium having a circumference of 1000 meters, the fastest runner and the slowest runner reach the same point at the end of 5th minute, for the first time after the start of the race. All the runners have the same starting point and each runner maintains a uniform speed throughout the race. If the fastest runner runs at twice the speed of the slowest runner, what is the time taken by the fastest runner to finish the race?

A. 20 min B. 15 min C. 10 min D. 5 min

cat2003-1 quantitative-aptitude speed-distance-time

Answer key

## 7.88.14 Speed Distance Time: CAT 2003 | Question: 2-56 top

Two straight roads R1 and R2 diverge from a point A at an angle of $120^\circ$. Ram starts walking from point A along R1 at a uniform speed of 3 km/hr. Shyam starts walking at the same time from A along R2 at a uniform speed of 2 km/hr. They continue walking for 4 hours along their respective roads and reach points B and C on R1 and R2 , respectively. There is a straight line path connecting B and C. Then Ram returns to point A after walking along the line segments BC and CA. Shyam also returns to A after walking along line segments CB and BA. Their speeds remain unchanged. The time interval (in hours) between Ram"s and Shyam"s return to the point A is:

A. $\frac{10\sqrt{19}+26}{3}$ B. $\frac{2\sqrt{19}+10}{3}$

C. $\frac{\sqrt{19}+26}{3}$ D. $\frac{10\sqrt{19}+10}{3}$

cat2003-2 quantitative-aptitude speed-distance-time

## 7.88.15 Speed Distance Time: CAT 2004 | Question: 39 top

A father and his son are waiting at a bus stop in the evening. There is a lamp post behind them. The lamp post, the father and his son stand on the same straight line. The father observes that the shadows of his head and his son's head are incident at the same point on the ground. If the heights of the lamp post, the father and his son are 6 meters, 1.8 meters and 0.9 meters respectively, and the father is standing 2.1 meters away from the post, then how far ( in meters) the son is standing from his father?

A. 0.9 B. 0.75 C. 0.6 D. 0.45

cat2004 quantitative-aptitude speed-distance-time

## 7.88.16 Speed Distance Time: CAT 2004 | Question: 41 top

Karan and Arjun run a 100-metre race, where Karan beats Arjun by 10 metres. To do a favour to Arjun, Karan starts 10 meters behind the standing line in a second 100-metre race. They both run at their earlier speeds. Which of the following is true in connection with the second race?

A. Karan and Arjun reach the finishing line simultaneously
B. Arjun beats Karan by 1 metre
C. Arjun beats Karan by 11 metre
D. Karan beats Arjun by 1 metre

cat2004 quantitative-aptitude speed-distance-time

### 7.88.17 Speed Distance Time: CAT 2004 | Question: 44 top

If a man cycles at 10 km per hour, then he arrives at a certain place at 1 p.m. If he cycles at 15 km per hour, he will arrive at the same place by 11 a.m. At what he must he cycle to get there at noon?

A. 11 km per hour
B. 12 km per hour
C. 13 km per hour
D. 14 km per hour

cat2004 quantitative-aptitude speed-distance-time

Answer key

### 7.88.18 Speed Distance Time: CAT 2004 | Question: 52 top

Two boats, travelling at 5 and 10 kms per hour, head directly towards each other. They begin at a distance of 20 kms from each other. How far apart are they (in kms) one minute before they collide?

A. 1/12 B. 1/6 C. 1/4 D. 1/3

cat2004 quantitative-aptitude speed-distance-time

Answer key

### 7.88.19 Speed Distance Time: CAT 2004 | Question: 65 top

A sprinter starts running on a circular path of radius $r$ metres. Her average speed (in metres/minute) is $\pi r$ during the first 30 seconds, $\pi r/2$ during next 1 minute, $\pi r/4$ during next 2 minutes, $\pi r/8$ during next 4 minutes, and so on. What is the ratio of the time taken for the $n$-th round to that for the previous round?

A. 4 B. 8 C. 16 D. 32

cat2004 quantitative-aptitude speed-distance-time

### 7.88.20 Speed Distance Time: CAT 2005 | Question: 04 top

A jogging park has two identical circular tracks touching each other, and a rectangular track enclosing the two circles. The edges of the rectangles are tangential to the circles. Two friends, A and B, start jogging simultaneously from the point where one of the circular tracks touches the smaller side of the rectangular track. A jog along the rectangular track, while B jogs along the two circular tracks in a figure of eight. Approximately how much faster than A does B have to run, so that they take the same time to return to their starting point?

A. 3.88% B. 4.22% C. 4.44% D. 4.72%

cat2005 quantitative-aptitude speed-distance-time

### 7.88.21 Speed Distance Time: CAT 2005 | Question: 06 top

**Answer the question based on the information given below.**

Ran and Shyam run a race between points A and B, 5 km apart. Ram starts at 9 a.m. from A at the speed of 5 km per hour, reaches B and returns to A at the same speed. Shyam starts at 9:45 a.m. from A at the speed of 10 km per hour, reached B and come back to A at the same speed.

At what time did Ram and Shyam first meet with each other?

A. 10:00 a.m. B. 10:10 a.m. C. 10:20 a.m. D. 10:30 a.m.

cat2005 quantitative-aptitude speed-distance-time

### 7.88.22 Speed Distance Time: CAT 2005 | Question: 07 top

**Answer the question based on the information given below.**

Ran and Shyam run a race between points A and B, 5 km apart. Ram starts at 9 a.m. from A at the speed of 5 km per hour, reaches B and returns to A at the same speed. Shyam starts at 9:45 a.m. from A at the speed of 10 km per hour, reached B and come back to A at the same speed.

At what time did Shyam overtake Ram?

A. 10:20 a.m. B. 10:30 a.m. C. 10:40 a.m. D. 10:50 a.m.

cat2005 quantitative-aptitude speed-distance-time

### 7.88.23 Speed Distance Time: CAT 2006 | Question: 69 top

Arun, Barun and Kiranmala start from the same place and travel in the same direction at speeds of 30, 40 and 60 km per hour respectively. Barun starts two hours after Arun. If Barun and Kiranmala overtake Arun at the same time instant, How many hours after Arun did Kiranmala start?

A. 3 B. 3.5 C. 4 D. 4.5 E. 5

cat2006 quantitative-aptitude speed-distance-time

Answer key

### 7.88.24 Speed Distance Time: CAT 2007 | Question: 08 top

**Directions for the below question.**

Cities A and B are in different time zones. A is located 3000 km east of B. The table below describes the schedule of an airline operating non-stop flights between A and B. All the times indicated are local and on the same day.

| Departure | | Arrival | |
|---|---|---|---|
| City | Time | City | Time |
| B | 8:00 am | A | 3:00 pm |
| A | 4:00 pm | B | 8:00 pm |

Assume that planes cruise at the same speed in both directions. However, the effective speed is influenced by a steady wind blowing from east to west at 50 km per hour.

What is the time difference between A and B?

A. 1 hour 30 minutes
B. 2 hours
C. 2 hours 30 minutes
D. 1 hour
E. cannot be determined

cat2007 quantitative-aptitude speed-distance-time

### 7.88.25 Speed Distance Time: CAT 2007 | Question: 09 top

**Directions for the below question.**

Cities A and B are in different time zones. A is located 3000 km east of B. The table below describes the schedule of an airline operating non-stop flights between A and B. All the times indicated are local and on the same day.

| Departure | | Arrival | |
|---|---|---|---|
| City | Time | City | Time |
| B | 8:00 am | A | 3:00 pm |
| A | 4:00 pm | B | 8:00 pm |

Assume that planes cruise at the same speed in both directions. However, the effective speed is influenced by a steady wind blowing from east to west at 50 km per hour.

What is the plane's cruising speed in km per hour?

A. 700
B. 550
C. 600
D. 500
E. cannot be determined

### 7.88.26 Speed Distance Time: CAT 2008 | Question: 24 top

Rahim plans to Drive from city A to station C, at the speed of 70 km per hour, to catch a train arriving there from B. He must reach C at least 15 minutes before the arrival of the train. The train leaves B, located 500 km south of A, at 8:00 am and travels at a speed of 50 km per hour. It is known that C is located between west and northwest of B, with BC at 60° to AB.

The latest time by which Rahim must leave A and still catch the train is closet to

A. 6:15 am B. 6:30 am C. 6:45 am D. 7:00 am E. 7:15 am

cat2008 quantitative-aptitude speed-distance-time

### 7.88.27 Speed Distance Time: CAT 2009 | Question: 14 top

In a 400 meter race around a circular stadium having a circumference of 1000 meters, the fastest runner and the slowest runner reach the same point at the end of the $5^{th}$ minute, for the first time after the start of the race. All the runners have the same starting point and each runner maintains a uniform speed through out the race. If the fastest runner runs at twice the speed of the slowest runner, what is the time taken by the fastest runner to finish the race?

a. 20 mins b. 15 mins c. 10 mins d. 5 mins

cat2009 quantitative-aptitude speed-distance-time

### 7.88.28 Speed Distance Time: CAT 2009 | Question: 15 top

A train crosses a platform 100 meters long in 60 seconds at a speed of 45 km per hour. The time taken by the train to cross an electric pole, is

A. 8 seconds B. 1 minute C. 52 seconds D. Data inadequate.

cat2009 quantitative-aptitude speed-distance-time

### 7.88.29 Speed Distance Time: CAT 2011 | Question: 7 top

Two cars A and B start from two points P and Q respectively towards each other simultaneously. After travelling some distance, at a point R, car A develops engine trouble. It continues to travel at 2/3 rd of its usual speed to meet car B at a point S where PR = QS. If the engine trouble had occurred after car A had travelled double the distance it would have met car B at a point T where ST = SQ/9. Find the ratio of speeds of A and B.

A. 4:1 B. 2:1 C. 3:1 D. 3:2

cat2011 quantitative-aptitude speed-distance-time

### 7.88.30 Speed Distance Time: CAT 2012 | Question: 19 top

A car A starts from a point P towards another point Q. Another car B starts (also from P) 1 hour after the first car and overtakes it after covering 30% of the distance PQ. After that, the cars continue. On reaching Q, car B reverses and meets car A, after covering $23\frac{1}{3}$ of the distance QP. Find the time taken by car B to cover the distance PQ (in hours).

A. 3 B. 4 C. 5 D. $3\frac{1}{3}$

cat2012 quantitative-aptitude speed-distance-time

### 7.88.31 Speed Distance Time: CAT 2013 | Question: 12 top

Two cars P and Q start from two points A and B towards each other simultaneously. They meet for the first time 40 km from B. After meeting they exchange their speeds as well as directions and proceed to their respective starting points. On reaching their starting points, they turn back with the same speeds and meet at a point 20 km from A. Find the distance between A and B.

A. 130 km B. 100 km C. 120 km D. 110 km

cat2013 quantitative-aptitude speed-distance-time

### 7.88.32 Speed Distance Time: CAT 2013 | Question: 15 top

Some persons are standing at distinct points on a circle, all facing towards the center. Each possible pair of persons who are not adjacent sing a three-minute song, one pair after another. If the total time taken by all the pairs to finish singing is 1 hour, find the number of persons standing on the circle

A. 5 B. 7 C. 9 D. 8

cat2013 quantitative-aptitude speed-distance-time

### 7.88.33 Speed Distance Time: CAT 2015 | Question: 77 top

In a mile race, Akshay can be given a start of 128 m by Bhairav. If Bhairav can give Chinmay a start of 4 m in a 100 m dash, then who out of Akshay and Chinmay will win a race of one and half miles, and what will be the final lead given by the winner to the loser? (One mile is 1, 600 m.)

A. Akshay, 1/12 mile
B. Chinmay, 1/32 mile
C. Akshay, 1/24 mile
D. Chinmay, 1/16 mile

cat2015 quantitative-aptitude speed-distance-time

Answer key

### 7.88.34 Speed Distance Time: CAT 2015 | Question: 85 top

Shyam went to Delhi to Shimla via Chandigarh by car. The distance from Delhi to Chandigarh is $\frac{3}{4}$ times the distance from Chandigarh to Shimla. The average speed from Delhi to Chandigarh was half as much again as that from Chandigarh to Shimla. If the average speed for the entire journey was 49 kmph. What was the average speed from Chandigarh to Shimla?

A. 39.2 kmph
B. 63 kmph
C. 42 kmph
D. None of the above

cat2015 quantitative-aptitude speed-distance-time

Answer key

### 7.88.35 Speed Distance Time: CAT 2016 | Question: 84 top

In a mile race, Akshay can be given a start of 128 m by Bhairav. If Bhairav can give Chinmay a start of 4 m in a 100 m dash, then who out of Akshay and Chinmay will win a race of one and half miles, and what will be the final lead given by the winner to the loser? (One mile is 1, 600 m.)

A. Akshay, 1/12 mile
B. Chinmay, 1/32 mile
C. Akshay, 1/24 mile
D. Chinmay, 1/16 mile

### 7.88.36 Speed Distance Time: CAT 2016 | Question: 86 top

A man travels three-fifths of a distance AB at a speed $3a$, and the remaining at a speed $2b$. If he goes from B to A and return at a speed $5c$ in the same time, then

A. $1/a + 1/b = 1/c$
B. $a + b = c$
C. $1/a + 1/b = 2/c$
D. None of these.

cat2016 quantitative-aptitude speed-distance-time

Answer key

### 7.88.37 Speed Distance Time: CAT 2016 | Question: 87 top

There are five machines A, B C, D and E situated on a straight line at distances of 10 metres, 20 metres, 30 metres, 40 metres and 50 metres respectively from the origin of the line. A robot is stationed at the origin of the line. The robot serves the machines with raw material whenever a machine becomes idle. All the raw material is located at the origin. The robot is in an idle state at the origin at the beginning of a day. As soon as one or more machines become idle, they send messages to the robot-station and the robot starts and serves all the machines from which it received messages. If a message is received at the station while the robot is away from it, the robot takes notice of the message only when it returns to the station. While moving, it serves the machines in the sequence in which they are encountered, and then returns to the origin. If any messages are pending at the station when it returns, it repeats the process again. Otherwise, it remains idle at the origin till the next message(s) is received.

Suppose on a certain day, machines A and D have sent the first two messages to the origin at the beginning of the first second, and C has sent a message at the beginning of the 5th second and B at the beginning of the 6th second, and E at the beginning of the 10th second. How much distance in metres has the robot travelled since the beginning of the day, when it notices the message of E? Assume that the speed of movement of the robot is 10 metres per second

A. 140
B. 80
C. 340
D. 360

cat2016 quantitative-aptitude speed-distance-time

### 7.88.38 Speed Distance Time: CAT 2017 Set-1 | Question: 70 top

A man leaves his home and walks at a speed of 12 km per hour, reaching the railway station 10 minutes after the train had departed. If instead he had walked at a speed of 15 km per hour, he would have reached the station 10 minutes before the train's departure. The distance (in km) from his home to the railway station is

A. 15 B. 16 C. 17 D. None of these

### 7.88.54 Speed Distance Time: CAT 2019 Set-2 | Question: 76 top

John jogs on track A at 6 kmph and Mary jogs on track B at 7.5 kmph. The total length of tracks A and B is 325 metres. While John makes 9 rounds of track A, Mary makes 5 rounds of track B. In how many seconds will Mary make one round of track A

_____

cat2019-2 quantitative-aptitude speed-distance-time numerical-answer

Answer key

### 7.88.55 Speed Distance Time: CAT 2019 Set-2 | Question: 81 top

Two ants A and B start from a point P on a circle at the same time, with A moving clock-wise and B moving anti-clockwise. They meet for the first time at 10:00 am when A has covered 60% of the track. If A returns to P at 10:12 am, then B returns to P at

A. 10:25am B. 10:18am C. 10:27am D. 10:45am

cat2019-2 quantitative-aptitude speed-distance-time

Answer key

### 7.88.56 Speed Distance Time: CAT 2020 Set-1 | Question: 56 top

Two persons are walking beside a railway track at respective speeds of 2 and 4 km per hour in the same direction. A train came from behind them and crossed them in 90 and 100 seconds, respectively. The time, in seconds, taken by the train to cross an electric post is nearest to

A. 87 B. 82 C. 75 D. 78

cat2020-set1 quantitative-aptitude speed-distance-time

Answer key

### 7.88.57 Speed Distance Time: CAT 2020 Set-1 | Question: 62 top

A straight road connects points A and B. Car 1 travels from A to B and Car 2 travels from B to A, both leaving at the same time. After meeting each other, they take 45 minutes and 20 minutes, respectively, to complete their journeys. If Car 1 travels

at the speed of 60 km/hr, then the speed of Car 2, in km/hr, is

A. 90 B. 100 C. 80 D. 70

cat2020-set1 quantitative-aptitude speed-distance-time

Answer key

### 7.88.58 Speed Distance Time: CAT 2020 Set-1 | Question: 65 top

Leaving home at the same time, Amal reaches office at 10:15 am if he travels at 8 km/hr, and at 9:40 am if he travels at 15 km/hr. Leaving home at 9:10 am, at what speed, in km/hr, must he travel so as to reach office exactly at 10 am?

A. 13 B. 14 C. 12 D. 11

cat2020-set1 quantitative-aptitude speed-distance-time

Answer key

### 7.88.59 Speed Distance Time: CAT 2020 Set-1 | Question: 66 top

A train travelled at one − thirds of its usual speed, and hence reached the destination 30 minutes after the scheduled time. On its return journey, the train initially travelled at its usual speed for 5 minutes but then stopped for 4 minutes for an emergency. The percentage by which the train must now increase its usual speed so as to reach the destination at the scheduled time, is nearest to

A. 58 B. 67 C. 61 D. 50

cat2020-set1 quantitative-aptitude speed-distance-time

Answer key

### 7.88.60 Speed Distance Time: CAT 2020 Set-2 | Question: 53 top

In a car race, car A beats car B by 45 km, car B beats car C by 50 km, and car A beats car C by 90 km. The distance (in km) over which the race has been conducted is

A. 500 B. 475 C. 550 D. 450

cat2020-set2 quantitative-aptitude speed-distance-time

Answer key

### 7.88.61 Speed Distance Time: CAT 2020 Set-2 | Question: 64 top

Two circular tracks T1 and T2 of radii 100 m and 20 m, respectively touch at a point A. Starting from A at the same time, Ram and Rahim are walking on track T1 and track T2 at speeds 15 km/hr and 5 km/hr respectively. The number of full rounds that Ram will make before he meets Rahim again for the first time is

A. 4 B. 3 C. 2 D. 5

cat2020-set2 quantitative-aptitude speed-distance-time

Answer key

### 7.88.62 Speed Distance Time: CAT 2020 Set-2 | Question: 68 top

A and B are two points on a straight line. Ram runs from A to B while Rahim runs from B to A. After crossing each other, Ram and Rahim reach their destinations in one minute and four minutes, respectively. If they start at the same time, then the ratio of Ram's speed to Rahim's speed is

A. 2 B. $\sqrt{2}$ C. $2\sqrt{2}$ D. $\frac{1}{2}$

cat2020-set2 quantitative-aptitude speed-distance-time

Answer key

### 7.88.63 Speed Distance Time: CAT 2020 Set-2 | Question: 69 top

The distance from B to C is thrice that from A to B. Two trains travel from A to C via B. The speed of train 2 is double that of train 1 while traveling from A to B and their speeds are interchanged while traveling from B to C. The ratio of the time taken

by train 1 to that taken by train 2 in traveling from A to C is

A. 1:4 B. 7:5 C. 5:7 D. 4:1

cat2020-set2 quantitative-aptitude speed-distance-time

Answer key

### 7.88.64 Speed Distance Time: CAT 2020 Set-3 | Question: 53 top

A and B are two railway stations 90 km apart. A train leaves A at 9:00 am, heading towards B at a speed of 40 km/hr. Another train leaves B at 10:30 am, heading towards A at a speed of 20 km/hr. The trains meet each other at

A. 11:45 am
B. 10:45 am
C. 11:20 am
D. 11:00 am

cat2020-set3 quantitative-aptitude speed-distance-time

Answer key

### 7.88.65 Speed Distance Time: CAT 2020 Set-3 | Question: 56 top

Vimla starts for office every day at 9 am and reaches exactly on time if she drives at her usual speed of 40 km/hr. She is late by 6 minutes if she drives at 35 km/hr. One day, she covers two-thirds of her distance to office in one-thirds of her usual time to reach office, and then stops for 8 minutes. The speed, in km/hr, at which she should drive the remaining distance to reach office exactly on time is

A. 29 B. 27 C. 28 D. 26

cat2020-set3 quantitative-aptitude speed-distance-time

### 7.88.66 Speed Distance Time: CAT 2020 Set-3 | Question: 63 top

Anil, Sunil, and Ravi run along a circular path of length 3 km, starting from the same point at the same time, and going in the clockwise direction. If they run at speed of 15 km/hr, 10 km/hr, and 8 km/hr, respectively, how much distance in km will Ravi have run when Anil and Sunil meet again for the first time at the starting point ?

A. 4.2 B. 5.2 C. 4.8 D. 4.6

cat2020-set3 quantitative-aptitude speed-distance-time

### 7.88.67 Speed Distance Time: CAT 2021 Set-1 | Quantitative Aptitude | Question: 18 top

Two trains cross each other in 14 seconds when running in opposite directions along parallel tracks. The faster train is 160 m long and crosses a lamp post in 12 seconds. If the speed of the other train is 6 km/hr less than the faster one, its length, in m, is

A. 190 B. 192 C. 184 D. 180

cat2021-set1 quantitative-aptitude speed-distance-time

Answer key

### 7.88.68 Speed Distance Time: CAT 2021 Set-2 | Quantitative Aptitude | Question: 17 top

Two trains A and B were moving in opposite directions, their speeds being in the ratio 5:3. The front end of A crossed the rear end of B 46 seconds after the front ends of the trains had crossed each other. It took another 69 seconds for the rear ends of the trains to cross each other. The ratio of length of train A to that of train B is

A. 2:3 B. 2:1 C. 3:2 D. 5:3

cat2021-set2 quantitative-aptitude speed-distance-time

Answer key

### 7.88.69 Speed Distance Time: CAT 2021 Set-3 | Quantitative Aptitude | Question: 9 top

Mira and Amal walk along a circular track, starting from the same point at the same time. If they walk in the same direction, then in 45 minutes, Amal completes exactly 3 more rounds than Mira. If they walk in opposite directions, then they meet for the first time exactly after 3 minutes. The number of rounds Mira walks in one hour is

|---|---|---|---|---|
| | Average | Good | Excellent | |
| Male | | | 10 | |
| Female | | | | 32 |
| Total | | 30 | | |

It is also known that:

1. Half the students were either excellent or good.
2. 40% of the students were females
3. One-third of the male students were average. Based on the above answer the following questions.

What proportion of good students are male?

A. 0 B. 0.73 C. 0.4 D. 1.0

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

### 7.95.3 Tabular Data: CAT 1995 | Question: 153 top

The following table gives data of some students. However, some data has been spoilt and cannot be read on the computer floppy

| | Performance | | | Total |
|---|---|---|---|---|
| | Average | Good | Excellent | |
| Male | | | 10 | |
| Female | | | | 32 |
| Total | | 30 | | |

It is also known that:

1. Half the students were either excellent or good.

2. 40% of the students were females

3. One-third of the male students were average. Based on the above answer the following questions.

What proportions of female students are good?

A. 0 B. 0.25 C. 0.5 D. 1.0

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.4 Tabular Data: CAT 1995 | Question: 154 top

The following table gives data of some students. However, some data has been spoilt and cannot be read on the computer floppy

| | Performance | | | Total |
|---|---|---|---|---|
| | Average | Good | Excellent | |
| Male | | | 10 | |
| Female | | | | 32 |
| Total | | 30 | | |

It is also known that:

1. Half the students were either excellent or good.

2. 40% of the students were females

3. One-third of the male students were average. Based on the above answer the following questions.

How many students are both male and good?

A. 10 B. 16 C. 22 D. 48

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.5 Tabular Data: CAT 1995 | Question: 155 top

The following table gives data of some students. However, some data has been spoilt and cannot be read on the computer floppy

| | Performance | | | Total |
|---|---|---|---|---|
| | Average | Good | Excellent | |
| Male | | | 10 | |
| Female | | | | 32 |
| Total | | 30 | | |

It is also known that:

1. Half the students were either excellent or good.

2. 40% of the students were females

3. One-third of the male students were average. Based on the above answer the following questions.

Among average students, what is the ratio of male to female?

A. 1:2 B. 2: 1 C. 3:2 D. 2:3

cat1995 quantitative-aptitude data-interpretation tabular-data

## 7.95.6 Tabular Data: CAT 1995 | Question: 156 top

Market shares in four Metropolitan cities.

| Period/ Products | Bombay 1993-94 | Calcutta 1993-94 | Delhi 1993-94 | Madras 1993-94 |
|---|---|---|---|---|
| HD | 20-15 | 35-30 | 20-15 | 20-30 |
| CO | 20-25 | 30-15 | 15-10 | 20-15 |
| BN | 45-40 | 25-35 | 35-35 | 10-10 |
| MT | 15-20 | 10-20 | 10-10 | 50-45 |

The market shares of which products did not decrease between 1993-94 in any city?

A. HD B. CO C. BN D. None of these

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.7 Tabular Data: CAT 1995 | Question: 157 top

Market shares in four Metropolitan cities.

| Period/ Products | Bombay 1993-94 | Calcutta 1993-94 | Delhi 1993-94 | madras 1993-94 |
|---|---|---|---|---|
| HD | 20-15 | 35-30 | 20-15 | 20-30 |
| CO | 20-25 | 30-15 | 15-10 | 20-15 |
| BN | 45-40 | 25-35 | 35-35 | 10-10 |
| MT | 15-20 | 10-20 | 10-10 | 50-45 |

The number of products which doubled their market shares in one or more cities is

A. 0 B. 1 C. 2 D. 3

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.8 Tabular Data: CAT 1995 | Question: 158 top

Market shares in four Metropolitan cities.

| Period/ Products | Bombay 1993-94 | Calcutta 1993-94 | Delhi 1993-94 | madras 1993-94 |
|---|---|---|---|---|
| HD | 20-15 | 35-30 | 20-15 | 20-30 |
| CO | 20-25 | 30-15 | 15-10 | 20-15 |
| BN | 45-40 | 25-35 | 35-35 | 10-10 |
| MT | 15-20 | 10-20 | 10-10 | 50-45 |

The largest percentage drop in market shares is

A. 60% B. 50% C. 53.3% D. 20%

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.9 Tabular Data: CAT 1995 | Question: 159 top

Market shares in four Metropolitan cities.

| Period/ Products | Bombay 1993-94 | Calcutta 1993-94 | Delhi 1993-94 | Madras 1993-94 |
|---|---|---|---|---|
| HD | 20-15 | 35-30 | 20-15 | 20-30 |
| CO | 20-25 | 30-15 | 15-10 | 20-15 |
| BN | 45-40 | 25-35 | 35-35 | 10-10 |
| MT | 15-20 | 10-20 | 10-10 | 50-45 |

The number of products which had 100% market share in four metropolitan cities is:

A. 0 B. 1 C. 2 D. 3

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.10 Tabular Data: CAT 1995 | Question: 160 top

Market shares in four Metropolitan cities.

| Period/ Products | Bombay 1993-94 | Calcutta 1993-94 | Delhi 1993-94 | madras 1993-94 |
|---|---|---|---|---|
| HD | 20-15 | 35-30 | 20-15 | 20-30 |
| CO | 20-25 | 30-15 | 15-10 | 20-15 |
| BN | 45-40 | 25-35 | 35-35 | 10-10 |
| MT | 15-20 | 10-20 | 10-10 | 50-45 |

The city in which the minimum number of products increased their market shares in 1993-94 was:

A. Bombay B. Delhi C. Calcutta D. Madras

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.11 Tabular Data: CAT 1995 | Question: 181 top

A company produces five types of shirts - A, B, C, D, E - using cloth of three qualities - High, Medium and Low - using dyes of three qualities - High, Medium, and Low. The following tables give, respectively: 1. The number of shirts (of each category) produced, in thousands. 2. The percentage distribution of cloth quality in each type of shirt, and 3. The percentage distribution of dye quality in each type of shirt.

Note: Each shirt requires 1.5 metres of cloth.

| | | Distribution of cloth (%) | | | | Distribution of Dye (%) | | | |
|---|---|---|---|---|---|---|---|---|---|
| Shirt Type | Number (000) | Shirt Type | High | Medium | Low | Shirt Type | High | Medium | Low |
| A | 20 | A | 80 | 20 | - | A | 70 | 15 | 15 |
| B | 30 | B | 30 | 40 | 30 | B | 20 | 50 | 30 |
| C | 30 | C | - | 70 | 30 | C | - | 60 | 40 |
| D | 10 | D | - | 60 | 40 | D | - | 40 | 60 |
| E | 10 | E | - | 10 | 90 | E | - | 20 | 80 |

What is the total requirement of cloth?

A. 150,000 m B. 200,000 m C. 225,000 m D. 250,000 m

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.12 Tabular Data: CAT 1995 | Question: 182 top

A company produces five types of shirts - A, B, C, D, E - using cloth of three qualities - High, Medium and Low - using dyes of three qualities - High, Medium, and Low. The following tables give, respectively: 1. The number of shirts (of each category) produced, in thousands. 2. The percentage distribution of cloth quality in each type of shirt, and 3. The percentage distribution of dye quality in each type of shirt.

Note: Each shirt requires 1.5 metres of cloth

| | | Distribution of cloth (%) | | | | Distribution of Dye (%) | | | |
|---|---|---|---|---|---|---|---|---|---|
| Shirt Type | Number (000) | Shirt Type | High | Medium | Low | Shirt Type | High | Medium | Low |
| A | 20 | A | 80 | 20 | - | A | 70 | 15 | 15 |
| B | 30 | B | 30 | 40 | 30 | B | 20 | 50 | 30 |
| C | 30 | C | - | 70 | 30 | C | - | 60 | 40 |
| D | 10 | D | - | 60 | 40 | D | - | 40 | 60 |
| E | 10 | E | - | 10 | 90 | E | - | 20 | 80 |

How many metres of high quality cloth is consumed by A-shirts?

A. 8,000 m B. 112,000m C. 24,000 m D. 30,000m

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.13 Tabular Data: CAT 1995 | Question: 183 top

A company produces five types of shirts - A, B, C, D, E - using cloth of three qualities - High, Medium and Low - using dyes of three qualities - High, Medium, and Low. The following tables give, respectively: 1. The number of shirts (of each

category) produced, in thousands. 2. The percentage distribution of cloth quality in each type of shirt, and 3. The percentage distribution of dye quality in each type of shirt.

Note: Each shirt requires 1.5 metres of cloth

| | | Distribution of cloth (%) | | | | Distribution of Dye (%) | | | |
|---|---|---|---|---|---|---|---|---|---|
| Shirt Type | Number (000) | Shirt Type | High | Medium | Low | Shirt Type | High | Medium | Low |
| A | 20 | A | 80 | 20 | - | A | 70 | 15 | 15 |
| B | 30 | B | 30 | 40 | 30 | B | 20 | 50 | 30 |
| C | 30 | C | - | 70 | 30 | C | - | 60 | 40 |
| D | 10 | D | - | 60 | 40 | D | - | 40 | 60 |
| E | 10 | E | - | 10 | 90 | E | - | 20 | 80 |

What is the ratio of low-quality dye used for C-shirts to that used for D-shirts?

A. 3:2 B. 2:1 C. 1:2 D. 2:3

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.14 Tabular Data: CAT 1995 | Question: 184 top

A company produces five types of shirts - A, B, C, D, E - using cloth of three qualities - High, Medium and Low - using dyes of three qualities - High, Medium, and Low. The following tables give, respectively: 1. The number of shirts (of each category) produced, in thousands. 2. The percentage distribution of cloth quality in each type of shirt, and 3. The percentage distribution of dye quality in each type of shirt.

Note: Each shirt requires 1.5 metres of cloth

| | | Distribution of cloth (%) | | | | Distribution of Dye (%) | | | |
|---|---|---|---|---|---|---|---|---|---|
| Shirt Type | Number (000) | Shirt Type | High | Medium | Low | Shirt Type | High | Medium | Low |
| A | 20 | A | 80 | 20 | - | A | 70 | 15 | 15 |
| B | 30 | B | 30 | 40 | 30 | B | 20 | 50 | 30 |
| C | 30 | C | - | 70 | 30 | C | - | 60 | 40 |
| D | 10 | D | - | 60 | 40 | D | - | 40 | 60 |
| E | 10 | E | - | 10 | 90 | E | - | 20 | 80 |

How many metres of low-quality cloth is consumed?

A. 22,500 B. 46,500 C. 60,000 D. 40,000

cat1995 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.15 Tabular Data: CAT 1995 | Question: 185 top

A company produces five types of shirts - A, B, C, D, E - using cloth of three qualities - High, Medium and Low - using dyes of three qualities - High, Medium, and Low. The following tables give, respectively: 1. The number of shirts (of each category) produced, in thousands. 2. The percentage distribution of cloth quality in each type of shirt, and 3. The percentage distribution of dye quality in each type of shirt.

Note: Each shirt requires 1.5 metres of cloth

| | | Distribution of cloth (%) | | | | Distribution of Dye (%) | | | |
|---|---|---|---|---|---|---|---|---|---|
| Shirt Type | Number (000) | Shirt Type | High | Medium | Low | Shirt Type | High | Medium | Low |
| A | 20 | A | 80 | 20 | - | A | 70 | 15 | 15 |
| B | 30 | B | 30 | 40 | 30 | B | 20 | 50 | 30 |
| C | 30 | C | - | 70 | 30 | C | - | 60 | 40 |
| D | 10 | D | - | 60 | 40 | D | - | 40 | 60 |
| E | 10 | E | - | 10 | 90 | E | - | 20 | 80 |

What is the ratio of the three qualities of dyes in high-quality cloth?

A. 2:3:5 B. 1:2:5 C. 7:9:10 D. None of the above.

cat1995 quantitative-aptitude data-interpretation tabular-data

## 7.95.16 Tabular Data: CAT 1996 | Question: 151 top

| Coffee | Production ('000 tones) (tonnes) | Capacity Utilization (%) | Sales ('000 Sales) | Total value (Rs./ Cr. ) |
|---|---|---|---|---|
| Brooke Bond | 2.97 | 76.50 | 2.55 | 31.15 |
| Nestle | 2.48 | 71.20 | 2.03 | 26.75 |
| Lipton | 1.64 | 64.80 | 1.26 | 15.25 |
| MAC | 1.54 | 59.35 | 1.47 | 17.45 |
| **Total** (incl others) | 11.60 | 61.30 | 10.67 | 132.80 |

What is the maximum production capacity (in '000 tonnes) of Lipton for coffee?

A. 2.53 B. 2.85 C. 2.24 D. 2.07

cat1996 quantitative-aptitude tabular-data data-interpretation

Answer key

## 7.95.17 Tabular Data: CAT 1996 | Question: 152 top

| Coffee | Production ('000 tones) (tonnes) | Capacity Utilization (%) | Sales ('000 Sales) | Total value (Rs./ Cr. ) |
|---|---|---|---|---|
| Brooke Bond | 2.97 | 76.50 | 2.55 | 31.15 |
| Nestle | 2.48 | 71.20 | 2.03 | 26.75 |
| Lipton | 1.64 | 64.80 | 1.26 | 15.25 |
| MAC | 1.54 | 59.35 | 1.47 | 17.45 |
| **Total** (incl others) | 11.60 | 61.30 | 10.67 | 132.80 |

The highest price of coffee per kg is for

A. Nestle B. MAC C. Lipton D. Insufficient data

cat1996 quantitative-aptitude tabular-data data-interpretation

## 7.95.18 Tabular Data: CAT 1996 | Question: 153 top

| Coffee | Production ('000 tones) (tonnes) | Capacity Utilization (%) | Sales ('000 Sales) | Total value (Rs./ Cr. ) |
|---|---|---|---|---|
| Brooke Bond | 2.97 | 76.50 | 2.55 | 31.15 |
| Nestle | 2.48 | 71.20 | 2.03 | 26.75 |
| Lipton | 1.64 | 64.80 | 1.26 | 15.25 |
| MAC | 1.54 | 59.35 | 1.47 | 17.45 |
| **Total** (incl others) | 11.60 | 61.30 | 10.67 | 132.80 |

What percent of the total market share (by Sales Value) is controlled by "Others"?

A. 60% B. 32% C. 67% D. Insufficient data.

cat1996 quantitative-aptitude tabular-data data-interpretation

## 7.95.19 Tabular Data: CAT 1996 | Question: 154 top

| Coffee | Production ('000 tones) (tonnes) | Capacity Utilization (%) | Sales ('000 Sales) | Total value (Rs./ Cr. ) |
|---|---|---|---|---|
| Brooke Bond | 2.97 | 76.50 | 2.55 | 31.15 |
| Nestle | 2.48 | 71.20 | 2.03 | 26.75 |
| Lipton | 1.64 | 64.80 | 1.26 | 15.25 |
| MAC | 1.54 | 59.35 | 1.47 | 17.45 |
| **Total** (incl others) | 11.60 | 61.30 | 10.67 | 132.80 |

What approximately is the total production capacity (in tonnes) for coffee in India?

A. 18, 100 B. 20, 300 C. 18, 900 D. Insufficient data.

cat1996 quantitative-aptitude tabular-data data-interpretation

## 7.95.20 Tabular Data: CAT 1996 | Question: 155 top

| Coffee | Production ('000 tones) (tonnes) | Capacity Utilization (%) | Sales ('000 Sales) | Total value (Rs./ Cr. ) |
|---|---|---|---|---|
| Brooke Bond | 2.97 | 76.50 | 2.55 | 31.15 |
| Nestle | 2.48 | 71.20 | 2.03 | 26.75 |
| Lipton | 1.64 | 64.80 | 1.26 | 15.25 |
| MAC | 1.54 | 59.35 | 1.47 | 17.45 |
| **Total** (incl others) | 11.60 | 61.30 | 10.67 | 132.80 |

Which company out of the four companies mentioned above has the maximum unutilised capacity (in ' 000 tonnes)?

A. Lipton B. Nestle C. Brooke Bond D. MAC

cat1996 quantitative-aptitude data-interpretation tabular-data

## 7.95.21 Tabular Data: CAT 1996 | Question: 156 top

| Month | Stage | Cost(Rs. '000 per man-month) |
|---|---|---|
| 1 − 2 | Specification | 40 |
| 3 − 4 | Design | 20 |
| 5 − 8 | Coding | 10 |
| 9 − 10 | Testing | 15 |
| 11 − 15 | Maintenance | 10 |

The number of people employed in each month is:

| Month | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| **No. of people employed** | 2 | 3 | 4 | 3 | 4 | 5 | 5 | 4 | 4 | 1 | 3 | 3 | 1 | 1 | 1 |

Due to an overrun, the Design stage took three months, i.e. months 3, 4 and 5. The number of people working on Design in the fifth month was 5. Calculate the percentage change in the cost incurred in the fifth month. (due to improvement in "Coding" technique, the stage was completed in months 6 − 8 only).

A. 225% B. 150% C. 275% D. 240%

cat1996 quantitative-aptitude tabular-data data-interpretation

Answer key

## 7.95.22 Tabular Data: CAT 1996 | Question: 157 top

| Month | Stage | Cost(Rs. '000 per man-month) |
|---|---|---|
| 1 − 2 | Specification | 40 |
| 3 − 4 | Design | 20 |
| 5 − 8 | Coding | 10 |
| 9 − 10 | Testing | 15 |
| 11 − 15 | Maintenance | 10 |

The number of people employed in each month is:

| Month | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| **No. of people employed** | 2 | 3 | 4 | 3 | 4 | 5 | 5 | 4 | 4 | 1 | 3 | 3 | 1 | 1 | 1 |

With reference to the above question, what is the cost incurred in the new "Coding" stage? (Under the new technique, 4 people work in the sixth month and 5 in the eighth).

A. Rs. 1, 40, 000 B. Rs. 1, 50, 000
C. Rs. 1, 60, 000 D. Rs. 1, 70, 000

cat1996 quantitative-aptitude tabular-data data-interpretation

## 7.95.23 Tabular Data: CAT 1996 | Question: 158 top

| Month | Stage | Cost(Rs. '000 per man-month) |
|---|---|---|
| 1 − 2 | Specification | 40 |
| 3 − 4 | Design | 20 |
| 5 − 8 | Coding | 10 |
| 9 − 10 | Testing | 15 |
| 11 − 15 | Maintenance | 10 |

The number of people employed in each month is:

| Month | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| No. of people employed | 2 | 3 | 4 | 3 | 4 | 5 | 5 | 4 | 4 | 1 | 3 | 3 | 1 | 1 | 1 |

Under the new technique, which stage of Software Development is most expensive for *XYZ* Software company?

A. Testing B. Specification C. Coding D. Design

cat1996 quantitative-aptitude data-interpretation tabular-data

## 7.95.24 Tabular Data: CAT 1996 | Question: 159 top

| Month | Stage | Cost(Rs. '000 per man-month) |
|---|---|---|
| 1 − 2 | Specification | 40 |
| 3 − 4 | Design | 20 |
| 5 − 8 | Coding | 10 |
| 9 − 10 | Testing | 15 |
| 11 − 15 | Maintenance | 10 |

The number of people employed in each month is:

| Month | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| No. of people employed | 2 | 3 | 4 | 3 | 4 | 5 | 5 | 4 | 4 | 1 | 3 | 3 | 1 | 1 | 1 |

Which five consecutive months have the lowest average cost per man-month under the new technique?

A. 1 − 5 B. 9 − 13 C. 11 − 15 D. None of the these

cat1996 quantitative-aptitude tabular-data data-interpretation

Answer key

## 7.95.25 Tabular Data: CAT 1996 | Question: 160 top

| Month | Stage | Cost(Rs. '000 per man-month) |
|---|---|---|
| 1 – 2 | Specification | 40 |
| 3 – 4 | Design | 20 |
| 5 – 8 | Coding | 10 |
| 9 – 10 | Testing | 15 |
| 11 – 15 | Maintenance | 10 |

The number of people employed in each month is:

| Month | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| No. of people employed | 2 | 3 | 4 | 3 | 4 | 5 | 5 | 4 | 4 | 1 | 3 | 3 | 1 | 1 | 1 |

What is the difference in the cost between the old and the new techniques?

A. Rs. 30, 000
B. Rs. 60, 000
C. Rs. 70, 000
D. Rs. 40, 000

cat1996 quantitative-aptitude data-interpretation tabular-data

## 7.95.26 Tabular Data: CAT 1996 | Question: 161 top

The amount of money invested (in rupees crore) in the core infrastructure areas of two districts, Chittoor and Khammam, Andhra Pradesh as follows:

| Chittoor District | | | Khammam District | | |
|---|---|---|---|---|---|
| Core Area | 1995 | 1996 | Core Area | 1995 | 1996 |
| Electricity | 815.2 | 1054.2 | Electricity Area | 2065.8 | 2365.1 |
| Chemical | 389.5 | 476.7 | Chemical | 745.5 | 986.4 |
| Thermal | 690.4 | 565.9 | Thermal | 1232.7 | 1026.3 |
| Solar | 468.1 | 589.6 | Solar | 1363.5 | 1792.1 |
| Nuclear | 617.9 | 803.1 | Nuclear | 1674.3 | 2182.1 |
| Total | 2981.1 | 3489.5 | Total | 7081.6 | 8352.0 |

By what percent was the total investment in the two districts more in 1996 as compared to that in 1995?

A. 14%
B. 21%
C. 24%
D. 18%

cat1996 quantitative-aptitude tabular-data data-interpretation

Answer key

## 7.95.27 Tabular Data: CAT 1996 | Question: 162 top

The amount of money invested (in rupees crore) in the core infrastructure areas of two districts, Chittoor and Khammam, Andhra Pradesh as follows:

| Chittoor District | | | Khammam District | | |
|---|---|---|---|---|---|
| Core Area | 1995 | 1996 | Core Area | 1995 | 1996 |
| Electricity | 815.2 | 1054.2 | Electricity Area | 2065.8 | 2365.1 |
| Chemical | 389.5 | 476.7 | Chemical | 745.5 | 986.4 |
| Thermal | 690.4 | 565.9 | Thermal | 1232.7 | 1026.3 |
| Solar | 468.1 | 589.6 | Solar | 1363.5 | 1792.1 |
| Nuclear | 617.9 | 803.1 | Nuclear | 1674.3 | 2182.1 |
| Total | 2981.1 | 3489.5 | Total | 7081.6 | 8352.0 |

Approximately how many times the total investment in Chittoor was the total investment in Khammam in the given two years?

A. 2.8
B. 2.0
C. 2.4
D. 1.7

cat1996 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.28 Tabular Data: CAT 1996 | Question: 164 top

The amount of money invested (in rupees crore) in the core infrastructure areas of two districts, Chittoor and Khammam, Andhra Pradesh as follows:

| Chittoor District | | | Khammam District | | |
|---|---|---|---|---|---|
| Core Area | 1995 | 1996 | Core Area | 1995 | 1996 |
| Electricity | 815.2 | 1054.2 | Electricity Area | 2065.8 | 2365.1 |
| Chemical | 389.5 | 476.7 | Chemical | 745.5 | 986.4 |
| Thermal | 690.4 | 565.9 | Thermal | 1232.7 | 1026.3 |
| Solar | 468.1 | 589.6 | Solar | 1363.5 | 1792.1 |
| Nuclear | 617.9 | 803.1 | Nuclear | 1674.3 | 2182.1 |
| Total | 2981.1 | 3489.5 | Total | 7081.6 | 8352.0 |

In Khammam district the investment in which area in 1996 showed the least percent increase over the investment in that area in 1995?

A. Electricity B. Chemical C. Solar D. Nuclear

cat1996 quantitative-aptitude tabular-data data-interpretation

Answer key

## 7.95.29 Tabular Data: CAT 1996 | Question: 165 top

The amount of money invested (in rupees crore) in the core infrastructure areas of two districts, Chittoor and Khammam, Andhra Pradesh as follows:

| Chittoor District | | | Khammam District | | |
|---|---|---|---|---|---|
| Core Area | 1995 | 1996 | Core Area | 1995 | 1996 |
| Electricity | 815.2 | 1054.2 | Electricity Area | 2065.8 | 2365.1 |
| Chemical | 389.5 | 476.7 | Chemical | 745.5 | 986.4 |
| Thermal | 690.4 | 565.9 | Thermal | 1232.7 | 1026.3 |
| Solar | 468.1 | 589.6 | Solar | 1363.5 | 1792.1 |
| Nuclear | 617.9 | 803.1 | Nuclear | 1674.3 | 2182.1 |
| Total | 2981.1 | 3489.5 | Total | 7081.6 | 8352.0 |

If the total investment in Khammam shows the same rate of increase in 1997, as it had shown from 1995 to 1996, what appropriately would be the total investment in Khammam in 1997 (in Rs. crore)?

A. 9, 850 B. 10, 000 C. 9, 170 D. 8, 540

cat1996 quantitative-aptitude data-interpretation tabular-data

Answer key

## 7.95.30 Tabular Data: CAT 1997 | Question: 156 top

Answer these questions with the help of the following table.

**Hotels in Mumbai**

| Project | No. of rooms | Cost (in Re. crore) | Year of completion | Company |
|---|---|---|---|---|
| Welcomgroup | 600 | 275 | 1999 | IHCL |
| Leela Hotels | 300 | 225 | 1999 | Leela Hotels |
| Mumbai Heights | 200 | 225 | 1998 | Bombay Hotels |
| Royal Holidays | 536 | 250 | 1998 | Lockandwala Group |
| Majestic Holiday | 500 | 250 | 1999 | Raheja Group |
| Supreme Hotel | 300 | 300 | 1999 | ITC |
| Hyatt | 500 | 256 | 2000 | Asian Hotels |

Note: Date of start of all projects is 1997.

Which of the following had the least cost per room?

A. Lokhandwala B. Raheja
C. IHCL D. ITC

cat1997 quantitative-aptitude tabular-data data-interpretation

## 7.95.31 Tabular Data: CAT 1997 | Question: 157 top

Answer these questions with the help of the following table.

**Hotels in Mumbai**

| Project | No. of rooms | Cost (in Re. crore) | Year of completion | Company |
|---|---|---|---|---|
| Welcomgroup | 600 | 275 | 1999 | IHCL |
| Leela Hotels | 300 | 225 | 1999 | Leela Hotels |
| Mumbai Heights | 200 | 225 | 1998 | Bombay Hotels |
| Royal Holidays | 536 | 250 | 1998 | Lockandwala Group |
| Majestic Holiday | 500 | 250 | 1999 | Raheja Group |
| Supreme Hotel | 300 | 300 | 1999 | ITC |
| Hyatt | 500 | 256 | 2000 | Asian Hotels |

Note: Date of start of all projects is 1997.

Which of the following has the maximum number of rooms per crore of rupees?

A. THCL
B. Raheja
C. Lokhandwala
D. ITC

cat1997 quantitative-aptitude tabular-data data-interpretation

## 7.95.32 Tabular Data: CAT 1997 | Question: 158 top

Answer these questions with the help of the following table.

**Hotels in Mumbai**

| Project | No. of rooms | Cost (in Re. crore) | Year of completion | Company |
|---|---|---|---|---|
| Welcomgroup | 600 | 275 | 1999 | IHCL |
| Leela Hotels | 300 | 225 | 1999 | Leela Hotels |
| Mumbai Heights | 200 | 225 | 1998 | Bombay Hotels |
| Royal Holidays | 536 | 250 | 1998 | Lockandwala Group |
| Majestic Holiday | 500 | 250 | 1999 | Raheja Group |
| Supreme Hotel | 300 | 300 | 1999 | ITC |
| Hyatt | 500 | 256 | 2000 | Asian Hotels |

assume that the cost of the project is incurred in the year of completion. Interest is charged @ 10% per annum.

What is the cost incurred (in Rs. crore) for projects completed in 1998?

A. 255
B. 475
C. 522.5
D. 502.5

cat1997 quantitative-aptitude data-interpretation tabular-data

## 7.95.33 Tabular Data: CAT 1997 | Question: 159 top

Answer these questions with the help of the following table.

**Hotels in Mumbai**

| Project | No. of rooms | Cost (in Re. crore) | Year of completion | Company |
|---|---|---|---|---|
| Welcomgroup | 600 | 275 | 1999 | IHCL |
| Leela Hotels | 300 | 225 | 1999 | Leela Hotels |
| Mumbai Heights | 200 | 225 | 1998 | Bombay Hotels |
| Royal Holidays | 536 | 250 | 1998 | Lockandwala Group |
| Majestic Holiday | 500 | 250 | 1999 | Raheja Group |
| Supreme Hotel | 300 | 300 | 1999 | ITC |
| Hyatt | 500 | 256 | 2000 | Asian Hotels |

assume that the cost of the project is incurred in the year of completion. Interest is charged @ 10% per annum

What is the cost incurred (in Rs cr) for projects completed in 1999?

A. 1282.6
B. 1270.0
C. 1475
D. 1535.0

cat1997 quantitative-aptitude data-interpretation tabular-data

## 7.95.34 Tabular Data: CAT 1997 | Question: 160 top

Answer these questions with the help of the following table.

**Hotels in Mumbai**

| Project | No. of rooms | Cost (in Re. crore) | Year of completion | Company |
|---|---|---|---|---|
| Welcomgroup | 600 | 275 | 1999 | IHCL |
| Leela Hotels | 300 | 225 | 1999 | Leela Hotels |
| Mumbai Heights | 200 | 225 | 1998 | Bombay Hotels |
| Royal Holidays | 536 | 250 | 1998 | Lockandwala Group |
| Majestic Holiday | 500 | 250 | 1999 | Raheja Group |
| Supreme Hotel | 300 | 300 | 1999 | ITC |
| Hyatt | 500 | 256 | 2000 | Asian Hotels |

assume that the cost of the project is incurred in the year of completion. Interest is charged @ 10% per annum.

What approximately is the cost incurred (in Re. crore) for projects completed by 2000?

A. 1785 B. 2140 C. 2320 D. None of these

cat1997 quantitative-aptitude data-interpretation tabular-data

## 7.95.35 Tabular Data: CAT 1997 | Question: 173 top

The following table gives the tariff (in paise per kilo-watt-hour) levied by the UPSEB in 1994– 95, in the four sectors and the regions within them. The table also gives the percentage change in the tariff as compared to 1991– 92.

| | Region 1 p/kwh | % incr | Region 2 p/kwh | % incr | Region 3 p/kwh | %in cr | Region 4 p/kwh | % incr | Region 5 p/kwh | % incr |
|---|---|---|---|---|---|---|---|---|---|---|
| Sector 1 | 425 | +15 | 472 | +5 | 420 | –4 | 415 | +8 | 440 | +10 |
| Sector 2 | 430 | +12 | 468 | +8 | 448 | +7 | 423 | –3 | 427 | +11 |
| Sector 3 | 428 | +8 | 478 | –4 | 432 | +6 | 441 | +10 | 439 | +8 |
| Sector 4 | 434 | –5 | 470 | +15 | 456 | +10 | 451 | +12 | 446 | –12 |

If the amount of power consumed by the various regions in Sector 1 is the same, then, as compared to 1991 − 92, the net tariff in 1994 − 95:

A. Increases by 6.5%
B. Decreases by 3.5%
C. Increases by 10.2%
D. Decreases by 7.3%

cat1997 quantitative-aptitude tabular-data data-interpretation

## 7.95.36 Tabular Data: CAT 1997 | Question: 174 top

The following table gives the tariff (in paise per kilo-watt-hour) levied by the UPSEB in 1994– 95, in the four sectors and the regions within them. The table also gives the percentage change in the tariff as compared to 1991– 92.

| | Region 1 p/kwh | % incr | Region 2 p/kwh | % incr | Region 3 p/kwh | %incr | Region 4 p/kwh | % incr | Region 5 p/kwh | % incr |
|---|---|---|---|---|---|---|---|---|---|---|
| Sector 1 | 425 | +15 | 472 | +5 | 420 | –4 | 415 | +8 | 440 | +10 |
| Sector 2 | 430 | +12 | 468 | +8 | 448 | +7 | 423 | –3 | 427 | +11 |
| Sector 3 | 428 | +8 | 478 | –4 | 432 | +6 | 441 | +10 | 439 | +8 |
| Sector 4 | 434 | –5 | 470 | +15 | 456 | +10 | 451 | +12 | 446 | –12 |

What approximately was the average tariff in Region 3 in 1991–92?

A. 407 B. 420 C. 429 D. None of these

cat1997 quantitative-aptitude tabular-data data-interpretation

## 7.95.37 Tabular Data: CAT 1997 | Question: 175 top

The following table gives the tariff (in paise per kilo-watt-hour) levied by the UPSEB in 1994–95, in the four sectors and the regions within them. The table also gives the percentage change in the tariff as compared to 1991–92.

| | Region 1 p/kwh | % incr | Region 2 p/kwh | % incr | Region 3 p/kwh | %incr | Region 4 p/kwh | % incr | Region 5 p/kwh | % incr |
|---|---|---|---|---|---|---|---|---|---|---|
| Sector 1 | 425 | +15 | 472 | +5 | 420 | –4 | 415 | +8 | 440 | +10 |
| Sector 2 | 430 | +12 | 468 | +8 | 448 | +7 | 423 | –3 | 427 | +11 |
| Sector 3 | 428 | +8 | 478 | –4 | 432 | +6 | 441 | +10 | 439 | +8 |
| Sector 4 | 434 | –5 | 470 | +15 | 456 | +10 | 451 | +12 | 446 | –12 |

The UPSEB supplies power under four categories, Urban (25%), Domestic (20%) Industrial (40%) and Rural (15%). In 1994–95, the total power produced by the UPSEB was 7875 Megawatts.

If in 1994–95, there was a 10% decrease in the domestic consumption of power as compared to that in 1991–92, what was the consumption of power in the rural sector in 1991–92?

A. 1312 B. 1422 C. 1750 D. None of these

cat1997 quantitative-aptitude tabular-data data-interpretation

## 7.95.38 Tabular Data: CAT 1997 | Question: 176 top

The following table gives the tariff (in paise per kilo-watt-hour) levied by the UPSEB in 1994–95, in the four sectors and the regions within them. The table also gives the percentage change in the tariff as compared to 1991–92.

| | Region 1 p/kwh | % incr | Region 2 p/kwh | % incr | Region 3 p/kwh | %incr | Region 4 p/kwh | % incr | Region 5 p/kwh | % incr |
|---|---|---|---|---|---|---|---|---|---|---|
| Sector 1 | 425 | +15 | 472 | +5 | 420 | –4 | 415 | +8 | 440 | +10 |
| Sector 2 | 430 | +12 | 468 | +8 | 448 | +7 | 423 | –3 | 427 | +11 |
| Sector 3 | 428 | +8 | 478 | –4 | 432 | +6 | 441 | +10 | 439 | +8 |
| Sector 4 | 434 | –5 | 470 | +15 | 456 | +10 | 451 | +12 | 446 | –12 |

The UPSEB supplies power under four categories, Urban (25%), Domestic (20%) Industrial (40%) and Rural (15%). In 1994– 95, the total power produced by the UPSEB was 7875 Megawatts.

In the given two years, what is the total tariff paid by the Urban sector (in Rs. lakh)?

A. 22.4
B. 21.6
C. 27.2
D. Cannot be determined

cat1997 quantitative-aptitude data-interpretation tabular-data

## 7.95.39 Tabular Data: CAT 1997 | Question: 177 top

The following table gives the tariff (in paise per kilo-watt-hour) levied by the UPSEB in 1994– 95, in the four sectors and the regions within them. The table also gives the percentage change in the tariff as compared to 1991– 92.

| | Region 1 p/kwh | % incr | Region 2 p/kwh | % incr | Region 3 p/kwh | %incr | Region 4 p/kwh | % incr | Region 5 p/kwh | % incr |
|---|---|---|---|---|---|---|---|---|---|---|
| Sector 1 | 425 | +15 | 472 | +5 | 420 | –4 | 415 | +8 | 440 | +10 |
| Sector 2 | 430 | +12 | 468 | +8 | 448 | +7 | 423 | –3 | 427 | +11 |
| Sector 3 | 428 | +8 | 478 | –4 | 432 | +6 | 441 | +10 | 439 | +8 |
| Sector 4 | 434 | –5 | 470 | +15 | 456 | +10 | 451 | +12 | 446 | –12 |

The UPSEB supplies power under four categories, Urban (25%), Domestic (20%) Industrial (40%) and Rural (15%). In 1994– 95, the total power produced by the UPSEB was 7875 Megawatts.

Which of the following is true?

A. The average tariff in Region 4 is 437.5 p/khw.
B. The average tariff in Region 2 is greater than the average tariff in Region 5.
C. In 1991 − 92, the industrial sector contributed to about 42% of the total revenue from power.
D. None of these

cat1997 quantitative-aptitude data-interpretation tabular-data

## 7.95.40 Tabular Data: CAT 1997 | Question: 178 top

The questions are based on the following information.

| Year | No. of Rural banks | Average no. of loans | Average size (Rs.) | Agricultural Loans | | Consumer Price Index |
|---|---|---|---|---|---|---|
| | | | | No. ('000) | Value (Rs. mn) | |
| 1970 | 90 | 28 | 109 | 18.3 | 2.00 | 43 |
| 1971 | 115 | 39 | 133 | 20.4 | 3.58 | 49 |
| 1972 | 130 | 52 | 178 | 25.1 | 6.26 | 55 |
| 1974 | 260 | 98 | 243 | 41.2 | 34.54 | 70 |
| 1975 | 318 | 121 | 283 | 51.4 | 52.21 | 78 |
| 1980 | 605 | 288 | 567 | 135.7 | 498.4 | 131 |
| 1981 | 665 | 312 | 622 | 152.8 | 612.4 | 137 |
| 1983 | 840 | 380 | 711 | 211.6 | 915.7 | 149 |

In 1974, agricultural loans formed what percent of the total loans?

A. 88%
B. 71%
C. 77%
D. Cannot be determined

cat1997 data-interpretation tabular-data quantitative-aptitude

## 7.95.41 Tabular Data: CAT 1997 | Question: 179 top

The questions are based on the following information.

| Year | No. of Rural banks | Average no. of loans | Average size (Rs.) | Agricultural Loans | | Consumer Price Index |
|---|---|---|---|---|---|---|
| | | | | No. ('000) | Value (Rs. mn) | |
| 1970 | 90 | 28 | 109 | 18.3 | 2.00 | 43 |
| 1971 | 115 | 39 | 133 | 20.4 | 3.58 | 49 |
| 1972 | 130 | 52 | 178 | 25.1 | 6.26 | 55 |
| 1974 | 260 | 98 | 243 | 41.2 | 34.54 | 70 |
| 1975 | 318 | 121 | 283 | 51.4 | 52.21 | 78 |
| 1980 | 605 | 288 | 567 | 135.7 | 498.4 | 131 |
| 1981 | 665 | 312 | 622 | 152.8 | 612.4 | 137 |
| 1983 | 840 | 380 | 711 | 211.6 | 915.7 | 149 |

From the given data, the number of rural loans up to 1980 formed approximately what percent of those in 1983?

A. 112%
B. 80%
C. 97%
D. Cannot be determined

cat1997 quantitative-aptitude tabular-data data-interpretation

## 7.95.42 Tabular Data: CAT 1997 | Question: 180 top

The questions are based on the following information.

| Year | No. of Rural banks | Average no. of loans | Average size (Rs.) | Agricultural Loans | | Consumer Price Index |
|---|---|---|---|---|---|---|
| | | | | No. ('000) | Value (Rs. mn) | |
| 1970 | 90 | 28 | 109 | 18.3 | 2.00 | 43 |
| 1971 | 115 | 39 | 133 | 20.4 | 3.58 | 49 |
| 1972 | 130 | 52 | 178 | 25.1 | 6.26 | 55 |
| 1974 | 260 | 98 | 243 | 41.2 | 34.54 | 70 |
| 1975 | 318 | 121 | 283 | 51.4 | 52.21 | 78 |
| 1980 | 605 | 288 | 567 | 135.7 | 498.4 | 131 |

## 7.95.43 Tabular Data: CAT 1997 | Question: 181 top

The questions are based on the following information.

| Year | No. of Rural banks | Average no. of loans | Average size (Rs.) | Agricultural Loans | | Consumer Price Index |
|---|---|---|---|---|---|---|
| | | | | No. ('000) | Value (Rs. mn) | |
| 1970 | 90 | 28 | 109 | 18.3 | 2.00 | 43 |
| 1971 | 115 | 39 | 133 | 20.4 | 3.58 | 49 |
| 1972 | 130 | 52 | 178 | 25.1 | 6.26 | 55 |
| 1974 | 260 | 98 | 243 | 41.2 | 34.54 | 70 |
| 1975 | 318 | 121 | 283 | 51.4 | 52.21 | 78 |
| 1980 | 605 | 288 | 567 | 135.7 | 498.4 | 131 |
| 1981 | 665 | 312 | 622 | 152.8 | 612.4 | 137 |
| 1983 | 840 | 380 | 711 | 211.6 | 915.7 | 149 |

What is the value of Agricultural loans in 1983 at 1970 prices?

A. 3265 B. 3175 C. 3085 D. None of these

cat1997 quantitative-aptitude data-interpretation tabular-data

## 7.95.44 Tabular Data: CAT 1997 | Question: 182 top

The questions are based on the following information.

| Year | No. of Rural banks | Average no. of loans | Average size (Rs.) | Agricultural Loans | | Consumer Price Index |
|---|---|---|---|---|---|---|
| | | | | No. ('000) | Value (Rs. mn) | |
| 1970 | 90 | 28 | 109 | 18.3 | 2.00 | 43 |
| 1971 | 115 | 39 | 133 | 20.4 | 3.58 | 49 |
| 1972 | 130 | 52 | 178 | 25.1 | 6.26 | 55 |
| 1974 | 260 | 98 | 243 | 41.2 | 34.54 | 70 |
| 1975 | 318 | 121 | 283 | 51.4 | 52.21 | 78 |
| 1980 | 605 | 288 | 567 | 135.7 | 498.4 | 131 |
| 1981 | 665 | 312 | 622 | 152.8 | 612.4 | 137 |
| 1983 | 840 | 380 | 711 | 211.6 | 915.7 | 149 |

In which year was the number of loans per rural bank the least?

A. 1974 B. 1971 C. 1970 D. 1975

cat1997 quantitative-aptitude tabular-data data-interpretation

## 7.95.45 Tabular Data: CAT 1997 | Question: 183 top

The questions are based on the following information.

| Year | No. of Rural banks | Average no. of loans | Average size (Rs.) | Agricultural Loans | | Consumer Price Index |
|---|---|---|---|---|---|---|
| | | | | No. ('000) | Value (Rs. mn) | |
| 1970 | 90 | 28 | 109 | 18.3 | 2.00 | 43 |
| 1971 | 115 | 39 | 133 | 20.4 | 3.58 | 49 |
| 1972 | 130 | 52 | 178 | 25.1 | 6.26 | 55 |
| 1974 | 260 | 98 | 243 | 41.2 | 34.54 | 70 |
| 1975 | 318 | 121 | 283 | 51.4 | 52.21 | 78 |
| 1980 | 605 | 288 | 567 | 135.7 | 498.4 | 131 |
| 1981 | 665 | 312 | 622 | 152.8 | 612.4 | 137 |
| 1983 | 840 | 380 | 711 | 211.6 | 915.7 | 149 |

What is the simple annual rate of increase in the number of Agricultural loans from 1970 to 1983?

A. 132% B. 81% C. 75% D. 1056%

cat1997 quantitative-aptitude tabular-data data-interpretation

## 7.95.46 Tabular Data: CAT 1997 | Question: 184 top

The questions are based on the following information.

| Year | No. of Rural banks | Average no. of loans | Average size (Rs.) | Agricultural Loans | | Consumer Price Index |
|---|---|---|---|---|---|---|
| | | | | No. ('000) | Value (Rs. mn) | |
| 1970 | 90 | 28 | 109 | 18.3 | 2.00 | 43 |
| 1971 | 115 | 39 | 133 | 20.4 | 3.58 | 49 |
| 1972 | 130 | 52 | 178 | 25.1 | 6.26 | 55 |
| 1974 | 260 | 98 | 243 | 41.2 | 34.54 | 70 |
| 1975 | 318 | 121 | 283 | 51.4 | 52.21 | 78 |
| 1980 | 605 | 288 | 567 | 135.7 | 498.4 | 131 |
| 1981 | 665 | 312 | 622 | 152.8 | 612.4 | 137 |
| 1983 | 840 | 380 | 711 | 211.6 | 915.7 | 149 |

The Consumer Price Index for 1970 is to be taken as 105 and the Indices for the subsequent years are to be corrected accordingly.

By roughly how many points do the Indices for the years 1983 and 1975 differ?

A. 175 B. 180 C. 188 D. 195

cat1997 quantitative-aptitude data-interpretation tabular-data

## 7.95.47 Tabular Data: CAT 1997 | Question: 185 top

The questions are based on the following information.

| Year | No. of Rural banks | Average no. of loans | Average size (Rs.) | Agricultural Loans | | Consumer Price Index |
|---|---|---|---|---|---|---|
| | | | | No. ('000) | Value (Rs. mn) | |
| 1970 | 90 | 28 | 109 | 18.3 | 2.00 | 43 |
| 1971 | 115 | 39 | 133 | 20.4 | 3.58 | 49 |
| 1972 | 130 | 52 | 178 | 25.1 | 6.26 | 55 |
| 1974 | 260 | 98 | 243 | 41.2 | 34.54 | 70 |
| 1975 | 318 | 121 | 283 | 51.4 | 52.21 | 78 |
| 1980 | 605 | 288 | 567 | 135.7 | 498.4 | 131 |
| 1981 | 665 | 312 | 622 | 152.8 | 612.4 | 137 |
| 1983 | 840 | 380 | 711 | 211.6 | 915.7 | 149 |

The Consumer Price Index for 1970 is to be taken as 105 and the Indices for the subsequent years are to be corrected accordingly.

What is the value of the loans in 1980 at 1983 prices?

A. 570 B. 675 C. 535 D. 440

cat1997 quantitative-aptitude data-interpretation tabular-data

## 7.95.48 Tabular Data: How many Dollars was one Euro worth in May? top

| 2007 | Jan. | Feb. | March | April | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Value of Pound in Euros | 1.507 | 1.497 | 1.47 | 1.471 | 1.468 | 1.48 | 1.483 | 1.476 | 1.451 | 1.437 | 1.411 | 1.384 |
| Value of Pound in Dollars | 1.959 | 1.959 | 1.947 | 1.988 | 1.984 | 1.987 | 2.03 | 2.011 | 2.018 | 2.045 | 2.071 | 2.014 |

How many Dollars was one Euro worth in may?

1. 1.15
2. 1.20
3. 1.25
4. 1.30
5. 1.35

What was the percentage drop in the value of the pound compared to the Euro over the year?

1. 6
2. 8
3. 10
4. 12
5. 14

If u converted 67 Euros to pounds in February, how many Dollars (to the nearest Dollar) would this be worth in November?

### 7.97.4 Time And Distance: CAT 1995 | Question: 74 top

Choose the correct option:

In a race of 200 meters, A beats S by 20 metres and N by 40 metres. If S and N are running a race of 100 metres with exactly the same speed as before, then by how many metres will S beat N?

A. 11.11 metres
B. 10 metres
C. 12 metres
D. 25 metres

cat1995 quantitative-aptitude time-and-distance

Answer key

### 7.97.5 Time And Distance: CAT 1996 | Question: 120 top

$A$, $S$, $M$ and $D$ are functions of $x$ and $y$, and they are defined as follows:

- $A(x, y) = x + y$

- $S(x, y) = x - y$
- $M(x, y) = xy$
- $D(x, y) = x/y$,

where $y \neq 0$.

A man travels three-fifths of distance $AB$ at a speed of $3a$, and the remaining at a speed of $2b$. If he goes from $B$ to $A$ and back at a speed of $5c$ in the same time, then:

A. $1/a + 1/b = 1/c$ B. $a + b = c$ C. $1/a + 1/b = 2/c$ D. None of these

cat1996 quantitative-aptitude time-and-distance

### 7.97.6 Time And Distance: CAT 1996 | Question: 129 top

X, Y and Z wish to go from place A to place B, which are separated by a distance of 70 km. All the three persons start off together form A, with X and Y going by Luna at a speed of 20 kmph. X drops V somewhere along the way and returns to pick up Z who has already started walking towards B at a speed of 5 kmph. V. after being dropped by X, starts walking towards B at a speed of 5 kmph. In this manner, all three of them reach B at the same time.

How much distance is covered by Z on foot?

A. 25 km B. 10 km C. 20 km D. 15 km

cat1996 quantitative-aptitude time-and-distance

### 7.97.7 Time And Distance: CAT 1996 | Question: 130 top

X, Y and Z wish to go from place A to place B, which are separated by a distance of 70 km. All the three persons start off together form A, with X and Y going by Luna at a speed of 20 kmph. X drops V somewhere along the way and returns to pick up Z who has already started walkig towards B at a speed of 5 kmph. V. after being dropped by X, starts walking towards B at a speed of 5 kmph. In this manner, all three of them reach B at the same time.

What is the total distance travelled by X?

A. 130 km B. 140 km C. 110 km D. 90 km

cat1996 quantitative-aptitude time-and-distance

### 7.97.8 Time And Distance: CAT 1996 | Question: 131 top

X, Y and Z wish to go from place A to place B, which are separated by a distance of 70 km. All the three persons start off together form A, with X and Y going by Luna at a speed of 20 kmph. X drops V somewhere along the way and returns to pick up Z who has already started walkig towards B at a speed of 5 kmph. V. after being dropped by X, starts walking towards B at a speed of 5 kmph. In this manner, all three of them reach B at the same time.

How long does it take them to go from A to B?

A. 6.0 hours B. 6.5 hours C. 7.0 hours D. 14.0 hours

cat1996 quantitative-aptitude time-and-distance

### 7.97.9 Time And Distance: CAT 1996 | Question: 132 top

X, Y and Z wish to go from place A to place B, which are separated by a distance of 70 km. All the three persons start off together form A, with X and Y going by Luna at a speed of 20 kmph. X drops V somewhere along the way and returns to pick up Z who has already started walkig towards B at a speed of 5 kmph. V. after being dropped by X, starts walking towards B at a speed of 5 kmph. In this manner, all three of them reach B at the same time.

After how much time is Y dropped on the way by X?

A. 2.0 hours B. 3.0 hours C. 2.5 hours D. 1.5 hours

cat1996 quantitative-aptitude time-and-distance

### 7.97.10 Time And Distance: CAT 1996 | Question: 133 top

X, Y and Z wish to go from place A to place B, which are separated by a distance of 70 km. All the three persons start off together form A, with X and Y going by Luna at a speed of 20 kmph. X drops V somewhere along the way and returns to pick up Z who has already started walkig towards B at a speed of 5 kmph. V. after being dropped by X, starts walking towards B at a speed of 5 kmph. In this manner, all three of them reach B at the same time.

For how long does X travel alone over the entire journey?

A. 2.5 hours B. 1.0 hour C. 2.0 hours D. 1.5 hours.

cat1996 quantitative-aptitude time-and-distance

### 7.97.11 Time And Distance: CAT 1996 | Question: 141 top

A man travels form A to B at a speed of x kmph. He then rests at B or x hours. He then travels from B to C at a speed of $2x$ kmph and rests at C for $2x$ hours. He moves further to D at a speed twice as that between B and C. He thus reaches D in 16 hours. If distances A-B, B-C, C-D are all equal to 12 km. the time for which he rested at B could be:

A. 3 hours B. 6 hours C. 2 hours D. 4 hours

cat1996 quantitative-aptitude time-and-distance

### 7.104.9 Work Time: CAT 2001 | Question: 28 top

There's a lot of work in preparing a birthday dinner. Even after the turkey is in oven, there are still the potatoes and gravy, yams, salad, and cranberries, not to mention setting the table. Three friends, Asit, Arnold, and Afzal, work together to get all of these chores done. The time it takes them to do the work together is six hours less than Asit would have taken working alone, one hour less than Arnold would have taken, and half the time Afzal would have taken working alone.
How long did it take them to do these chores working together?

A. 20 minutes B. 30 minutes C. 40 minutes D. 50 minutes

### 7.104.12 Work Time: CAT 2003 | Question: 1-103 top

New Age Consultants have three consultants Gyani, Medha and Buddhi. The sum of the number of projects handled by Gyani and Buddhi individually is equal to the number of projects in which Medha is involved. All three consultants are involved in 6 projects. Gyani works with Medha in 14 projects. Buddhi has 2 projects with Medha but without Gyani, and 3 projects with Gyani but without Medha. The total number of projects for New Age consultants is one less than the number of projects in which more than one consultant is involved.

What is the number of projects in which Gyani alone is involved?

A. Uniquely equal to zero.
B. Uniquely equal to one
C. Uniquely equal to four
D. cannot be determined uniquely

### 7.104.33 Work Time: In a section of a timber mill, cylindrical logs of wood, all of uniform dimensions, arrive as the input and are cut into smaller cylindrical pieces of the same radius using manual and mechanical saws. top

In a section of a timber mill, cylindrical logs of wood, all of uniform dimensions, arrive as the input and are cut into smaller cylindrical pieces of the same radius using manual and mechanical saws. To operate a manual saw four workers are needed and to operate a mechanized saw two workers are needed. The team of four workers takes two hours to cut a log into two cylindrical pieces using a manual saw, whereas just two workers are needed to do the same work in one hour using a mechanized saw. The time required to make a cut is proportional to the area across which the cut is made. How long will it take for 12 workers to cut 60 logs into four equal pieces each, if they have two mechanized saws and two manual saws?

1. 40 hours
2. 80 hours
3. 120 hours
4. 60 hours

# 8 Spatial Aptitude (8)

## 8.1 Direction Sense (3) top

### 8.1.1 Direction Sense: NIELIT 2017 July Scientist B - Section A: 41 top

The town of Paranda is located on Green lake. The town of Akram is West of Paranda. Tokhada is East of Akram but West of Paranda. Kokran is East of Bopri but West of Tokhada and Akram. If they are all in the same district, which town is the farthest West?

A. Paranda B. Kokran C. Akram D. Bopri

nielit2017july-scientistb direction-sense

Answer key

### 8.1.2 Direction Sense: NIELIT 2019 Feb Scientist C - Section A: 21 top

Radha's school bus is facing North when it reaches her school. After starting from Radha's house, it turns right twice and then left before reaching the school. What direction was the bus facing when it left the bus stop in front of Radha's house?

A. South
B. North
C. East
D. Cannot be determined

nielit2019feb-scientistc direction-sense

Answer key

### 8.1.3 Direction Sense: NIELIT 2019 Feb Scientist D - Section A: 20 top

Ramesh walked 5 *kms* towards east then he turned right and walked 8 *kms*. He then turned left and walked 5 *kms*. He again turned left and walked 8 *kms*. At what distance is he now from the starting point?

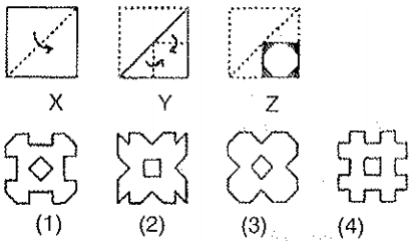
A. 13 *kms* B. 5 *kms* C. 16 *kms* D. None of these

nielit2019feb-scientistd direction-sense

## 8.2 Figure Folding (1) top

### 8.2.1 Figure Folding: NIELIT 2017 July Scientist B - Section A: 45 top

Choose a figure which would most closely resemble the unfolded form of Figure (Z).



A. 1 B. 2 C. 3 D. 4

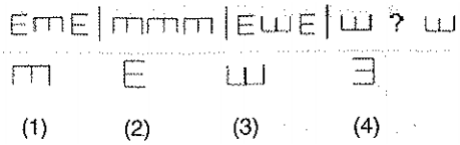
nielit2017july-scientistb figure-folding

Answer key

## 8.3 Sequences&series (1) top

### 8.3.1 Sequences&series: NIELIT 2017 July Scientist B - Section A: 35 top

Complete the missing element of the following series:



A. 1 B. 2 C. 3 D. 4

nielit2017july-scientistb sequences&series

Answer key

## 8.4 Spatial Aptitude (3) top

### 8.4.1 Spatial Aptitude: NIELIT 2016 MAR Scientist D: 74 top

Rahim travelled straight from point $E$ to $F$ at a distance of 5 km. From $F$ he turned left and travelled 6 km and reached point $G$, there he took a left turn and travelled 5 km to reach point $H$. He took another left turn and travelled 2 km and reached point $I$. How far is he from the starting point?

A. 3 km B. 4 km C. 5 km D. 7 km

nielit2016mar-scientistd spatial-aptitude direction-sense

Answer key

### 8.4.2 Spatial Aptitude: NIELIT 2016 MAR Scientist D: 75 top

A man is facing East, then he turns left and goes 10 m, then turns right and goes 5 m, then goes 5 m to the south and from there 5 m to West. In which direction is he, form this original place?

A. East B. West C. North D. South

nielit2016mar-scientistd spatial-aptitude direction-sense

Answer key

### 8.4.3 Spatial Aptitude: NIELIT 2017 OCT Scientific Assistant A - Section A: 11 top

A man walks 5 km toward south and then turns to the right. After walking 3 km he turns to the left and walks 5 km. Now in which direction is he from starting place?

A. West B. South C. North-East D. South-West
